

**STATE OF MICHIGAN
IN THE CIRCUIT COURT FOR THE COUNTY OF WAYNE**

WAYNE COUNTY JAIL INMATES, *et al.*

Plaintiffs,

Case No. 71-173217-CZ

v.

Hon. Timothy M. Kenny

WILLIAM LUCAS, *et al.*

Defendants.

**DEFENDANTS' REPSONSE TO PLAINTIFFS' MOTION
FOR A TEMPORARY RESTRAINING ORDER**

NOME COME Defendants who hereby requests the Court deny Plaintiff's Motion for Temporary Restraining order for the reasons set forth in the brief.

Introduction:

On May 28, 2020 Plaintiffs filed the instant Motion for Temporary Restraining Order against Defendants. In order to grant a TRO, the Court must consider (1) whether the movant has a strong likelihood of success on the merits, (2) whether the movant would suffer irreparable injury absent a stay, (3) whether granting the stay would cause substantial harm to others, and (4) whether the public interest would be served by granting the stay. *Ohio Republic Party v Brunner*, 543 F3d 357, 361 (6th Cir. 2008). A party seeking injunctive relief must meet all four requirements. *Jordan v. Fisher*, 823 F.3d 805, 809 (5th Cir. 2016) (quoting *Bluefield Water Ass'n v. City of Starkville*, 577 F.3d 250, 253 (5th Cir. 2009)).

While its clear COVID-19 presents a risk of harm, the question for this Court is whether the constitution requires the Defendants to do more than what they had already done to mitigate

the risk of harm.¹ Plaintiffs fail to present convincing evidence that the Defendants response is not enough and that Defendants subjectively believed their actions were inadequate.² Nothing could be further from the truth. Wayne County has taken several specific successful actions to reduce the spread of COVID-19.

No solution is perfect. The law only requires that the Sheriff and all its partners do a reasonable job in trying to maintain security for the residents of the county and appropriate constitutional health care for the inmates. The issue is not whether the health care is perfect. The issue before this court is whether the delivery of health care (within the jail) and the security of inmates is so bad that it amounts to a violation of the 8th Amendment as cruel and unusual punishment. As always, this Court must apply a balancing test: the constitutional rights of the inmate's versus a secure society and the upholding of the rule law. Underlying all of this is the fact that an inmate was adjudicated by a court as a pre-trial detainee or convicted and a duly elected judge set bail or an appropriate sentence. Plaintiffs' counsel is trying to apply a one answer fits all solution and their solution is release all inmates. There is no evidence the released inmate is any safer outside the jail or that the released inmate will engage in social distancing and wear a mask. The narrative established by Plaintiffs is not a proper balancing of the community interests, the rule of law and the safety of the inmate. There is no evidence the County or its partners were deliberately indifferent to any of the needs of the inmates. There is no likelihood that Plaintiff's will be successful.

¹ *Sanchez v. Brown*, No. 3:20-cv-00832-E, 2020 U.S. Dist. LEXIS 90667 (N.D. Tex. May 22, 2020) at *51.

² *Id.* at *51-*52; referring to [Marlowe v. LeBlanc](#), No. 20-30276, 2020 U.S. App. LEXIS 14063, 2020 WL 2043425, at *2 (5th Cir. April 27, 2020).

For the reasons set forth herein, Plaintiffs are unable to show a likelihood of success on their constitutional claims against Defendants, as there is simply no evidence that Wayne County has demonstrated any deliberate indifference in its response to the novel coronavirus pandemic.

I. Factual Statement

Since the coronavirus reached Michigan in early March much has changed at the Wayne County Jail and the surrounding region. As of June 1, 2020, the population of the Wayne County Jail was reduced by 40% as one measure to combat the spread of the COVID-19. The inmates that remain incarcerated were refused release based a number of judicial factors that this Court, in collaboration with the Wayne County Prosecutor and Inmate Counsel reviewed and applied. The number of hospitalizations in the region are down 83 percent from their peak in early April and continue to fall. Makeshift hospitals were built to accept the anticipated onslaught of patients, yet the are now closed after only treating 40 patients. Unfortunately, many of Plaintiff's complaints and declarations address issues pre-pandemic and prior to the decisions made by the County. Most of the items addressed are moot.

Since early March, under the auspice the Consent Order as overseen by this Court, Wayne County officials engaged in extensive efforts to reduce the jail population and implemented many measures to mitigate the spread of COVID-19. Plaintiffs, through their court appointed Counsel, attended no less than four (4) meetings with County officials and the Court between March 13, 2020 and April 29, 2020 to discuss the measures that were being taken and implemented by Defendants to address the pandemic. At no time did Plaintiffs raise any concerns that rise to the level for which they proclaim in their TRO request.

It wasn't until May 4, 2020, that Plaintiffs, seemingly unaware that they were already part of a class subject to a Consent Order regarding conditions of confinement, through new and

mostly out-of-state counsel, brought a purported class action in the United States District Court seeking injunctive relief regarding the Wayne County Jail's response to the coronavirus pandemic.³ Plaintiffs filed this Motion on May 28th requesting this Court to enter a temporary restraining order against the Defendants, requiring the Defendants to: immediately undertake certain measures to improve the hygiene and safety and reduce the risk of severe illness and death from COVID-19 at the Jail, reduce the jail detainee population to an level where detainees and Jail staff can practice social distancing, immediately stop housing inmates at Division II, and for this Court to appoint an independent monitor to ensure compliance with any injunctive order that this Court may enter relating to the conditions of confinement at the Wayne County Jail during the pendency of the COVID-19 pandemic.

Plaintiffs, however, fail to recognize that prior to this TRO motion, Defendants and court appointed Inmate Counsel were taking action under the supervision of this Court to address the novel health crisis currently facing the world without the intervention or the additional burden of a TRO Petition and the ensuing trial. The current petition is more about attorney fees than it is the health of the inmates.

After the Plaintiffs filed their action in *Russell*, despite the measures already undertaken, the parties negotiated and agreed to a Stipulated Temporary Amendment of the existing Consent Order, (*Exhibit 1*), which encompasses many of the measures currently being requested by Plaintiffs. The measures agreed upon by the parties to prevent the spread of COVID-19 are as follows:

1. Plaintiffs seek an inspection of all Jail facilities on or before May 18, 2020 by an inspector, to be selected by Judge Kenny at no cost to Defendants. Both parties may submit two proposed candidates for selection of the inspector. If the

³ *Russell, et. al v Wayne County, et. al.* Case No. 2:20-cv-11094 (E.D. Mich. May 4, 2020)

inspector selected is upon the recommendation of Defendants and requires the payment of a fee, Defendants will cover the cost. The inspection will be limited to the COVID-19 pandemic response, as enumerated in the conditions agreed upon herein. Defendants will not object to Plaintiffs' request for an inspection of the Jail facilities. This inspection was carried out by Dr. Rottnek on May 16, 2020.

2. Ensure that each incarcerated person receives, free of charge and upon request: (a) a supply of soap and hand towels sufficient to allow regular hand washing and drying each day, and (b) an adequate supply of disinfectant products⁴ effective against the COVID-19 virus.
3. Provide access to showers on a daily basis.
4. Ensure that, to the fullest extent possible, all Jail staff wear personal protective equipment, including masks and gloves.
5. Ensure that, to the fullest extent possible, all Jail staff wash their hands with soap and water or use hand sanitizer containing at least 60% alcohol both before and after touching any person or any surface in cells or common areas.
6. Continue to implement protocols through which medical attention is provided, on a timely basis, to any incarcerated person that reports a need for medical attention for any COVID-19 related symptoms to any member of the Jail staff.
7. Per protocol, continue to make COVID-19 testing available to all incarcerated persons either (a) displaying known symptoms of COVID-19 or (b) who have been in known proximity of other persons, within the last 14 days, who have tested positive for COVID-19;

⁴ Disinfectant products must meet EPA's criteria for use against SARS-CoV-2, the virus that causes COVID-19. *See List N: Disinfectants for Use Against SARS-CoV-2*, EPA.gov, <https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2> (last visited May 7, 2020). The jail uses product called Simple Green d Pro 3 Plus

8. Provide adequate spacing between people incarcerated so that social distancing, as defined by the CDC, can be accomplished to the extent possible.
9. Ensure that individuals identified as having COVID- 19, as having symptoms of COVID-19, or as having been exposed to COVID-19 receive adequate medical care and are properly quarantined in a designated quarantine area, with continued access to showers, mental health services, reading materials, phone and video calling with loved ones, communications with counsel, and personal property (to the extent reasonable to the inmate's physical and mental well-being). Such individuals shall remain in quarantine and be strongly encouraged to wear face masks when interacting with other individuals until they are no longer at risk of infecting other people.
10. Provide sufficient disinfecting supplies,⁵ without cost, so incarcerated people can clean high-touch areas or items (including, but not limited to, telephones and headphones) between each use.
11. Effectively communicate to all people incarcerated, including low-literacy and non-English-speaking people, sufficient information about COVID-19, measures taken to reduce the risk of transmission, and any changes in policies or practices to reasonably ensure that individuals are able to take precautions to prevent infection;
12. Train all staff regarding measures to identify symptoms of COVID-19 in inmates, measures to reduce transmission, and the Jail's policies and procedures during this crisis (including those measures contained in this Order).
13. Refrain from charging medical co-pays to those experiencing COVID-19-related symptoms, including testing; and
14. Ensure that retaliatory discipline is not taken solely in response to (a) incarcerated persons' requests for medical attention and basic, necessary protections, and/or (b)

⁵ Disinfectants must meet EPA's requirements for use against SARS CoV-2. *See supra* note 2.

efforts by incarcerated persons to publicize unsafe and life-threatening conditions inside the Jail.

Thus, if Plaintiffs' feels that the Defendants are not abiding by the Stipulation to the Consent Order, then a TRO would not be the proper forum for these disputes, a Show Cause Hearing would be the proper venue to enforce these agreed upon actions.

A. What Wayne County officials have done to mitigate the spread of COVID-19 at the jail

The WCJ began its efforts to prevent and fight against the spread of COVID-19 in compliance with CDC recommendations and as a part of its own independent policies long before this current litigation. These discussions quickly turned into action.

i. Policies and Directives

At the onset, WCJ began issuing policies and directives to address the pandemic. Below are the various **policies and directives** implemented by the WCJ in response to the COVID-19 pandemic: (*Exhibit 2*)

- Directive COJAC 20-04 signed **March 13, 2020**, outlines officer guidelines per CDC for identification and handling COVID19. The directive included measures regarding transportation inmates, isolating new inmates, social distancing, and prevention.
- Directive COJAC 20-05 signed **March 20, 2020**. Requires all persons entering the building Temperature screening & health assessment. The screening and assessment process consisted of forehead temperature scans along with visual observation and a brief questionnaire. Any person coughing, sneezing, experiencing shortness of breath, or other obvious signs of illness shall also be denied entry.
- Directive COJAC 20-06 signed **March 21, 2020**, revised the prior directive requiring temperature screening. and health screening per CDC recommendations.
- **March 24, 2020** Biweekly distribution of N95 masks to all members of the staff.

- Directive COJAC 20-07 signed **March 27, 2020**. All new book inmates entering the Jail facilities will be screened and assessed for signs and symptoms and quarantined for a minimum of 72.
- Directive COJAC 20-08 signed **March 31, 2020**. Requires PPE for Officers assigned Hospital Detail Security. Along with proper donning and doffing of respirator diagram.
- Directive COJAC-20-09, **Signed April 1, 2020**, Risk reductions protocols and procedures to eliminate the exposure and spread of COVID-19 regarding; Screening, Visits, Inmate transports, Quarantine, Protective equipment, Cleaning-sanitation, Hygiene, Laundry, Signage educating all importance of (social distancing, handwashing and personal hygiene) and Social Distancing.
- Reusable face shields given to officers, **April 1, 2020**.
- Directive COJAC 20-03 Requirement that inmates wear surgical masks when they are outside of their cells. Dated **April 10, 2020**. Inmates are issued a new surgical mask every two weeks.
- **April 10, 2020**, Inmate Face Mask officer signature sheets.
- **April 12, 2020**, all inmate activity restricted to the assigned housing unit. Inmates not allowed of their unit for any non-critical function.
- General Memo U/S 20-07 WCSO duty to get tested and report COVID 19 **April 20, 2020**.
- General Order U/S 20-08 was signed on April 23, 2020. **Requires all personnel to wear masks.**

In addition, Wellpath, Defendants' contracted medical provider enacted several measures to address the pandemic: (*Exhibit 3*)

- Procedure for suspected coronavirus was issued on **March 2, 2020**;
- Isolation and Cohort Guidance for COVID protocols were issued on March 17, 2020
- A patient testing strategy was implemented and updated;
- Off-site Guidance During COVID-19 procedures were issued;
- Guidance for CPR procedures during COVID were issued;
- COVID-19 Provider's Order and treatment plan were instituted;

ii. Administrative releases

Along with releasing the nonviolent and traffic inmates, administrative releases began at the direction of this Court in early March. Since March 19, at least 235 have been administratively released. (*Exhibit 4*) The process included representatives from the prosecutor's office, the sheriff's office, the jail's medical staff and court appointed inmate counsel in the class-action suit. The medical staff identified the inmates at greater risk for the coronavirus pursuant to the CDC guidelines, the sheriff's office pared down that list excluding those accused of assaultive crimes, felonies and some high misdemeanors, and making recommendations on which inmates should be released on tether rather than held in jail.

Additionally, other measures have been taken for the overall reduction of the inmate population in the WCJ. On March 13, 2020, the total inmate population of the Jail was 1,390 inmates. Currently, that population is around 800 inmates, with the lowest inmate population occurring on May 14, 2020 of 783 inmates. (*Exhibit 4*)

iii. MDOC Inspection

On Tuesday, May 12, 2020, the MDOC conducted an inspection of the Wayne County Jail as provided for by Act. No. 232 of the Public Acts of 1953, as amended, being section 791.262 of the Michigan Compiled Laws and the Governor's Executive Order 20020-62. (*Exhibit 5*) On the date of inspection, the Wayne County Jail was found to be in compliance with the MDOC COVID-19 Protocols.

iv. Testing has been conducted

The entire inmate population has been provided access to COVID-19 testing. As of today, 85 inmates have tested positive for COVID-19 at the jail with a total population averaging 800. There have been zero inmates on ventilators, zero inmates admitted to an ICU, and

importantly, zero deaths. (*Exhibit 6*) Currently, only 14 inmates who have tested positive that remain in the jail. The rest of the inmates who tested positive have been cleared as no longer being COVID positive.

When compared to the many other Jails, there is no indication that WCJ numbers are anything out of the norm.

Jail Name & Location	Total Population	Total Infections	Infection Rate (infected/total population)
Wayne County - Detroit, MI	March 10 - 1,381, As of April 10, 917	29 on May 8, 171 alleged in the Complaint	3.16% for May 8 numbers, Approx. 24.43% according to numbers alleged in Complaint
Cook County - Chicago, IL	4,567 total male and female as of 4/6/2020	700 inmates at it's worst	15.33% "at it's worst", now a positive test rate of below 10% after significant testing and measures taken
Los Angeles County - LA, CA	12,064 as of 5/28/2020	1,209 since start of pandemic	Approximately 10%
Rikers - New York, NY	3992 amid the pandemic, 5600 before COVID	348 currently infected as of 5/26/2020	Approximately 8.71% currently, 15.06% presumed "likely exposed but asymptomatic"
Harris County - Houston, TX	Hovers around 7,600	593 as of May 6, 2020	7.80% as of May 6th
Cuyahoga County - Cleveland, OH	1,331, lowest population in facility history due to COVID	145 positive results	10.89%
Johnson County - Franklin Indiana (Indianapolis metro)	292 inmates	127 as of 5/14	43.49%
Milwaukee County - Milwaukee, WI	Approximately 600 as of 5/1	94 as of 5/1	15.67%
Dane County - Madison, WI	746 on 3/10, low 400s as of 5/15	37 since beginning of pandemic	9.25%
Philadelphia County - PA	3,725 at the end of April 2020	200 to date as of 5/19	5.37%
D.C. County Jail - Washington D.C.	1300 as of 5/23	185 positive from 3/14 to 5/14	14.23%

v. Testing all new inmates

On June 1, 2020, an Order was entered requiring all new inmates entering the Wayne County Jail on or after June 8th, 2020 to be tested for COVID-19. All inmates who test negative shall be re-tested in 14 days from their booking. The Order further indicates that all inmates who test negative for PCR, but positive for Serology at the time of booking may be housed in general population. Lastly the Order requires that the data from the testing be supplied to the attorneys representing the inmates in the class-action suit. (*Exhibit 7*)

II. CDC Recommendations

On March 23, 2020, the Center for Disease Control (“CDC”) issued “Interim Guidance on Management of Coronavirus Disease 2019 (COVID-19) in Correction and Detention Centers.” (*Exhibit 8*) CDC “Prevention” guidelines are intended to assist facilities in preventing the spread of the virus from outside the facility to inside the facility. CDC “Management” guidelines are intended to assist facilities in clinically managing confirmed and suspected COVID-19 cases inside the facility. The WCJ had already implemented all feasible CDC recommendations relating to inmate safety long before the subject suit.

The CDC interim guidance was based on what was known about the transmission and severity of COVID-19 as of the date of posting, March 23, 2020. The CDC guidelines are merely guidelines. They, like all guidelines, are a platform and or framework from which one may choose to review and or utilize, and most importantly to adapt as suited to one’s own clinical areas in corrections. FBOP also issued guidelines for correctional settings in wake of the Swine

Flu pandemic of 2012 which remain relevant today, thus the CDC are 8 years behind the first correctional pandemic guidelines.

Second, these are brand new guidelines, only becoming posted on March 23, 2020. Pandemic response to COVID in a correctional setting (or a planetary one) is not a fixed science. There is no one-way method of handling a pandemic of this type in any and all unique jail settings. While Plaintiffs experts have offered opinions on how the WCJ should react to the present pandemic, this pandemic presents unique circumstances which this Court should take into account despite the Plaintiff's expert's opinions.

Third, the CDC guidelines themselves gift wrap a disclaimer from the very beginning, that they are intended to be used and adapted as suited to one's own setting. In fact, WCJ was adapting to the situation long before the CDC gave out guidelines, and then when they did, WCJ went and adapted the recommendations to fit the setting.

While, plaintiff's experts quote CDC guidelines early and often, they have cherry picked the sections that suit their argument without context or completeness. Lastly, it must be noted that nowhere in the CDC guidelines does the CDC list "release the prisoners" as a recommendation.

III. Plaintiffs Are Not Entitled to a Temporary Restraining Order because Plaintiffs Cannot Show Likelihood of Success on their *Monell* Claims

In order to grant a TRO, the Court must consider (1) whether the movant has a strong likelihood of success on the merits, (2) whether the movant would suffer irreparable injury absent a stay, (3) whether granting the stay would cause substantial harm to others, and (4) whether the public interest would be served by granting the stay. *Ohio Republic Party v Brunner*, 543 F3d 357, 361 (6th Cir. 2008). The party seeking injunctive relief must meet all four

requirements. *Jordan v. Fisher*, 823 F.3d 805, 809 (5th Cir. 2016) (quoting *Bluefield Water Ass'n v. City of Starkville*, 577 F.3d 250, 253 (5th Cir. 2009)).

In order to obtain their TRO, Plaintiffs must first show a strong likelihood of success with regard to their *Monell* claim against Wayne County. Here, Plaintiffs cannot show any deliberate indifference by Wayne County in its response to the coronavirus pandemic. Furthermore, Plaintiffs cannot establish that they have exhausted their administrative remedies, as required by the Prisoner Litigation Rights Act and MCL 600.5501.

A. Plaintiffs cannot Establish a Deliberate Indifference Claim

To state a claim of deliberate indifference against Wayne County, a plaintiffs must plead a claim of a policy, practice, or custom by Wayne County that is allegedly unconstitutional, and that explanation must be specific, *i.e.*, "to satisfy the *Monell* requirements a plaintiff must 'identify the policy, connect the policy to the city itself and show that the particular injury was incurred because of the execution of that policy.'" *Garner v. Memphis Police Dep't*, 8 F.3d 358, 364 (6th Cir. 1993) (quoting *Coogan v. City of Wixom*, 820 F.2d 170, 176 (6th Cir. 1987)), cert. denied, U.S., 114 S. Ct. 1219, 127 L.Ed.2d 565 (1994) (Emphasis added). *See also*, *Searcy v. City of Dayton*, 38 F.3d 282, 287 (6th Cir. 1994). Wayne County cannot be held liable under the theory of *respondeat superior*. *Monell v. Department of Social Servs.*, 436 U.S. 658, 663 (1978); *Dunn v. State of Tenn.*, 697 F.2d 121, 128 (1983); *Street v. Corrections Corporation of America*, 102 F.3d 810, 817-818 (6th Cir. 1996). Plaintiff is required to identify and connect the allegedly unconstitutional policy to Wayne County and demonstrate a pattern. *Connick v. Thompson*, 131 S. Ct. 1350 (2011); *Thomas v. City of Chattanooga*, 398 F.3d 426, 432-433 (6th Cir. 2005).

Where a plaintiff proceeds on a theory that factually lawful government policy lead an employee to violate plaintiff's constitutional rights, a plaintiff must plead and prove that the agency

was not just negligent but acted with deliberate indifference to known or obvious consequences. *City of Canton v. Harris, supra*. Deliberate indifference is shown only where the municipal policy is constitutionally arbitrary such that it is egregious to the point of “shocking the conscience”. *County of Sacramento v. Lewis*, 523 U.S. 833; 118 S.Ct. 1708; 140 L.Ed.2d 1043 (1998) quoting *Collins v. Harker Heights, supra*. To be deliberately indifferent, the cited policy must be so “patently egregious” as to “shock the conscience”. Whether written policy, or de facto practice, the standard of what is deliberately indifferent is very high. “Deliberate indifference” sufficient to support a §1983 action against a municipality is a stringent standard requiring proof that the government entity disregarded a “known or obvious risk.” *Hullett v. Smiedendorf*, 52 F Supp 2d 817 (WD Mich 1999); *Patterson v City of Cleveland*, 173 F3d 429 (6th Cir 1999).

Here, Plaintiff’s Complaint lacks any *Monell* allegations that would succeed as a matter of law. Plaintiffs’ deliberate indifference claim against Wayne County fails because Plaintiffs have failed to support those allegations with any specific facts whatsoever regarding exactly what the alleged unconstitutional policy, practice, procedure, or protocol was, let alone facts sufficient connect the policy to Wayne County or demonstrate a pattern. *Connick v. Thompson* at 1350 (2011); *Thomas v. City of Chattanooga*, at 432-433.

The situation Wayne County is presently faced with is by all accounts “novel.” It is a situation that has never confronted municipalities such as Wayne County and is truly uncharted territory. There is no prior case law or other authority other than recently enacted CDC recommendations which provide guidance to municipalities with respect to the operation of their jails during such a crisis. Because neither Oakland County, nor any other municipality, has ever faced an epidemic such as the current COVID-19 pandemic, Plaintiffs cannot show that Wayne County maintains an unconstitutional policy or practice with respect to same.

Plaintiffs seek to impose liability on Wayne County simply through anecdotal “evidence” in the form of declarations submitted by Plaintiffs regarding the conditions of the jail and Experts declarations based on the inmates’ declarations signed back in March and April. Plaintiffs’ reliance on the past conditions of the jail and disregard of the reduced jail population and the many measures to mitigate the spread of COVID-19 at the jail are fatal with respect to any *Monell* claim asserted and thus there is no likelihood of success on the merits.

The United States Supreme Court has held, “the treatment a prisoner receives in prison and the conditions under which he is confined are subject to scrutiny under the Eighth Amendment.” *Helling v McKinney*, 509 US 25, 31; 113 S Ct 2475 (1993). In regard to an inmate’s conditions of confinement, the Supreme Court noted that jail conditions may be “restrictive and even harsh.” *Rhodes v Chapman*, 452 US 337, 347; 101 S Ct 2392 (1981). “The Constitution does not mandate comfortable prisons.” *Id.* at 349. It is well settled that pursuant to the Eighth Amendment of the United States Constitution, a prison official must “take reasonable measures to guarantee the safety of the inmates.” *Hudson v Palmer*, 468 US 517, 526-527; 104 S Ct 3194 (1984).

In a deliberate indifference claim challenging the conditions of a prisoner’s confinement, the plaintiff must satisfy both the objective and subjective components of the Eighth Amendment inquiry. *See Farmer v. Brennan*, 511 U.S. at 846. The same requirements apply to a pre-trial detainee’s due process rights under the Fourteenth Amendment. *See Richko v. Wayne Cty., Mich.*, 819 F.3d 907, 915 (6th Cir. 2016) (citation omitted) (“Supreme Court precedents governing prisoners’ Eighth Amendment rights also govern the Fourteenth Amendment rights of pretrial detainees.”). “To satisfy the objective component, the plaintiff must allege that the medical need at issue is ‘sufficiently serious.’” *Comstock*, 273 F.3d at 702 (citing *Farmer*, 511

U.S. at 834). “To satisfy the subjective component, the plaintiff must . . . show that the official being sued subjectively perceived facts from which to infer substantial risk to the prisoner, that he did in fact draw the inference, and then disregarded that risk.” *Id.* at 703 (citing *Farmer*, 511 U.S. at 837). The defendant must have a subjective “state of mind more blameworthy than negligence,” akin to criminal recklessness. *Farmer*, 511 U.S. at 835, 839–40.

With respect to the inmates, the Plaintiffs cannot show that Defendants have been constitutionally arbitrary such that it is egregious to the point of “shocking the conscience” and thus are unable to show a strong likelihood of success on the merits of their Eighth and Fourteenth Amendment claims because the overwhelming evidence establishes Defendants previously put into place nearly all of Plaintiffs’ requests at the jail.

Specifically, 235 inmates have been released by this Court, via the administrative policy. Moreover, jail inmate population has been reduced by 600 inmates (1400 - 800) from March 17 through May 27. As of May 27, WCJ was at 60% of its total capacity. No inmates have been admitted to a hospital due to COVID-19 related symptoms and no inmates have died as a result of COVID-19. Most importantly, the measures taken by WCJ long before the first confirmed COVID-19 case in the jail and long before Plaintiffs’ filed the instant action, establish they have not “turned the kind of blind eye and deaf ear to a known problem that would indicate total unconcern for the inmates’ welfare.” *Id.*

Again, Defendants emphasize the parties have agreed to a stipulation to modify the consent order governing the Jail that addresses the vast majority of Plaintiffs’ requests in the TRO. The TRO should not be granted be in light of this stipulation and the efforts made by the Defendants addressed below and the unlikelihood of them winning on their *Monell* Claims.

1. Communication Regarding COVID-19

This component of the requested TRO was previously addressed and resolved by the stipulation to the Court Order, wherein Defendants agreed to effectively communicate to all people incarcerated, including low-literacy and non-English-speaking people, sufficient information about COVID-19, measures taken to reduce the risk of transmission, and any changes in policies or practices to reasonably ensure that individuals are able to take precautions to prevent infection. Communication including written postings consistent with CDC recommendations have been posted and/or distributed throughout the Jail. (*Exhibit 9*). Plaintiffs cannot demonstrate criminal recklessness or an intent to punish. *Miller, Farmer, supra*.

2. Adequate Spacing

This component of the requested TRO was also previously addressed and resolved by the stipulation to the Court Order, wherein Defendants agreed to provide adequate spacing between people incarcerated so that social distancing, as defined by the CDC, can be accomplished to the extent possible. It should be noted that the CDC guidelines expressly recognize the impracticality of providing six (6) feet of spacing for social distancing in jails. (Exhibit) And, recognizing the guidelines provide that the six (6) foot spacing strategy has to “...be tailored to the individual space in the facility...” (*Exhibit 8*) The WCJ has implemented several CDC strategies to reduce COVID-19 transmission by both reducing overall jail occupancy as well as reducing the number of inmates in group cells.

Plaintiffs further request that Defendants immediately stop housing inmates in Division II based on Dr. Rottnek’s recommendation. First and foremost, as this Court is aware, discussions to cease the use of Division II have been on-going among County officials for several months, well before the current health crisis. Dr. Rottnek’s recommendation in this regard far exceeds

the scope of the Inspection Order. Furthermore, and most importantly, ceasing to house inmates at Division II amidst this pandemic would only create for greater difficult in spacing of inmates.

3. Liquid Hand Soap

Per the stipulation to the consent order each incarcerated person receives, free of charge and upon request: (a) a supply of soap and hand towels sufficient to allow regular hand washing and drying each day, and (b) an adequate supply of disinfectant products⁶ effective against the COVID-19 virus. Plaintiffs have not and cannot provide any authority to that agreed upon policies referenced above amount to deliberate indifference or are likely to amount to deliberate indifference. Courts have previously held inmates are not entitled to a specific type of soap. *Burke v Dep't of Correction*, 2016 WL 4120063 at *4 (M.D. Tenn August 3, 2016) report and recommendation adopted, 2016 WL 4527274 (M.D. Tenn. August 30, 2016) (holding allegations related to hygienic products including chosen type of soap do not satisfy objective prong of Eighth Amendment claim).

Further considering CDC recommendations which state that correction facilities should “provide a no-cost supply of soap to incarcerated/detained person, sufficient to allow frequent hand washing.” (*Exhibit 8*). This was done by WCJ. While the recommendations state liquid soap should be provided “where possible,” the guidelines also allow for bar soap to be used. (*Exhibit 8*). Therefore, any request for a TRO in regard to liquid soap should be denied, as it does not rise to a constitutional requirement.

⁶ Disinfectant products must meet EPA’s criteria for use against SARS-CoV-2, the virus that causes COVID-19. See *List N: Disinfectants for Use Against SARS-CoV-2*, EPA.gov, <https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>.

4. Hand Sanitizer

This issue was previously addressed by the Parties and was removed from the stipulation. Defendants do not allow for inmates to possess hand sanitizer for safety and well being considerations as hand sanitizer contains alcohol and vehemently object to same.

5. Cleaning Supplies

See subparagraph (3) above.

6. Disinfecting Supplies

This component of the requested TRO was also previously addressed and resolved by the stipulation to the Consent Order, wherein Defendants agreed to provide sufficient disinfecting supplies,⁷ without cost, so incarcerated people can clean high-touch areas or items (including, but not limited to, telephones and headphones) between each use.

7. Access to Showers/Clean Laundry

Per the stipulation to the Consent Order, Inmates are provided access to showers on a daily basis. Clean linens are further provided on a weekly basis.

8. PPE for Jail Staff

All jail personnel have been issued masks and gloves. (*Exhibit 1*). Additionally, N95 masks and face shields have been issued to correctional staff who have contact with inmates who have testified positive for COVID-19. Further, pursuant to the stipulation of the Consent Order, the Defendants have agreed to ensure that, to the fullest extent possible, all Jail staff wear personal protective equipment, including masks and gloves.

⁷ Disinfectants must meet EPA's requirements for use against SARS CoV-2. *See supra* note 2. Contrary to the Plaintiff's allegations and Dr. Rottnek's report, Defendants are using Simple Green Pro d 3 Plus, which is identified by the EPA as effective against the virus. EPA registration number 10324-154.

9. Jail Staff Hygiene Efforts

Defendants have taken steps to ensure jail personnel wash their hands with soap and water both before and after touching any person or surface in cells or common areas. (*Exhibit 1*). This includes signs posted throughout the Jail for all personnel to observe. (*Exhibit 9*). Further pursuant to the stipulation of the Consent Order, Defendants have agreed to ensure that, to the fullest extent possible, all Jail staff wash their hands with soap and water or use hand sanitizer containing at least 60% alcohol both before and after touching any person or any surface in cells or common areas

10. Take Inmates Temperature daily

Daily temperature checks are being conducted on 3 populations of inmates, inmates who are symptomatic, those who have been exposed and trustees when they go to work

11. Testing of COVID-19

As of May 26, 2020, 815 tests had been performed with only 85 inmates having tested positive for COVID-19. (Exhibit 6). Currently there are 14 patients that remain Covid positive in the jail. The rest have been cleared as no longer being Covid positive. Also starting June 8, 2020 all new inmates entering the Wayne County Jail on or after June 8th, 2020 to be tested for COVID-19. (*Exhibit 7*)

12. Quarantine of Positive Cases

There is simply no evidence to suggest that Wayne County has not been engaged in a process of quarantining positive case. Regardless, this component of the requested TRO was also addressed and resolved by the stipulation to the Consent Order, where in Defendants agreed that individuals identified as having COVID- 19, having symptoms of COVID-19, or as having been exposed to COVID-19 receive adequate medical care and are properly quarantined in a

designated quarantine area, with continued access to showers, mental health services, reading materials, phone and video calling with loved ones, communications with counsel, and personal property (to the extent reasonable to the inmate's physical and mental well-being). Such individuals shall remain in quarantine and be strongly encouraged to wear face masks when interacting with other individuals until they are no longer at risk of infecting other people. All COVID positive inmates are housed on the 4th floor of Division II or H3 of Division III.

13. Response To Emergencies within an Hour

All medical emergencies receive immediate response from jail personnel. This component of the requested TRO was also previously addressed and resolved by the stipulation to the Court Order, wherein the Defendants have agreed to Continue to implement protocols through which medical attention is provided, on a timely basis, to any incarcerated person that reports a need for medical attention for any COVID-19 related symptoms to any member of the Jail staff. Plaintiffs cannot demonstrate criminal recklessness or an intent to punish

14. Medical Co-Pays

Defendants have waived all charges related to medical co-pays related to COVID-19 related symptoms and/or treatment which includes testing of same since the onset of the pandemic.

15. Punitive Transfers/Retaliation

Defendants have never engaged in punitive transfers or threats of transfers to areas of the jail that have higher infection rates for any infraction. Any reading of the Declarations attached to Plaintiffs TRO establishes that Plaintiffs clearly view quarantining as a punitive transfer. The Declarations expressly refer to inmates not wanting to complain of being sick for fear of being quarantined. (*See TRO Ex. 12*)

Notwithstanding, this component of the requested TRO was also previously addressed and resolved by the stipulation to the Court Order, where in Defendants agreed to m Ensure that no retaliatory discipline is not taken solely in response to (a) incarcerated persons' requests for medical attention and basic, necessary protections, and/or (b) efforts by incarcerated persons to publicize unsafe and life-threatening conditions inside the Jail

16. Appointment of independent monitor to ensure Compliance.

Under the terms and perimeters of the Consolidated Consent Order, this Court serves as the monitor of the WCJ and the conditions of confinement therein. Since the inception of the pandemic in Michigan, as soon as March 13, swift action has been taken to schedule meetings with all parties and confer with everyone involved regarding the measures being taken regarding the care of the inmates, specifically in response to the pandemic. Furthermore, medically vulnerable inmates have been reviewed and released in a collaborative process, which include inmate Counsel. Plaintiffs simply cannot demonstrate a need for an independent Monitor at this time.

B. Plaintiffs Failure To Exhaust Administrative Remedies Precludes their Claims

Plaintiffs cannot demonstrate a likelihood of success on the merits because their constitutional claims are barred because they did not pursue administrative remedies as required by the PLRA⁸.

⁸ Civil actions concerning prison conditions are governed by MCL 600.5501 *et seq*, the Michigan Prisoner Litigation Reform Act ("PRLA"). The statute states in relevant part:

A prisoner shall not file an action concerning prison conditions until the prisoner has exhausted *all* available administrative remedies. MCL 600.5503 (emphasis added)

An action concerning prison conditions is defined as "any civil proceeding seeking damages or equitable relief arising with respect to any conditions of confinement or the effects of an act or

The *Prison Litigation Reform Act of 1995* (PLRA) provides: “No action shall be brought with respect to prison conditions under section 1983 ... by a prisoner confined in any jail, prison, or other correctional facility until such administrative remedies as are available are exhausted.” 42 U.S.C. § 1997e(a). This exhaustion requirement is mandatory and applies to all suits regarding prison conditions, regardless of the nature of the wrong or the type of relief sought. *Porter v. Nussle*, 534 U.S. 516, 524 (2002); *Booth v. Churner*, 532 U.S. 731, 741 (2001). “Exhaustion” under the PLRA means “proper exhaustion.” *Woodford v. Ngo*, 548 U.S. 81, 93 (2006). “Proper exhaustion” means “compliance with an agency's deadlines and other critical procedural rules” *Id.* at 90. The United States Supreme Court has held that “failure to exhaust is an affirmative defense under the PLRA, and ... inmates are not required to specially plead or demonstrate exhaustion in their complaints.” *Jones v. Bock*, 549 U.S. 199, 216 (2007). Since the *Jones v. Bock* decision, the Sixth Circuit has stated that courts should not impose severe technical requirements on prisoners who comply with the spirit and purpose of the administrative exhaustion rules.

[I]t is sufficient for a court to find that a prisoner's [grievance] gave prison officials fair notice of the alleged mistreatment or misconduct that forms the basis of the constitutional or statutory claim made against a defendant in a prisoner's complaint. *Bell v. Konteh*, 450 F.3d 651, 654 (6th Cir.2006)

“Proper exhaustion demands compliance with an agency's deadlines and other critical procedural rules because no adjudicative system can function effectively without imposing some orderly structure on the course of its proceedings.” *Ngo*, 126 S.Ct. at 2386. As observed in *Jones*, the primary purpose of a grievance is to alert prison officials of a particular problem. *Jones*, 127

admission of government officials, employees, or agents in the performance of their duties MCL 600.5531(a). Actions in which alleged intentional tortuous behavior and actions that are considered to be in the performance of duties are at issue are subject to the PRLA. *Anderson v Myers*, 268 Mich.App. 713; 709 N.W.2d 171, at 173 (2005).

S.Ct. at 923; see also *Bell v. Konteh*, 450 F.3d 651, 651 (6th Cir.2006) (“[I]t is sufficient for a court to find that a prisoner's [grievance] gave prison officials fair notice of the alleged mistreatment or misconduct that forms the basis of the constitutional or statutory claim made against a defendant in a prisoner's complaint.”).

In this matter, in order to maintain the current lawsuit, Plaintiffs must show that the exhausted all available administrative remedies. All inmates of Wayne County Jail receive a copy of the handbook “Inmate Rules & Regulations,” which contains the policy regarding inmate grievances. (**Exhibit 10**).

Here Plaintiffs failure to file grievances concerning conditions of confinement defeats the primary purpose of the PLRA, which is to alert prison or jail officials of a particular problem so that they may have an opportunity to remedy the situation. Because this was not done, Plaintiffs cannot prevail on the constitutional claims for failing to exhaust administrative remedies. *PLRA*, 42 U.S.C. § 1997e(a).

IV. Conclusion

Plaintiffs have not made a showing they are likely to succeed on the merits of their *Monell* claim and consequently there is no basis for a TRO. *Thomas, supra*. None of the above evidence tends to show that Defendants subjectively believed the measures they were taking were inadequate. Plaintiffs have failed to present any evidence from which to establish that Defendants have been deliberately indifferent to the care of the inmates in response to the current health care crisis.

While the proof supports a finding that the measures may have been ineffective in completely eradicating the risk of Covid-19 in the jail, there are no measures currently available that will do that for *any* facility, prison or otherwise. This reality is not sufficient to find that

Plaintiffs are likely to succeed on their deliberate indifference claims, because the evidence does not show that Defendants acted with the level of indifference akin to criminal recklessness.

There is no evidence of Defendants' culpable mental state, and this lack of evidence renders it unlikely that Plaintiffs will prevail on their deliberate indifference claim. *See Rhinehart v. Scutt*, 894 F.3d 721, 738 (6th Cir. 2018) (citing *Farmer*, 511 U.S. at 844) ("A[n] [official] is not liable under the Eighth Amendment if he or she provides reasonable treatment, even if the outcome of the treatment is insufficient or even harmful."); *Swain*, No. 20-11622-C, 2020 WL 2161317, at *3 (reversing a finding of deliberate indifference because "the district court cited no evidence to establish that the defendants subjectively believed the measures they were taking were inadequate"); *Valentine*, 956 F.3d at 802 ("[T]reating inadequate measures as dispositive of the Defendants' mental state . . . resembles the standard for civil negligence, which *Farmer* explicitly rejected.").

The plaintiffs cannot present convincing evidence that Defendant's response was not adequate enough. Defendant's lengthy list of actions taken to protect the and furthermore the subjective evidence required by a deliberate indifference claims that show that Defendants subjectively believed their actions are inadequate.⁹

In contrast to the absence of evidence showing subjective deliberate indifference, there is substantial evidence that the WCJ has implemented several important measures to combat COVID-19. This evidence belies the notion that Defendants acted in a criminally reckless manner. *See Rhinehart*, 894 F.3d at 738.

⁹ *Id.* at *51-*52; referring to [Marlowe v. LeBlanc](#), No. 20-30276, 2020 U.S. App. LEXIS 14063, 2020 WL 2043425, at *2 (5th Cir. April 27, 2020).

V. Relief Requested

WHEREFORE, Defendants respectfully request that this Honorable Court Deny Plaintiffs Motion for Temporary Restraining Order and Plaintiffs' request for an evidentiary hearing as they fail to make any showing of success of the merits, as more specifically set forth above.

Respectfully submitted,

WAYNE COUNTY CORPORATION COUNSEL

EXHIBIT LIST

1. Declaration of Nayeon Kim
2. Jail Population Report
3. Sworn Declarations
4. Affidavit of Adam Luring

DECLARATION OF NAYEON KIM

I, Nayeon Kim, declare:

1. My name is Nayeon Kim. I am a legal intern at the Advancement Project National Office.
I am supporting counsel for Plaintiffs in Case No. 71 173 217 CZ, *Wayne County Jail Inmates et al., v. William Lucas et al.*
2. I created Exhibit A: “Wayne County COVID-19 Tracker Positive Type” (“Positive Type”) and Exhibit B: “Wayne County COVID-19 Tracker Total Positives” (“Total Positives”). These spreadsheets display the individuals at Wayne County Jail who tested positive for COVID-19 based on the information in Exhibit C “Covid-19 Results” and Exhibit D “Inmate Tracking 5.28.2020.” The information in Exhibit D contains a tab entitled “New View” which I will reference to follow.
3. In Exhibit A, I organized the individuals who tested positive into categories by test type, according to the information in Exhibit C. Individuals who were at Wayne County Jail for more than 21 days before testing positive are highlighted yellow, which I calculated according to the booking information detailed in Exhibit D.
4. In Exhibit A, the category “Antibody Only Test” shows individuals who tested positive from the antibody test, also known as “COVID SARS-COV-2 IGG,” according to the information provided in Exhibit C. This category shows that 104 of the 116 individuals in this category were at Wayne County Jail for more than 21 days before they tested positive for COVID-19. 12 of the 116 individuals were at Wayne County Jail 21 days or less before they tested positive. This category additionally shows that 90 of the 116 individuals in this category were admitted into the Wayne County Jail before the first

COVID-19 case was reported in Michigan on March 10, 2020. 26 of the 116 individuals were admitted into the Wayne County Jail on or after March 10, 2020.

5. In Exhibit A, the category “Virus Only or Both Virus + Antibody Tests” shows individuals who tested positive from the virus test, also known as “SARS COV 2 RNA, RT PCR,” or both virus and antibody tests, according to the information provided in Exhibit C. This category is organized to show the date which individuals tested positive, whether from the virus test or both virus and antibody tests. This category shows that 56 of the 58 individuals in this category were at the Wayne County Jail for more than 21 days before they tested positive for COVID-19, according to the booking information detailed in Exhibit D.
6. In Exhibit A, the category “Test Type Unknown” lists individuals who were listed on “New View” but not on “Covid-19 Results.” This category shows that 9 of the 12 individuals in this category were at the Wayne County Jail for more than 21 days before testing positive for COVID-19.
7. Based on the information in Exhibit A, I calculated that 169 of the 186 individuals in this spreadsheet were at the jail for more than 21 days before testing positive for COVID-19, including individuals who have since been released.
8. Exhibit B organizes and displays more detailed information for the individuals who have tested positive, based on the information contained in Exhibit C and Exhibit D, including: facility, housing unit, date admitted, date tested, the number of days between admitted and tested, and dates of release for those respective individuals. Individuals who were at Wayne County Jail for more than 21 days before testing positive are highlighted yellow, according to the booking information detailed in Exhibit D.

I declare under penalty of perjury that the foregoing is true and correct to my own knowledge.

DATED: June 7, 2020
Ashland, Oregon

Total people tested
positive in jail who
Breakdown: were there for more
than 21 days: 169
(yellow)

Note that the 169/186 people who tested positive on this list are approximate, because the spreadsheets did not always provide complete or consistent information, multiple people have been released, etc. (see side notes)

Notes (if not released)

*Last updated: June 6, 2020

*Admission info
unavailable: not in "Inmate
Tracking" spreadsheet;
"date admitted" based on
Odyssey's report of
charges filed 4/29/2020

*Admission info
unavailable: not in "Inmate
Tracking" spreadsheet;
"date admitted" based on
Odyssey's report of
charges filed 5/7/2020

*Joey Cade only shows up on the
"New View" tab of the "Inmate
Tracking" spreadsheet but not any
of the other sheets

re-tested 5/22, remains
positive

Tested "negative"
4/22/2020

Tested positive at Harper
Hospital; re-tested
5/21/2020 "negative"

re-tested positive
5/11/2020

re-tested 5/21, remains
positive

*"New view" states DH initially tested 4/22 and re-tested 5/15 (remaining positive) while "GRS Data" states DH got positive antibody test results 5/7/2020 (not sure if he in fact tested 3 xs, calculated days according to earliest test date)

Retest refused
5/21/2020

*2 test dates listed: 5/7 and 5/9, calculated days according to 5/9, when he tested positive for antibodies

"re-tested 5/22, remains
positive"

"tested positive, then re-
tested negative"

re-tested 5/26/2020,
"results pending"

Re-tested 5/15/2020
"negative"

*Admission info
unavailable: not in "Inmate
Tracking" spreadsheet;
"date admitted" based on
Odyssey's report of
charges filed 12/26/2019

**Details only in "New View"
spreadsheet*

"New view" spreadsheet:
"Patient stated tested
positive at the
hospital"/Results pending
from 5/26/2020 test

Re-tested 5/28, "results
pending"

**No details in "Covid-19
Results" spreadsheet*

*Admission info
unavailable: not in "Inmate
Tracking" spreadsheet;
"date admitted" based on
Odyssey's report of
charges filed 1/2/2020

"tested positive, then re-
tested negative"

Tested "negative"
4/17/2020

Unclear: "New View"
reports 4/6/2020 results
"negative" next to note
"remains positive at day
14" - *not counted in
yellow total*)

"New view" spreadsheet
reports 4/13/2020
"negative" & 4/23/2020
"negative"; re-tested
5/11/2020 "positive"

Retest refused
5/21/2020

Re-tested 5/15, remains
positive

Tested 4/22, re-tested
5/4, remains positive

re-tested 5/21, remains
positive

"New View" spreadsheet:

tested 4/13/2020

"negative," re-tested

5/9/2020

"negative"/"Covid-19

Results" spreadsheet: re-

tested 5/9/2020

"positive"

EXHIBIT D

COVID-19 Suspected/Positive Quarantine List

Total Positive 17

Total Negative TBD

Total Pending 2

Total Tested 816

NOTE: BLUE HIGHLIGHTED AREA REPRESENTS INMATES INCARCERATED GREATER THAN 6 MONTHS

<u>Inmate</u>	<u>Age</u>	<u>Home Unit</u>	<u>Booking Date</u>	<u>Transfer Date</u>	<u>Testing Date</u>	<u>Location</u>	<u>Virus Status</u>	<u>Symptom Level</u>

DECLARATION OF ANTHONY LAWS

1. My name is Anthony Laws. I am 65 years old and will be turning 66 next month. I am currently incarcerated at Division II of the Wayne County Jail System, 10SW. I have been here since the 4th of May. My next court date is June 26.
2. I have high blood pressure and suffer from COPD and I have arthritis in both knees, in my right ankle, and in my left hip. I have an inhaler at home for when I get short of breath because of the COPD, but I didn't have it with me when I was detained. There's supposed to be an inhaler here but I asked for it and the doctors never let me use it. They said that my medical records didn't have my COPD listed. And I have a prostate problem that makes it difficult to urinate, but they won't give me anything for that either. I also told them that I have problems with the left ventricle of my heart, and that I had a slight heart attack some years ago. The only thing the nurses ever give me is Tylenol, which is no help with the pain.
3. My blood pressure keeps going up. Every time the nurses come here to check it, it's high as heck. The nurses come here twice a day but sometimes when they come down you won't get served. They don't be on schedule or nothing. Just now, a nurse took my blood pressure by placing a band around my arm. She didn't have gloves and she had to touch me to check my blood pressure.
4. Because of my high blood pressure, the nurse said they might restrict me from buying things from the store. But I'm pretty sure that the thing making my blood pressure go up is the food that they give us. For dinner they give us bologna meat that's salty as heck, and the sodium is bad for me. And the cereal that they give us for breakfast is so old that it's not crunchy anymore. It's thin and flexes like rubber. It's soggy even when it's dry if that makes sense. I don't know how old it is, so I don't eat it because it could make me sick. Now they're trying to take the store away from me, but I have to eat.
5. I don't know how to get real medical help while in here. When I ask the guards for help they throw a blue form at me and then I fill it out and don't hear nothing for two to three weeks. I had to fill out a kite for my knee and for all my pain. It took about two to three weeks to go down there. If something serious happened, I'd die in here waiting. For a while I had a lot of soreness in my neck and when I swallowed I felt pain. I filled out another kite and never heard back. That was two weeks ago.
6. To go see the doctor you walk down to the elevator and go down three or four floors. Sometimes in the elevator there's four or five people at a time, and there ain't no distance. Like a can of sardines, same as in the holding cell when you're waiting for court. There weren't many people in there when we went to medical, maybe two of us there. The doctors were wearing gloves and masks. I've seen some nurses in there without gloves.

7. I did get tested for the corona about a month ago, but I still haven't gotten my results back yet. After the swab and after they took my blood they just sent us right back here. But we don't even know our results yet so who knows who's positive here?
8. I'm sharing a cell, and it's not supposed to be like that. It's supposed to be a one-man cell but now someone's in the top bunk maybe 4 feet above me. Because of corona, it's supposed to be a one-man cell. That's what it says according to their own policy, which is on the tablets in the law library. There's only supposed to be 10 of us in this pod but it's about 20. It's hard to distance at all in here. I can't stay in my room all day because of my arthritis; otherwise, my knee and hip get very stiff.
9. I heard of inmates coming down from quarantine to where I'm at, and there's one in my cell. He said he spent the time he needed to in quarantine and came down here. I don't know if he was tested.
10. There are windows in the cells but they're long strips that barely let any light in. They don't open.
11. In the common area, there isn't any distance. None of that. It's pathetic. There's five tables bolted into the ground and each of them have four seats welded into the table, kind of like a picnic table. If there's four people sitting at a table, they're right next to each other, arm's length to your side and in front of you. The tables aren't clean when it's time to eat. No one comes in to clean them. They're supposed to according to the policy on the tablet in the law library, but no one does. Some people are sitting at them right now and they shouldn't be because they're not clean. Same with the cells, there might be windows in the common area but you could walk from one end to the other and have barely any light.
12. Inmates pass out food without gloves.
13. Corrections isn't telling us nothing too much. They tell us we're not supposed to do any cleaning except in our own cells.
14. We don't have spray bottles even though we're supposed to according to the policy listed on the tablets in the law library. To clean our cells they give us rags that have a sour smell.
15. We have the blue PPE masks. In the common area some inmates wear the PPE and some don't. We don't have gloves. The guards wear their own masks, some brown and some black. They don't always wear them. Some do and some don't.
16. I'm fearful for my life using these phones because people talk into them all day and they aren't cleaned. There's nothing to clean them with.
17. We don't have hand sanitizer. And I can't wash my hands the way I want to because of the way the sink in our cell works. There's a little button that you push for hot or cold water and it doesn't come out sufficient enough for me to be able to get enough water to do it right. I want to be able

to clean my hands for more than a few seconds but I can't. I'm not sure if the water's clean because it's connected to the toilet, and when you flush the toilet roaches come out from around the rim. Some people call them water bugs but they sure as hell look like roaches to me. That's the same water we're drinking.

18. They give us these little bitty thin cakes of soap. You can get two or three if you tell the guards you're out, but I don't think that soap's all that good for cleaning because I was using it when I first got here and wasn't getting clean. I've been buying my own soap as long as I've had money on my account. The soap costs \$1.65 per bar.
19. It's kind of risky to shower; you have to catch it when it's just been cleaned. They don't clean it constantly. There's three or four of us that get up in the morning and clean them with watered-down bleach, and then after we clean we shower and get the hell out of there. When the curtain is hanging over the side the water runs down the curtain and gets outside. There's gray filth on the curtain and sometimes on the shower walls.
20. I try to clean the toilet but there's germs and bacteria on a seat like that, and I share a cell with another man. So it's easy to run out of the toilet paper. We can get toilet paper but some guards tell us they'll give it to us later when we have to use the bathroom now. We don't have paper towels.
21. My clothes and sheets haven't been cleaned in two to three weeks. When they do laundry, the guards walk around with a clear plastic bag where we put our clothes and sheets. We keep our socks and personal underwear and wash them with our own soap. And if we have white t-shirts that we came with sometimes we can throw those in the laundry bag and then dry them on the vent in our cells. The store has underwear and socks on the store list but they're often out of stock. Right now I see a price on them for 5 dollars a pair of underwear, 2 dollars for a pair of socks, and 10 dollars for a pair of thermals.
22. I was up all night last night, like I am most nights. I'm very fearful because there is no protection here. No cleaning up and no way to clean up. It's a raw deal to be hanging on here with the corona. No one should be here.

This declaration was orally sworn to Anthony Laws on June 10, 2020 because Wayne County Jail is not currently permitting documents to be exchanged for signature.

Under penalty of perjury, I declare that I, Faiz Pirani, have read the foregoing in its entirety to Anthony Laws on June 10, 2020.

DECLARATION OF ARIEL SUNDAY

1. My name is Ariel Sunday. I am 34 years old. I am currently incarcerated at Wayne County Jail in Division 1, Unit 10 Northeast. I have been here since February 5, 2020. Six of my court hearings have been cancelled. My next one is scheduled for July 14, 2020. I am not confident that the July 14th court date will be anything meaningful because all of the other inmates are going to court on the tablet and their hearings are just being adjourned or postponed.
2. I feel forgotten. I feel dismissed. I suffer from COPD, severe asthma, and an autoimmune disease that weakens my immune system. Having these medical conditions, I feel like the jail should have protected me a little bit more than they did. But, they didn't and so I got the virus.
3. When I first came to Wayne County Jail, I did not have COVID-19. Since I got here, they have shifted me around to places where I believe I got exposed. After spending my first two days in Division 1 in an open, dorm style setting, they moved me to E1 in Division 3. In D3 is where I learned about COVID-19 from the news. At that time, there was no PPE. No masks. The deputies were coming in and out, not wearing masks, nor gloves. Some were infected and I believe they spread the virus to us all.
4. People in here started dying. There was a guy housed in my unit who worked in the laundry room. One day, we just didn't see him again and heard that he died from COVID-19.
5. There was another guy 6 doors down from me who wore a pacemaker. We saw him collapse. He was taken up to the hospital and never came back. I asked what happened to him and they said that he died. Because I was a pod-worker, I had to clean out his cell. They didn't give me a mask, gloves or bleach. All of the pod workers -- there were 7 of us -- we were the first ones in the unit to get sick because we were cleaning up after everybody else.
6. Eventually, I did end up getting COVID-19.
7. I think I got exposed from using the inhaler. We all use the same inhaler. The nurses give each of us a hole shaped spacer that is made of cardboard that is about one inch long to place where the inhaler extinguishes the medicine. Being an airborne disease, that preventative measure was ineffective. The guy who passed out and died -- I know he had asthma. Maybe he got it from the inhaler.
8. I started feeling symptoms: dragging my body, couldn't breathe, throwing up on myself. I even pooped on myself one time. I was sweating, having these hot flashes. I had the look. My eyes had glazed over to dark gray. We all knew what that look was.
9. When I first got sick, I filled out a KITE. Then I asked the deputy if I could go up to healthcare but he said that they don't want anybody to go up to healthcare. So I had to

wait till the second shift of nurses came around. I told them about my problems. I told them I felt like I was going to die.

10. When I went up to healthcare, they said that I didn't have a temperature so I didn't have COVID-19. I told them about all of my symptoms and that I felt like I was going to die. They told me to go back to my unit and drink more water.
11. When the nurse came to my unit later that night, she prescribed me Tylenol for two weeks.
12. Then, I was transferred to Division 1 around April 14th; one week after that, I started to feel the symptoms again. I felt weaker than before, aches in my joints and my breathing was labored. I told the nurses but they just gave me some Tylenol. At this point, I still hadn't been tested for COVID-19.
13. Coincidentally, I ended up being called down to healthcare for another reason: to get my three month checkup for my autoimmune disease. During that visit, they checked my temperature. It was at 107. From there, they transferred me back to Dickerson where I was placed in a segregation pod for about 4 days until the results of my test came back.
14. They put me in H3, the COVID-19 pod; I stayed on that pod for 3 weeks. In H3, I was locked in my cell 23 hours a day. In that 1 hour, I had to use the shower, phone, watch TV and clean my cell. When I was locked in the cell, I would have chest pains and it was giving me a lot of anxiety; the only recourse I had to alert the guards that I couldn't breathe was to get up and beat on the door. But since I couldn't breathe, then how would I get to the door? I panicked at all times. I felt like they just wanted me to die. I thought, if I really can't breathe and I can't get up to bang on this door, then I am just going to die.
15. When I tested negative, they shifted me back to D1. 10 cells. 20 guys. 2 men in each cell where we are 3 feet apart from each other. I am breathing in his air at night and he's breathing in mine. In the hall, we have 4 or 5 tables with seats that are 1 foot apart; we have to eat at these tables. The only way I can socially distance is if I am alone in my cell, without my bunkmate.
16. We only get 1 toilet paper roll per week. We get 2 bars of soap that are the hotel complimentary size bars. I have to wash my hand, my body and my t-shirt, socks and underwear with those two bars.
17. If someone else flushes the toilet in another cell, excrement comes up in my toilet. Also, there are no toilet covers so if excrement comes up into my toilet while I am sleeping, it may be there all night. We then have to simultaneously flush the toilet for the excrement to go down.
18. The staff frequently come in without their masks on. This has been going on for a while. Back in march, none of them were wearing a mask. I was so scared so I wanted to wrap a

towel around my face but they wouldn't allow that. I have a mask now but the problem is, we only receive one disposable mask every two weeks. My mask is dirty right now.

19. Trustees who prepared our food tested positive for COVID-19. I was scared about that -- how am I supposed to get clean when the trustees who were fixing the food have the virus?
20. They are heavily rationing the food during the pandemic. We get 1 cold sandwich at night. 1 hot meal for lunch. 1 small breakfast. These are not the regular meals we would get.
21. I am still feeling these chest pains and it seems like different things are happening to my body. I don't know what the lasting effects of this are but I still feel pain and weakness in my body and in my joints. On top of that, they have not allowed me or any other guys to get Tylenol when we request it. They told us that now we have to buy it from the store and I am indigent so I can't purchase any.
22. I am still having anxiety. I still think I am going to die.

This declaration was orally sworn to me by Ariel Sunday on June 11, 2020 because the Wayne County Jail is currently not permitting documents to be exchanged for signature.

Under penalty of perjury, I declare that I have read the foregoing in its entirety to Ariel Sunday on June 11, 2020.

Date: June 10, 2020

DECLARATION OF DARRIUS COCHRAN

1. My name is Darrius Cochran. I am 51 years old. I've been detained at the William Dickerson Detention Facility since March 6. I'm now on Unit E-3.
2. I went to medical the second I got here. There was a guy coughing in there real bad. He didn't cover his mouth. Two days later, I couldn't get out of bed and I was sweating. I had this really bad cough. My chest was hurting. My neck was hurting. I know what the flu is like, but I had never been sick like this before. My whole body was hurting. I was throwing up and I had diarrhea real bad and pains all over my body.
3. When I tried to get up, my legs wouldn't work. Some guys helped me up. The deputy called and ordered me a wheelchair. I went to medical. I was sweating. They say I didn't have a fever but I was sweating real bad and had a real bad cough. I sat down there for hours. They didn't pay me no attention. Everybody was going in front of me. I'm just sitting there, like I was faking or something. That really pissed me off. They wasn't taking me serious.
4. They finally got to me and took my temperature. They gave me water and juice and sent me back to the pod. My head was hurting. I had no appetite. I went back to medical. They gave me three bags of an IV. I sat down there for a while. Then I went back to the pod and went to sleep.
5. I slept for like seven days straight. I didn't get up to eat, just to use the bathroom. I tried to walk. Every few steps I took, I was out of breath. I had to use the wheelchair for eight or nine days. The deputies referred to me as the guy in the wheelchair. I was worried to death.
6. The whole time I was sick, I was in C-1, an open pod. My bed was probably five or six feet away from other people's beds. I still had to get food from the cafeteria, but I couldn't because I was too sick. No one brought it to me. I just didn't eat for seven days or so. At medical, they ordered me food but I didn't eat it because I was too sick.
7. After I was sick, I cleaned my bunk with Simple Green, but that was all I could do.
8. A few of the guards gave us information about COVID. But they was always joking about it. I didn't find it funny. I didn't really know why I was sick and laying out in the bed. I didn't find out until I was better and watching the news.
9. I bought deodorant and soap because the soap and deodorant they're giving me is garbage. We clean our rooms with Simple Green. It's a degreaser. It's not killing germs or anything. We never have bleach or Lysol or anything like that. The first few days, they had us spraying our stuff down with Lysol, but that ended real quick. One of the deputies

brought that on his own, for the pod. It was his personal Lysol. Ever since then, we've just been using Simple Green.

10. I was on C-1 first. They moved us to E-3, then something was wrong with E-3, so the guys from E-3 moved back down to E-1. We was down there a couple weeks. It was jam-packed. It was like 60 of us in the open pod. There wasn't no social distancing. It was dangerous.
11. I have high blood pressure. It took them over a month to prescribe my high blood pressure medicine. I just started getting it May 6. The nurses knew about my high blood pressure. My pressure was up every time I went to see the medical center. When I was sick, one time it was so high they thought I was going to have a stroke. When I don't get my medication, I have headaches and see spots in my vision. The third time when I asked the nurse for my high blood pressure medication, she said she couldn't get in touch with the pharmacy. Now, they're giving me a different kind of medication for high blood pressure. I've never even seen the kind they're giving me now. It took a while for my body to get used to it. I was sleeping a lot when they first gave it to me. I couldn't stay awake.
12. I still got a pain in my neck and in my side that won't go away, ever since I was sick. I see guys writing kites and they never get answered, so I just sit back and I just pray on it.
13. They tested us on May 9, but they didn't give us our results. One guy asked about his test results, and the guard just told him to beat it. We got a blood test and a swab up the nose test. I guess one of them is the antibody test. They came and got two guys off the pod, and I guess they still had it or whatever. They moved them to quarantine. The rest of us still don't know anything. We were playing cards every day, sitting around eating with them, shooting basketballs with them. If they had it, we got it.
14. I'm scared. I want to go home, but I don't want to give COVID to my family. The scary part is they keep saying my court date is January 1, 2021. I asked what my lawyer's name is, and they say I don't have a lawyer. I asked for a lawyer last Friday, but there's still no lawyer in the computer for me.

This declaration was orally sworn to by Darrius Cochran on June 9, 2020.

Under penalties of perjury, I declare that I have read the foregoing in its entirety to Darrius Cochran on June 9, 2020.

Maiya Moncino

Date: June 9, 2020

DECLARATION OF JIMMIE CARD

1. My name is Jimmie Card. I am 48 years old. I am currently incarcerated in Division II of the Wayne County Jail. I have been inside since February 4, 2020. I have not been sentenced and I have been to court twice.
2. I have hypertension, high cholesterol, and respiratory problems. But I cannot go to medical to attend to my personal health issues. No one responded to my medical kites because the doctors passed away due to coronavirus. When I try to talk to the guards to see the nurse for my blood pressure, they are not concerned.
3. The guards tell us that what is going on outside of the jail is more important. We are second. It's like we are not even here. Like we don't even matter. They haven't really given us any information about COVID-19.
4. The jail tested me for COVID-19 on May 6. I have no idea whether I have COVID-19 or not because they never told me the test result. We don't know who is positive or negative because they won't tell us the outcome.
5. I see other people coughing all the time. In here, if one person gets sick, all others get sick, too.
6. Guards have been getting sick. The nurses told me that the 2 doctors who passed away, 26 guards, and 30 something inmates all tested positive for COVID-19. There is no quarantine. The people who tested positive are still around and they came out to hang with other people. We just stay in the same space. There are no cleaning or improvements to our conditions even after these people have tested positive.
7. We ask the nurse that comes around about COVID-19, but she is not telling us anything. We keep asking her about the situation, but she is not taking us seriously. She just tells us that this is an emergency and we don't matter. The nurse is fully geared up with a mask and gloves. The only medicine she will give me is Tylenol for my back pain. I am supposed to have it every day, but they ran out. I get no medicine for my other conditions.
8. The jail is in unlivable condition. We are two and a half feet apart in the common area and we are together all day, every day. There is no way to social-distance. The space is too small even if we tried. We use the same phone, three tablets, and the same TV in the common space.
9. The 10 of us share the same shower. The trustees used to come once a week to clean the shower with bleach. But now, due to COVID-19, they let the trustees out and there is pretty much no cleaning of the shower. They won't give us any bleach when we ask.

10. We change sheets once or twice a week. We have to wash our laundry by hand when we get into the shower. We don't get anything to help clean our sheets and laundry.
11. We are always asking the guards for cleaning supplies. But we don't get enough of them. We get no hand sanitizers and no cleaning supplies for common spaces. They only give us one mop and some cleaning solution to clean the floor. We all share the same mop and cleaning solution.
12. We only get one role of tissue paper and three small bars of soap per week. We are living off of soap and water that we buy from the commissary to clean. We pay \$1.5 for a very small bar of soap. The price for soap is so high that some people can't afford it.
13. There is nothing positive coming from the guards. But the guards tell us that they take off their entire uniform before going into their homes and keep telling us that we should feel safe here. How can we feel safe when they won't even go into their houses with their uniforms?
14. We get terrible food. We have some cereal, corn bread, juice, and some peanut butter for breakfast. We get only one hot meal with some hot dogs, vegetables, and fruit for lunch. We only get cold food for dinner. The guards serve the food. We complained about them not wearing masks when serving the food. Some do now and some still don't.
15. The jail is also giving no instructions. They only give us disposable masks twice a month. They don't help us clean it. They just tell us to keep the masks on and wash our hands. They haven't had any statement about the situation. They haven't given us any handouts about how to handle everything. I talked to the sergeants, but they say that they don't even know what's going on.

This declaration was orally sworn to Jimmie Card on June 9, 2020 because Wayne County Jail is not currently permitting documents to be exchanged for signature.

Under penalties of perjury, I declare that I have read the foregoing in its entirety to Jimmie Card on June 9, 2020.

/s/ Emma Xu

By: Emma Xu

Date: June 9, 2020

DECLARATION OF JOE COLEMAN-SMITH

1. My name is Joe Coleman-Smith. I am 21 years old. Before coming to Wayne County Jail, I was working two jobs: landscaping and roofing. I am currently incarcerated at Wayne County Jail in Division 1, Section 306. I have been here since August 4, 2019 and my next court date is scheduled for June 29th, 2020.
2. I have asthma but I don't have access to an inhaler. I asked the nurses about getting an inhaler and they said they would look into it but I still don't have one.
3. Two weeks ago, I had bad chest pains and heavy breathing. I submitted a KITE but it took a nurse 2-3 weeks to get back to me. She gave me Motrin or Tylenol. She didn't check my temperature but I think she checked my blood pressure because she put something on my finger.
4. The way I found out about the coronavirus was by watching T.V. The news told us about the virus, not the guards. There are 10 guys in our unit and we stand shoulder-to-shoulder, bundled up, to watch T.V. Some guys seem scared because some of their family members have passed away from the virus.
5. We get one mask every month. They do our laundry every 3 to 4 weeks. We are given one roll of toilet paper a week which lasts about five days because of how thin the tissue is. We are given 2 bars of soap a week. Two bars is like one shower for me so I ask people to borrow their soap and pay them back when I get the other two bars. I also have to use that soap to wash my underclothes, t-shirts and socks. I also use the soap to clean my bars by lathering it on one half of my towel.
6. We have never gotten disinfectant spray to clean. For the mop, we just use the water from the shower but I have never seen it come with any cleaning solution. Today when I woke up, it was just the mop, bucket, broom and dustpan. No spray and no cleaning solution. I believe all the trustees have gone home. The last time I saw a trustee was probably a month or two months ago.
7. There's black mold in the shower. Whenever someone wants to shower, they have to ask the guards to turn on the water from the outside, behind the wall. Sometimes they do and sometimes they don't. My sink works off and on. I can't get any hot water and the cold water trickles.
8. My toilet has overflowed 3 or 4 times. When it floods, poop comes up and it gets onto the floor. It gets into the tiles on the ground. The last time it happened was two days ago. I asked the guard for a plunger and it took him half an hour to get back to me. I had to use the broom and the dustpan to sweep up the water and the poop and I poured it back into the toilet. I used the mop to soak up the water. They didn't give me any cleaning solution or gloves and, on that day, I didn't have any soap to clean with. We get soap every Tuesday so I will have to wait until then to re-disinfect my room.

9. Some guards walk around with their masks off. A few deputies who had the coronavirus came back to work and still walk around with their masks off. We don't know if we can get it from them. I feel like we can catch it, get sick, and probably die from it.
10. They said if we didn't get our nose swabbed or blood drawn, they were going to lock us down for 30 days. The whole pod would be punished if one person didn't want to get tested.
11. Lately, I have been feeling really emotional. I really don't know what is going on and what is going to happen to me.

This declaration was orally sworn to me by Joe Coleman-Smith on June 10, 2020 because the Wayne County Jail is currently not permitting documents to be exchanged for signature.

Under penalty of perjury, I declare that I have read the foregoing in its entirety to Joe Coleman-Smith on June 10, 2020.

By:

Saba Rewald

Date: June 10, 2020

DECLARATION OF KELWIN EDWARDS

1. My name is Kelwin Edwards. I am 51 years old and a father to seven children. I am currently incarcerated at Wayne County Jail in Division 2, Section 614. I live on a hallway with 14 cells. I have been here since March 18, 2020 on a writ.
2. I was scheduled to have re-sentencing on March 27th but they have moved my court date to January 1st 2021. This is inhumane. I have 7 children to go back to but I don't know if I am going to make it because of my health issues and the quality of medical care here. I am frustrated everyday that goes by. Everybody is scared. People want to go home, especially people who have not been sentenced. We are just being held without any further dates and the courts are not moving like they are supposed to.
3. When I first got here, I was put in quarantine in Division 2, 1402 with three other guys. They call it 'the new side.' It was so nasty. It was filthy. You could see old milk and old juice on the old steel, rusted table. I had to use my only towel to clean it. The deputies don't have anybody come in and clean anything in the quarantine unit. It was up to us to clean, but we weren't given any cleaning supplies. The showers were so filthy. I was scared to take a shower. While I was in there, I got a rash on both elbows which I was never treated for.
4. I believe I got the rash from putting my elbows on the table. My rash consists of bumps that are rough and spread across my elbows. It's very itchy and irritating to the point that rubbing doesn't do it and scratching suffices. I wrote a KITE and didn't get a response. I have received no ointments or medical attention.
5. I suffer from seizures because I got shot in the back of the head. I have an enlarged heart. My knees are bad and, to take care of them, I need exercise. I can't exercise in here. We are cooped up like chickens.
6. I have a stomach issue called Seroma. My stomach has swollen up very badly because I just had surgery before I came here. I am supposed to have a follow-up operation to remove the fluids in my stomach.
7. I went to see the doctor in the medical ward which is located 50 feet down the hall about my stomach. When I got there, they chained me in the cell and I was told to sit in a blue chair. An officer was standing behind me. He stayed there for the entire consultation.
8. The doctor came in. His name is Dr. Korinstein. He had an attitude and complained about all the things he had to do. He said that there wasn't anything wrong with me. I was confused by his statement because he hadn't even touched me nor inspected me. He insisted that nothing was wrong with me. He didn't give me any medicine or relief. He told me he won't send me to hospital. He made it very clear that they don't want to send anybody to the hospital. This doctor doesn't care about anybody. He lied to the staff here and said he observed me and didn't see anything wrong with me. I had no choice but to go back to my unit. When I returned, I was wearing the same clothes and mask. I heard

that Dr. Korinstein has been fired along with the previous medical providers called CCS. Now, our healthcare company is called Wellpath.

9. It seems like they are waiting for something drastic to happen to you. Being here is mind-boggling and shell-shocking. I am fearing for my life.
10. I have written a lot of KITES but the nurses don't always have KITE forms. When you ask for a KITE, the nurse will tell you that she is not a KITE nurse meaning that she is not responsible for the forms. I have not seen a KITE nurse in here for weeks. The funny thing is, you don't know who is a KITE nurse and who isn't because they turn their name tags backwards. You don't know who is who. The only way you know if someone is a KITE nurse is if they announce it but I have not heard anyone do that in the last three/four weeks. They might not come back.
11. Sometimes the other nurses are willing to distribute and collect KITES but that only happens if you are lucky. Then, you may or may not get a response. When I was able to see the doctor about my stomach, it was 4-5 days after I submitted the KITE. Usually it takes 2-3 weeks. I was told that the doctor only comes on Thursdays.
12. They have me on a no-soy diet. I don't know why. They won't take me off until I see a doctor. I have submitted a KITE to do that but the doctor won't see me.
13. Three weeks ago, I couldn't taste or smell anything. I had a really bad headache. I felt like my eyes were going to pop out. I was feeling woozy. My throat was hurting. I was feeling like I had flu symptoms. I saw the coronavirus symptoms on the news and the guy next to me actually tested positive for the virus so I knew that something was wrong. I hope it wasn't the coronavirus. I didn't come here to die.
14. I told a nurse about my symptoms. She told me and the other guys experiencing similar symptoms that she would get back to us. Two to three days later, she said we would get tested. One week later we got tested. We never got back our results.
15. We talk to the nurses, seeking information about the virus. They say they will get back to us and they never do.
16. We are afraid that we will get sick and go through a medical process that is terrible. Actually, we had three guys in here that were really sick and were coughing a lot. The jail staff told the nurses. It took the nurse 4 or 5 days to come check on them. The nurses checked their temperature and identified that they had fevers. They just left them in the unit with the rest of us.
17. We have to bang on our doors to get cleaning supplies. We have been asking for bleach. Every time, they say no.
18. We only have access to whatever they give us in the morning which is a mop and a bucket. I don't know what is in the bucket. There is sometimes a cleaning solution in it

that is green. There is no rag. There are no gloves. You have to use your one roll of toilet paper to wipe down your table, bars, etc.

19. When the supplies come through, you have to wait your turn. By the time I get to the spray bottle, the solution is all gone. They fill the bottle once a day. You can't buy other cleaning supplies from the commissary. All they have is laundry detergent.
20. I can't clean the phone when I use it because there is nothing to clean it with. They either take the spray bottle or it is empty. There is nothing sitting beside the phone for people to clean it with. Meanwhile, sitting at the guards' desk are paper towels, Lysol wipes, gloves, masks and shields, only for them to use.
21. My toilet overflowed a couple of weeks ago. Somebody on the next floor behind me flushed. Fecal matter started coming up through my toilet, all the way to the rim. It started bubbling and splashing on the floor. I ran out and yelled for bleach. The guards said that they would get back to me but nobody ever came. I didn't use the bathroom that day. I slept in the cell that night. I had no choice. I had to wait an entire day to clean it up. The next day, it happened to the guy next to me. The lady gave us bleach and a scrub brush. I had to demand bleach. We were not given gloves.
22. In the showers, there's a lot of lead paint that falls from the ceiling on the floor. Laundry is terrible. We have to wash our own underwear in the shower.
23. I am not safe here.

This declaration was orally sworn to me by Kelwin Edwards on June 1, 2020 because the Wayne County Jail is currently not permitting documents to be exchanged for signature.

Under penalty of perjury, I declare that I have read the foregoing in its entirety to Kelwin Edwards on June 1, 2020.

By:

Saba Rewald

Date: June 1, 2020

DECLARATION OF MARCUS LYNN

1. My name is Marcus Lynn. I am 50 years old. I am currently incarcerated at Wayne County Jail in Division 2, Section 614. I have been in jail since June 26, 2019.
2. My next court date is scheduled for June 16, 2020. I hope that I am able to go to court but based on the experiences of the other inmates, it seems like it will be cancelled.
3. We are in a state of limbo. The other inmates and I feel confused. Nobody knows what is going on. Nobody knows anything. We are scared. We often wonder, are we going to die in here?
4. I have not seen a KITE nurse since I came to this unit. I have diabetes and severe pain in my neck and shoulders but since I have been in section 614, I have not been seen for any of my health concerns because there is nobody that comes to collect our KITE forms. I have heard other inmates coughing and there was no response from the jail staff. They didn't even take that person's temperature. There was actually a man in our unit who ended up testing positive for the virus who was walking around and talking to everybody. Once he tested positive, we all asked to get re-tested but they refused. I truly believe that a person would have to be unconscious for the jail staff to send them to receive medical help -- to get to see a doctor you would have to be dead. Otherwise, you are stuck in this unit.
5. Section 614 is one long hallway with 14 cells. There are no windows that open or that you can see through. As a matter of fact, I haven't seen the outside since last summer.
6. We have one T.V where all 14 of us stand huddled around to watch the news and other programs. If we didn't watch TV, we wouldn't know anything about coronavirus. We have to stand close to each other to watch the TV because if it's too loud, the guards will cut it off.
7. The guards don't really interact with us. They don't stay around us too much -- like we might give the virus to them. Someone could be asking a question and the guards will just ignore them and keep walking. We are scared just like they are.
8. We share one broom and one mop with some solution in it. They give us a spray bottle every once in a while with a cleaning solution in it. Sometimes it's Simple Green and sometimes it's all clear and we don't know what that is. It's not a real solution of Simple Green because it's too light. Real Simple Green is dark green and this is a watered down, light green. In their rulebook, it says that we need cleaning supplies twice a day to mop the hallways.
9. When the coronavirus happened, they said they would spray the bars and cells regularly but I can't remember the last time they sprayed the bars down. When I get a spray bottle, I spray my bars down. I haven't seen anybody clean the phones, tablets or remote controls.

10. The iron roof in the shower is rusty and it has paint falling down from it. There is a circulation vent but it's so rusty and corroded. The roof is mildewed. The bars are rusty and mildewed.
11. The toilet and sink are in your cell. Most of our sinks have something wrong with them so we have to get water from the shower or someone else's cell. We have been asking them to put in work orders for a lot of our sinks but they have not been fixed.
12. The toilet in my cell has overflowed. Each toilet is hooked up to 4 other toilets -- one toilet in your unit and 2 of them in the units behind them (plumbing is H layout). So, if someone's toilet overflows in the unit behind yours, then it will overflow in your cell. Also, if there's is stopped up, the fecal matter will come up through to your toilet. When my toilet overflowed, they gave me a mop but no cleaning solution so we used the shampoo that we had. The first time it overflowed, me and 3 other guys were moved to the quarantine unit for a couple of days. When we came back, we still had to clean up the mess. In either instance, we weren't given gloves.
13. We get three little bars of soap per week. The commander came down and presented us with a study that the average American uses 3oz of soap but what he doesn't realize is that other people have soap dishes. We have to hold our soap in our hands when we shower and it just evaporates. We also have to use that soap to wash our underclothes. They don't wash our underwear and t-shirts. We have to use the soap to wash our underclothes or else we have to buy detergent from the commissary.
14. We are given one roll of toilet paper a week which we have to use to clean surfaces as well as when we use the bathroom. When you run out, the guards won't give you a new roll. Usually, the inmates share what they have with each other.
15. We get a new mask every two weeks. By the time they change them out, the masks are ragged.
16. We don't know our fate. We don't know if we are going to die in here.

This declaration was orally sworn to me by Marcus Lynn on June 1, 2020 because the Wayne County Jail is currently not permitting documents to be exchanged for signature.

Under penalty of perjury, I declare that I have read the foregoing in its entirety to Marcus Lynn on June 1, 2020.

DECLARATION OF RYAN GHIST

1. My name is Ryan Ghist. I am 33 years old. My grandfather and sister live in the Detroit area. I used to live here, but I've been living in Arlington, Texas for the last 12 years. My grandma died last month.
2. I am really close with my aunt, and I try to talk to her when I can, but I don't have money for more than the occasional 3-minute call, and most of that is spent talking about my case because she's the only one who's in touch with my lawyer.
3. I started out in Division I, and then was moved to Division III, and now I'm in Division II. I tested positive for coronavirus three times and then negative the last time I was tested. I think I got it in Division I because I didn't have any pain until April 12th which was three weeks after I got there, and then I started getting all of the symptoms. I had a cough, a fever, chills, soreness, diarrhea, and I lost my sense of taste and smell. The first time I was tested was seven days after they put me in quarantine. That came out positive. The next time I was tested was three weeks after my first time I was tested. Then my third and fourth ones were a week after each other. Only my fourth test came out negative.
4. A lot of deputies in Division I were sick and a commander died. A lot of them were positive. I was the newest guy in Division I when I got there, and I think I caught it from a deputy. They were the only ones who I was in contact with because they would come to our cells to maintain order and to give us meals through a slot that they could only access by opening the main door. I was really afraid to catch covid because I was really scared. I never left my cell—didn't go to rec or anything—because I was scared. I was wearing my mask the entire time before I got sick, even when I was sleeping. It was the blue one that they gave us, and now I don't even think those masks do anything to protect us. Some guards are not wearing masks and a lot of them will keep moving it off their face. I'm not sure if they brought their own masks from home or if the jail gave them those masks, but I think we should all have them because this place is so disgusting. The masks that we get are changed every two to three weeks. I haven't seen anyone wear gloves except for the nurse and deputies.
5. I knew I had it once I started getting the symptoms, and I begged a guard to take me to the nurse but he told me to fill out a kite. I was in so much pain though that I could barely move. Another inmate went to go see the nurse two days later and told her about me, and that's when she finally came to my cell to see me. She took my temperature and I had a fever. She moved me to the quarantine pod in Division III right then and there. That was around April 15th. After six days I got my first test. A week later they told me that I had

tested positive. They checked my temperature twice a day at first and then less often. It got as high as 103.5 degrees. My chills were also really bad.

6. In quarantine, it was a single-man cell. We were under 23 hours lockdown and 1 hour free time. I wasn't able to shower every day because the showers were broken. There were eight showers and only one was actually working and it didn't even have hot water. I never saw anyone but me cleaning the shower. I took it upon myself to physically spray Simple Green on the showers and the microwave and TV remote and chairs and phones myself. I took the shower once and after I realized it was cold, I just washed myself up in the cell. I told a deputy that someone needed to come in and fix it but no one ever came. I also know that on that floor, a lot of the toilets flooded but no plumbers ever came to fix it.
7. There were assigned pod workers chosen by the deputies who were also in quarantine whose job was to pass along requests from the inmates and the deputies. The pod workers had tested positive too, which is why they were all in there. They called me out of my cell to serve food three times a day, and the person who served food before me never wore gloves.
8. I stayed in quarantine for somewhere from 36-45 days. When I was sick, they gave me cough syrup, Tylenol, and Gatorade. It didn't really help with any of my symptoms.
9. As soon as I tested positive, I felt like the guards treated me like a rabid dog with fleas. They put me in the room with the other positives and told us to clean up after ourselves. The guards would pass out the same spray bottle for us to use it in each of our cells. When we first got into quarantine, no one had gloves. Eventually, the deputies got them, but we never had gloves and we were the ones actually using the spray bottle.
10. I was moved to Division II the day after I tested negative. They took two or three weeks to change our linens.
11. In Divisions I and II, they don't respond to simple requests and act like we're trying to cause trouble when really we're just scared for our lives. I have to beg for cleaning supplies, even bleach which we're supposed to have but rarely do. When we don't have bleach we have to use water to clean the cell floor which doesn't help. This is crazy. I don't feel safe anymore, especially since I've already had it. What's stopping me from catching it again?
12. Asking a guard about what the conditions are like outside and getting an actual answer is like finding a needle in a haystack. If I ask them a question, even if I ask really nice,

they're really short with me. And if they do give an answer, they're either uninformed or just don't care.

13. I don't think that the cleaning spray they give us to clean our cells is bleach even though they're supposed to give us bleach. I don't know if it does anything. The shower is nasty. It floods every day, and there's mildew and funny odors no matter how hard you try cleaning.
14. They're not feeding us properly. It's the same meal every day and it's not enough to fill me up. No one who hands out the food has gloves. We're supposed to have one cold meal and two hot meals, but instead we get two cold meals and one hot meal. They're supposed to serve us two hot meals according to the rules on the tablet, and they did when I first got here, but sometime in April they switched our dinner to bologna sandwiches. The hot meal is for lunch, and for dinner we get bologna sandwiches. I barely eat any of it because the meat comes out slimy. I think it's pre-prepared, so who knows how long it's been sitting out. The lettuce they serve us is dirty and has been sitting out for a while. For breakfast, we get a scoop of peanut butter and stale corn flakes. They sometimes give us expired juices and expired milks. On many occasions I've gotten expired milk, and they still serve it to us.
15. There are at least 20 men in a pod and there are constantly new ones coming in from off the street, and who knows what they're bringing in? No one cleans the cells when people are transferred or released. They just put new people in the same cell.
16. Each cell has a toilet attached to a sink. The toilets don't work right. Sometimes we'll have to go to the cell next to us and flush the toilets at the same time just to make the shit go down. And other times we have to keep trying to flush and that overflows it. Roaches come through the toilet and through the air vents. There are always water bugs too. This is the same water we drink. I'm scared to drink that water.
17. The mops and brooms are disgusting. It's our responsibility to clean our cells, and so we should have the proper supplies to do that. The mop and broom are shared between four pods: 10SW, 10SE, and two others on this floor, including the trustee pod. We have to wait until the mop and broom are done being used, and no one bothers cleaning the mop properly.
18. There is no hand sanitizer.
19. They gave us this small bar of soap that fits in the palm of your hand. I literally beg for cleaning supplies because commissary only comes twice a week and they're always

running out of hygiene products. They tell us they're out of stock and that we can reserve it for next week, but what do we do in the meantime? I've already had to buy 2 bars of soap with my own money but they run out so often.

20. Social distancing in here is a joke. It's impossible. Literally impossible. Everybody's right next to each other in the common areas, shoulder-to-shoulder, eating at tables that are bolted to the ground in chairs that are bolted to the table like a park bench or picnic table. The common area is a little smaller than a classroom and is really narrow. People come to the common area to watch TV, use the phones, and play cards. Everyone's usually out in the common area. It's pretty crowded in here. There's supposed to be six tablets in here, but two don't work at all, and only one of them rings when calls come in. That's for the eighteen guys who are here right now. There are two phones to a cell. They put two people in a room, which is not much bigger than a closet, so there's no social distancing.
21. They give us toilet paper when it's in stock but as of late, we just get these flimsy paper towels, the type that they used to have in elementary school. If we use that to clean we get our hands dirty because it's so thin and we don't have gloves.
22. I have a window in my cell that doesn't open. I can look outside, but the only ventilation is recycled A/C air. The A/C is always blowing but I don't know where it's blowing from. It could be the air from the quarantine unit for all I know.
23. The most dangerous things in here have got to be the phones. Everyone is talking and breathing into them and no one cleans them because we don't have wipes. Most of us have started covering the speaker phone with a sheet of paper towel because we don't want to get sick or get other people sick, but it still feels dangerous.
24. I feel like I'm sitting here rotting away. No one belongs here. It's a death sentence.

This declaration was orally sworn to me by Ryan Ghist on June 11, 2020 because the Wayne County Jail is currently not permitting documents to be exchanged for signature.

Under penalty of perjury, I declare that I, Faiz Pirani, have read the foregoing in its entirety to Ryan Ghist on June 11, 2020.

DECLARATION OF SAMUEL JOHNSON

1. My name is Samuel Johnson, I am 34 years old, and I have been in the Wayne County Jail, Division II, Block 306 since January. I am still awaiting my trial as my conference has been postponed six times because of COVID-19.
2. I was tested for COVID-19 almost a month ago. They gave us two tests, one blood test and one swab test. The guards told us that if we refused the tests, they would lock us down for 30 days. Even though it has almost been a month since the tests, no one has found out about their results yet. Everyone in here is frustrated and angry because we are not with our families and we can't protect ourselves from the disease. I'm especially scared because of my bronchitis. I'm always nervous about contracting COVID/
3. I have bronchitis, which sometimes makes it hard for me to breathe. The guards give us masks about every two weeks, but they are the kind you see in hospitals that are disposable after one use. They are cheap and get destroyed easily.
4. It's difficult to keep my cell clean in here. The guards bring a cleaning bucket in the mornings but it only has a broom and a mop in it. The mop is never washed so it stinks. We all just sweep our cells instead. And they only bring cleaning solution every so often. The solution is Simply Green and it seems very watered down. If we ask for it when it's not in the bucket, the guards just tell us there isn't any for us that day.
5. Our cells have a bed, a sink, and a toilet in them. The sink is only cold water. The toilets in the cells have been known to get backed up and overflow and I sometimes have running water under mine.
6. I don't see them clean the common areas or the things we touch often, like the phones. If we want things cleaned, we have to do it ourselves. But they don't really even give us supplies to do that. And the bars that separate our cells and the blocks are really nasty and dirty. I've only seen the bars clean once since I got here, but other than that they have always been filled with dust and generally gross. Sometimes the guards spray the Simply Green stuff on the bars but they never wipe them down so they never actually get cleaned.
7. Once a week I am given three tiny bars of soap to use when I shower but they are cheap and dissolve quickly. I don't have access to tissues or paper towels, and I only get one roll of toilet paper per week. There isn't any hot water in our cells and the ten of us in the unit all share one shower. But we can only shower after asking the guards to turn on the water since the showers broke a while back. And some guards don't know how to turn on

the shower so we have to wait for one who does know how to do it to be on duty before we're able to shower. Without the guard turning on the water, we don't have access to hot or cold water in the shower. And the showers are typically cleaned once a week but sometimes that is skipped so the shower goes weeks without being cleaned at all. To clean the shower, all the officer does is use Simply Green but that doesn't really do anything. There is black mold in the shower right now.

8. It is impossible to social distance in here. There are only a few tables in our unit so every time we eat, we all sit right next to each other. Everyone wears their mask because we want to protect ourselves from COVID-19 but also because the guards force us to. The guards have turned off our phone for someone in the unit not wearing a mask and they have threatened to lock us down for not wearing it. But the guards aren't always wearing masks. I remember a few guards saying that they had already had COVID-19 and gotten over it so they had immunity and didn't need to wear their masks. We yelled at them to put their masks on. But when the guards serve us food, only some of them wear both masks and gloves. The guards often treat us like we are a different species than them.
9. Towels are washed sometimes once a week but sometimes we have to wait up to three weeks before our towel is washed. And when we get new dry towels, sometimes they are still dirty. In the past when I've gotten a dirty towel, usually the guard who gave it to me refuses to give me another one. Then I have to wait until another day when a nicer guard is on duty to get a clean one. They don't give us washcloths, we have to buy those at the commissary.
10. Kites are ignored. As for kites, I've submitted a few about my ankle, my knee, and my tooth, which are all in pain, but they just give me a few weeks of Motrin and then stop. I haven't gotten any medical attention since COVID-19 started and it seems like they stopped all medical services except for passing out medications. In fact, the lady who used to pick up kites doesn't come around anymore. I'm submitting another kite today about my teeth because the tooth I wrote about before was broken and causing me pain so I just broke it all the way but I have three other broken teeth too that need to be looked at.
11. The air in here is recycled and nasty. There is a vent that is blowing air but it is never fresh air, only recycled. We never go outside to exercise and there are no windows that open in here. There is no ventilation and we are all just breathing the same air.
12. The food in here is like baby food and we only get one hot meal a day. Breakfast is usually just a handful of cereal and a piece of cake that is nasty. We usually have a hot lunch that is something like a chicken patty with one piece of bread, mashed potatoes, broccoli and apple sauce. And then dinner is usually a small sandwich (two pieces of

bread with a couple slices of meat and lettuce) and a pack of cookies. I am always still hungry after every meal. The guards also sometimes smash our breakfast cakes on purpose so we can't eat them and its just a pile of crumbs.

13. The food comes from Division III since the kitchen in Division II is closed. Inmates make the food but I don't think they wear protective gear since just this morning, my breakfast tray had hair on it that came from the guy who made it.

This declaration was orally sworn to Samuel Johnson on June 8, 2020 because Wayne County Jail is not currently permitting documents to be exchanged for signature.

Under penalty of perjury, I declare that I, Clara Butler, have read the foregoing in its entirety to Samuel Johnson on June 8, 2020.

DECLARATION OF SHAWN CROTHERS

1. My name is Shawn Crothers. I am 53 years old. I have been incarcerated since February 7. I'm currently at the William Dickerson Detention Facility in Unit E-3.
2. When COVID first hit, the guards were disappearing because they were getting sick. At first, the guards had masks and we didn't, but they weren't wearing their masks all the time, and they were getting us sick. Some of them keep their masks around their chin instead of their face. Now, we have to have our mask up or we go to the hole.
3. I believe I had COVID around the second week of March. My body just hurt so bad and I didn't get out of bed to eat or nothing for like three days. They wouldn't do anything for us. They just told us to drink plenty of fluids. I told the nurse that I didn't feel right. She asked if I had a fever, but she wouldn't take my temperature and just told me to put in a kite. The nurses would get mad or look at you funny. They all had an attitude like we shouldn't be saying anything about it. It was uncomfortable. They acted like it was our fault. That was before we even had masks or anything. We didn't know what was going on. They were hiding everything, it seemed like to me. They weren't giving us any information. We only get certain channels because the cable wires are all messed up and we've got potato chip bags tied together as a makeshift antenna for the TVs. It's hit or miss if we can watch the news or not.
4. The guards never really explained anything about COVID. They just said we should clean our rooms and clean up around the common area. They never gave us any bleach or anything to clean with. They gave us Simple Green, a green solution, but they put it in their own bottle. It didn't have a label on it from the store. They just put their own sticker on it and told us it was our cleaner. It was obvious that the stuff in the bottles was not the original stuff that was in the bottles. They put something else in there.
5. They did give us masks and told us to keep them up. They're five-hour masks, but we only get new masks every two weeks. They're not keeping us from getting it, because they're garbage. That's basically it. I have a hard time breathing.
6. I clean up the trash, which is definitely a hotspot for COVID. One officer, Anderson, won't even let me take the trash out unless it's overflowing because he wants to save on garbage bags. The garbage bags are much bigger than the trash cans, so the stuff is going all over the floor.
7. The deputies moved us around quite a bit once COVID started going crazy, so I've been in a few different units. They moved me six times to different pods. They never gave us

any explanation. When they first started moving us, they said they were cleaning, but they moved us to a new pod and then two hours later they moved us back into the old pod. When we got back, it wasn't clean. Nothing was done. The garbage was still in the garbage. Things were still on the floor. They were not explaining anything.

8. Then they would move us randomly. They would tell us to pack up and move and not tell us why. I think it was because somebody was coming in to check this place, and they were hiding us so it looks like they're doing social distancing. But they weren't doing any kind of social distancing at all. They kept the bunks full until early April. They were still double bunking some people in my pod until the first week of April.
9. They used to charge \$4 to put money on commissary, and they changed it to \$10. Obviously, there's not as many people in here and they're losing money. They're charging more to make up for it.
10. They tested us for COVID on May 9, but they won't tell anybody the results. The students from Wayne State who tested us told us we would have the results within 24 to 48 hours. They took our blood and stuck a swab up our noses. We didn't sign anything, which I thought was weird. As far as I know, when somebody takes your blood, they have to give you a result. They didn't tell us what they were doing with our blood.
11. When they took our blood and nose swabs, they said if we don't take the test, they would put us in segregation. No one refused, because you don't want to be locked in a cell by yourself all day, every day.
12. Every time we ask about the test results, we get brushed off. Nobody seems to know anything, but that's garbage. They know.
13. The people who they said had the active virus, they took out of here. They only took two people out of each pod and took them down to the Coronavirus pod, H-3. The guard told me that. I'm thinking there's no way that's right because the two guys they took out of here, we play cards with them every day. We play basketball with them, we work with them. They say that nobody else who played basketball with them, worked with them, ate with them had it. I think they couldn't separate us all, because there were too many of us that had it. I think that's why they weren't giving us the test results, because then we would all know. It's like they were just acting like they were taking care of us by taking two guys out of each pod.
14. I went to the psych and he told me I had PTSD from the stress. I'm seeing everyone sick and not knowing if I'm going to get out of here. You're in here and, especially with the

court thing and not knowing what's happening, it's hard. It's stressful. It's wearing on me. They put me on medication about it.

15. I'm worried about my family, and they cut off our visitation and said they would give us free phone calls to call our families. But then they cut the phone calls off, and now they don't give us that or visits. If you don't have any money to call your family, you're screwed. I've got family out there and a girl and stuff. They don't have to treat us this way. No bond, no court date, no nothing. It's just hard when nobody gives a crap. I'm having a hard time dealing with it. I was depressed, sitting in my room a lot. Especially when I got sick and didn't know what was going on, and they weren't doing nothing. It's hard. It's hard to deal with all of this stuff.

This declaration was orally sworn to by Shawn Crothers on June 9, 2020.

Under penalties of perjury, I declare that I have read the foregoing in its entirety to Shawn Crothers on June 9, 2020.

By:

Maiya Moncino

Date: June 9, 2020

DECLARATION OF TERRISE JOHNSON

1. My name is Terrise Johnson. I am 69 years old. I am currently incarcerated at Wayne County Jail in Division 3, pod H-1. I have been here since April 20th, 2020. My court hearings on March 26th, May 15th and June 5th were cancelled. Now, I don't have a future court date; when I check the machine, it is blank.
2. The day I arrived at Wayne County Jail, I suffered a heart attack. On April 24th, I went into surgery and they put two stints in my heart. On April 25th, my birthday, I had to go back into surgery to get three more stints put in. I have an irregular heartbeat, hypertension and high blood pressure.
3. I am supposed to take 9 different medications per day. Sometimes they only give me 6 of those pills and, on other days, I might not get any. The nurses come down here and say first call and last call and, if I can't get to them in time, they will leave without ever giving me my pills. The problem is, I am too breathless to get to them in time so I just have to lay in bed, suffering. Only one nurse, Ms. Morrow, is willing to check my blood pressure.
4. My nose is running and I get really cold. I sweat in bed. My body is aching and I am in pain. When I tell them, they tell me nothing is wrong with me. They are supposed to give me pain medication because the doctor said that I would feel pain around my chest and arms but they don't even do that.
5. The nurses throw away the KITE forms. If something serious were to happen to me, I would have to tell the deputy. Then, he would call up to healthcare and, over the phone, healthcare decides whether I should come up or not. It's not easy to get seen up there. The nurses usually want to come down to your pod to see you but they might not even do that.
6. They have me on a restricted diet but I don't even know what I am supposed to eat and what I am restricted from. They give me broccoli with no buds on it, just the stem. They give me bologna every day. The tray of food is ice cold when we get it. And a pack of ramen noodles is 89 cents in the commissary when it's 33 cents out in the streets.
7. They wanted to test me for the virus when I got back from the hospital after my surgery. I got tested at the hospital but Sergeant Lynch said that he was going to lock me up in the hole if I refused. I have never received any of my results. The results from the hospital are locked up upstairs and they refuse to provide me with a copy.
8. The guards have not told us anything about the virus. They just tell us to stay away from them, to stay away from their desk. Go down there. Go out there. Don't come up here. Some of them don't even wear their mask. They are really nasty and ugly towards us. They play god over the gloves and over the napkins. In the mornings, they hide the microwave.

9. There are 17 guys on this pod. If you want to watch T.V, you have to sit right next to another person. There are 5 spots on the couch in the back and 4 or 5 spots on the couch in the front. We are also required to eat meals at the tables in the center of the pod. There are four guys per table and 8 tables.
10. There is only one opening where you can look outside, smell the grass and get some fresh air. People gang up around there, sitting close together to get some fresh air. Everybody tries to get a spot by the opening to breathe some fresh air and get some sun.
11. To clean, we get a mop, water and some watered down spray. We also get a dirty rag that has been used a million times. When you clean with it, it is as if you are dragging germs around.
12. My toilet overflowed twice. The deputy brought me a plunger but I couldn't use it because I didn't have the strength or energy to push. I used the mop to soak up the water on the floor but I wasn't given any cleaning solution.
13. I am out of breath every day. I am tired. My head hurts. If I die in here, I just want them to know what happened to me.

This declaration was orally sworn to me by Terrise Johnson on June 10, 2020 because the Wayne County Jail is currently not permitting documents to be exchanged for signature.

Under penalty of perjury, I declare that I have read the foregoing in its entirety to Terrise Johnson on June 10, 2020.

Saba Rewald

Date: June 10, 2020

DECLARATION OF ANTHONY BLACK

1. My name is Anthony Black. I am 37 years old. I am currently incarcerated at the William Dickerson Detention Facility of the Wayne County Jail System. I have been here for 9 months now, and my release date is August 7, 2020.

2. I suffer from Type 2 Diabetes. Ever since my mother died in January 2020 of complications due to her Type 2 Diabetes, I have been very concerned about my own health. I have felt very alone since my mother passed, and I was not even allowed to attend her funeral.

3. I take metformin twice a day. I used to take insulin but now I don't take it all the time. I don't trust it, especially after my mom died. And I don't know what the nurses are giving me. I don't trust them.

4. My lifeline is my older sister. We talk as much as she can afford to, usually twice a week. But the calls are expensive, and I know she has difficulty paying for them. I miss my son, who is three years old. I have full custody of him. I also have a newborn daughter who I have not met yet.

5. Conditions in this jail are scary and it is obvious that we are not prepared. I am assigned to clean some common areas and feel especially exposed to areas that are dirty and not maintained. But the guards and workers rarely clean surfaces, so it's up to the people who are incarcerated to look after themselves. I think that the worst part of the jail other than the toilets is the gym, since people there rarely wear masks and there are so many shared surfaces.

6. I am very worried about my Diabetes. Every day, I feel sharp pain starting in my toes and fingers then shooting through my body. Sometimes my toes and fingers get numb. I also have a runny nose, and there are not enough supplies here. It takes too long to get medical attention. There's a form that the guards pass around to fill out kites. Everyone who wants to go to medical puts their name down. But it takes a long time anyways. I get to see a nurse twice a week because of my Diabetes, but the visits are short and they haven't fixed my soreness or numbness. What if I have a bad reaction to insulin or if it stops working or if I don't get it when I need it? I am worried, especially after my mom died.

7. In the whole jail, the only place where people actually socially distance and wear PPE is in the medical unit. They gave me Tylenol when I told them I had a runny nose. I was tested for COVID-19 and it came back negative. But before we got our results, we all went back to normal so I don't trust it.

8. I help serve meals. I serve breakfast every day at 5 in the morning with 3 other guys. We're the pod workers. Lunch is at noon and dinner's at 4. We finally got gloves in this week but we didn't have them before that.

9. The guards have not been helpful at all. They tell us to socially distance, but this is impossible, and even the guards can't help but brush up against the detainees when they pass us in small spaces. Everyone says they are scared, but not many of us are wearing our masks.

10. Most of us cannot socially distance in our cells. I'm lucky because I'm in a single, but most of the people here are in doubles, where you're right on top of each other, and anyways it doesn't matter because everywhere other than the cell, you're right next to each other.

11. Supplies are limited. I have never seen hand sanitizer here, and I was only given one roll of toilet paper. I had to buy another roll from another detainee. One roll does not last very long at all. In the last week, they finally started giving us toilet paper every other day. There is a liquid that they told us is disinfectant, but it's so watered down that I don't know if it does anything. They tell us to clean our cells frequently, but no one has enough to clean everything properly, especially the toilets and shared surfaces. We each got one thin blue mask to use, and we did not get new ones for two to three weeks. There are not enough gloves for us. They run out often.

12. The toilets are disgusting. Showers are okay after the trustees clean them once a week, but that does not last for long, and no one else wants to clean that shit. Some of them are clean sometimes but some aren't ever. Gnats come from the toilet. The toilet upstairs overflows when it flushes, and no one ever comes to clean it or fix it.

13. Jail staff rarely wear masks or gloves.

14. The air conditioning turns on and off often.

15. I heard that there are at least four detainees quarantined on the third floor. They tested positive for COVID-19. We call that floor "corona rock." Three of the people up there came from here, in Dickerson. I don't know about the fourth one. I also heard that people from another facility were moved there even though I don't think they ever tested positive. I went up to the third floor to go get my metformin, and I was in the same booth talking to a nurse as someone who I know was positive. He was wearing a mask but we were still really close to each other.

16. People who tested positive or are coughing get their temperature checked twice a day. I know that someone had a fever, and I have not seen him since, so maybe he is up there now on the third floor.

17. I was upset that it took so long for us to get tested. It should have happened before May. But not everyone wanted to get tested. I heard a guard tell people that anyone who refused a test would be sent to “corona rock.”

16. I really am trying our best to socially distance, but it’s impossible. I’m scared for my life. So is pretty much everyone else here. I can’t wait to get out.

This declaration was orally sworn to Anthony Black on June 8, 2020 because Wayne County Jail is not currently permitting documents to be exchanged for signature.

Under penalty of perjury, I declare that I, Faiz Pirani, have read the foregoing in its entirety to Anthony Black on June 8, 2020.

DECLARATION OF CHRISTOPHER LONG

1. My name is Christopher Long and I have been in the Wayne County Jail Division II, Block 306 since July of 2019. I am 36 years old and I suffer from bronchial asthma, acute hypertension, high blood pressure, and high cholesterol. I have an inhaler for my asthma and I take medications for my blood pressure and cholesterol.
2. I was tested for COVID-19 three or four weeks ago but I was never given my results. I don't think anyone got their results from the testing. We have not been given any protective gear other than three masks over the last few months. We do not have access to gloves or hand sanitizer.
3. The mop bucket comes Monday, Wednesday, and Friday morning. But it's usually just a broom, a mop, and a dustpan. Sometimes there is a spray bottle with that Simply Green stuff in it but it has clearly been watered down. I know it's supposed to be dark green but by the time it gets to us, it is light green. It looks like it's mainly water. We don't have any tissues or paper towels in our cells or common areas.
4. The common areas are cleaned once about once a week by us, but only if we get the cleaning solution. All ten of us on the unit share one shower. It is normally cleaned once a week but I can't remember the last time it was actually cleaned. They used to have trustees clean the showers but since they have been released, now it is up to the guards. We shower every other day if we are lucky. But the water has been broken in here so sometimes we go days without showers if the officer on duty doesn't know how to turn the water on from behind the control panel.
5. The guards have different cleaning supplies from us that they use to clean their stations. They have Lysol spray, sanitizing wipes, and spray bottles filled with cleaning solution.
6. We are given three bars of soap that are tiny for the entire week. The bars of soap are about two inches long and one inch wide and they are supposed to last the whole week but you can only really wash your hands a few times before the whole bar is gone.
7. It is really hard to social distance in here. There are ten of us in one block and there is no way for us to practice social distancing in the common areas. We share one remote for the TV, one phone, and we all have to sit next to each other when we eat because there aren't enough tables. The common area is maybe 20 or 30 feet long and 4 feet wide. When we watch TV, most of us stand but oftentimes people crowd around the small TV so that they can see. I try to keep my distance since I'm a big guy. But I can usually only get about one or two feet away from the person sitting or standing next to me.

8. In our cells, we have a bed, a sink, and a toilet. There have been problems with the toilets overflowing, like the guy across from me whose toilet is plugged up every other day. Our cells are closed with bars but the cells are so close together that you could reach through the bars and touch someone in the cell next to you. The guard station is also only a few feet away from the cells.
9. There has been no movement to the medical ward and ever since COVID-19 hit, it seems like they aren't taking anyone anymore. I've put in three kites in the last month or so and when I tried to ask why they weren't being responded to, the nurse said that they weren't taking any patients because of COVID-19. The kites have been about trying to get a new inhaler. Normal kite pickup is once a week but sometimes you can get a nurse doing her rounds to submit your kite. But only some nurses actually submit the kites to the doctor.
10. I know that some of the guards have been sick with COVID-19 because I've seen some of them leave and then come back while others have not returned. They also talk about it all the time and even told us that some of them had been sick. But when it comes to us getting sick, it is hard to get any information about COVID-19 from the guards because they keep everything so hushed up and try to keep that information a secret from us. They don't tell us which inmates are sick or information about the disease in general. We get all our information about the disease from the news.
11. Everyone is fearful and scared in here and it is frustrating. All the inmates seem scared to even just interact with each other. And the guards don't seem to be taking the masks seriously, even though many of them have had COVID-19. When the guards don't wear their masks, we ask them why but they just say to stop hollering. One guard threatened to turn off our TV and our phone when we asked him where his mask was. But then whenever one inmate forgets his mask, the guards threaten to lock that person down.
12. Some of the blocks on the fourth floor are quarantined because a few people tested positive for COVID-19. They moved people around even before they had tested everyone, though, so some people who may have been positive were moved to different parts of the facility. The guy right across from me on the third floor now was moved from the fourth floor before he was tested. This makes us nervous that people are carrying COVID-19 and spreading it around when they move.

This declaration was orally sworn to Christopher Long on June 8, 2020 because Wayne County Jail is not currently permitting documents to be exchanged for signature.

Under penalty of perjury, I declare that I, Clara Butler, have read the foregoing in its entirety to Christopher Long on June 8, 2020.

DECLARATION OF DANIEL BRYANT

1. My name is Daniel Bryant. I am 41 years old. I have been detained at the William Dickerson Detention Facility since March 6. I was in C-1 until about April 20. Since then, I've been in E-1, E-3, and F-3. Now I'm in E-3. My next court date is June 22.
2. I have asthma. I also have injuries from a car accident in 2017. My whole left side is messed up: my back, my neck, my ankle, and my left shoulder. I've got a limp from that. Sometimes it'll act up, sometimes it won't.
3. My asthma and my injuries are bad because when I first got here and all this was going on, two of the doctors had passed away from COVID-19. The deputies kept denying me medical treatment because there were no doctors.
4. I never experienced my asthma this bad. Up in here, it's real dirty. We try to clean up as best as we can, but my asthma is real bad. When they opened up this gate, the pollen and everything comes in here. There's a pollen tree that sits right up in front. And that reacts with my allergies. E-3 is a closed pod. They're giving us recycled air. Sometimes that triggers my asthma. It's kind of hard to breathe sometimes. I don't have an inhaler. I never had to take it before. I was taking it when I was a child, but not since I was a teenager. I'm scared. I'm real scared. I try to keep my mask on 24/7.
5. Two months ago, I heard that the jail has a doctor again. I filled out a kite to see one but they still haven't taken me to see one. It's been two months.
6. I'm allergic to citric acid. It took them about a month just to give me my dietary tray. I had a breakout. I just catch hives when I eat too much tomatoes or citric acid. It's terrible. I'm itching and scratching. I break out all over my arms, the back of my neck, my chest. I'm itching and I can't take a shower because it spreads. They was giving me orange juice, tomatoes in mostly every meal -- spaghetti and stuff like that, or chili with tomatoes in it. I kept trying to tell them and they kept giving me a hassle.
7. I broke out in hives for about a week. I kept trying to tell the other nurses and they didn't want to talk to me. One of the guards ended up stopping the nurse and made her look at my rash, and that's when she ended up giving me the medication. It was a whole week after I first broke out.
8. Before COVID, it cost \$4 to put money on commissary. Since early April, it costs \$10. They're reaping the benefits off our people.

9. There was someone in my unit who had COVID, and they just put another person with COVID back on this pod. He had it when I was on C-1. They sent him off to another pod, and now two weeks later they put him on this pod, in E-3. He still seems sick and is getting medication. They're still bringing in new people here who are off the street.
10. I just don't feel the same as I was when I first came in. I think I might have had COVID around March 24, when I was in the C-unit, which is an open pod. Mostly everyone I've been in there with, we all got sick. That's when I started drinking the orange juice, and that's when I broke out. I drank it to keep myself healthier. I try to take as much Vitamin C as I can. I was sweating through the night. I had a fever. I kept taking Ibuprofen and Tylenol from commissary. My wife kept telling me to drink hot water. We got some lemon Kool-Aid on commissary, and I was buying those to put in my water to drink before I went to sleep. I was really fatigued and sleeping a lot. I used to work out to try and stay healthy, but I didn't have enough energy to keep working out. My body was hurting super hard. Once my wife told me what to do and take, I was sharing that information. The guards just told us to wear a mask and stay six feet away from them.
11. We started counting and counted 40 deputies that had COVID. They all went to a party and all got it. One of the deputies was talking about it. Two jail doctors and three kitchen workers died from COVID. One lady from commissary had it.
12. Now, the deputies who had it are coming back. They're coughing and sneezing during the night while we sleep. When we wake up and we eat, we don't know if the sneeze landed on the phones. They just openly don't wear the mask, but they tell us they'll lock us down if we don't keep our mask up.
13. One guy who was in C-unit when we were all sick, he couldn't walk. They had him in a wheelchair for about a week. He woke up and was like "man I can't move. I can't get out of the bed." Sometimes he wasn't even eating. He would sleep all day. They didn't move him to quarantine because at that time they wasn't even testing us.
14. When I got to E-unit, they told us that a guy had died from COVID, Michael Meschinski, and had just left the pod. They released him, threw his clothes at him, and made him sign some paperwork. By the time he got to his house in Taylor, he ended up dying in the house. His girlfriend went in the house to find him dead. They told us when I was in C-1 that he passed away. When we moved from C-1 to E-1, I moved right next door to where he had been. They didn't clean his room or nothing. I was scared because I didn't know if he'd touched something. I didn't know what was going on. It was just nasty up in here. It took a whole bunch of us to try to clean it as best we could, even though the guards didn't

want us actually cleaning it. They was telling us to go in our room and shut the door so we couldn't clean. We didn't have masks or anything.

15. On one of our pods, the electricity kept going out. They moved us three times during one day. We moved from E-3 to F-3 to C-1. Everybody was tired. By the time we got to C-1, the deputy was saying something and one of the guys called him a bitch. The deputy got mad and said "who said it?" Nobody said who it was, so the deputy made everybody get in the gym. We were in there for at least twenty minutes. About 40 people. The gym is not that big, maybe a small workout room. It wasn't no six feet. It was two feet, if that, between people. Two people, if not more, were definitely sick with COVID symptoms and we could tell that they were sick. They ended up testing positive for COVID. He endangered all our lives right then and there.
16. They change our masks every two weeks, if that.
17. I was tested on May 9. We keep asking questions about it, but they won't give us any answers. They keep saying "if you haven't been moved, you're alright." They won't tell us the results. They took a nose swab and took our blood. They didn't have us sign consent forms. They had some outside people come in and take our blood. I'm scared because we didn't know what was going on. Two weeks later, after we kept asking them what's going on with the results, they moved two people up out of here. We've been sitting around with them. We've been playing cards with them, everything. We might be back infected. We don't know.
18. They cut the telephone calls off on us, too. They was giving us free COVID-19 phone calls for the people who haven't talked to their family and who don't have money on their phones. And now they cut it off and they haven't been able to talk to their people. It's been a whole month and a half since we haven't had it. Some people inside haven't talked to their families in a month and a half.

This declaration was orally sworn to by Daniel Bryant on June 9, 2020.

Under penalties of perjury, I declare that I have read the foregoing in its entirety to Daniel Bryant on June 9, 2020.

Maiya Moncino

Date: June 9, 2020

DECLARATION OF DARIUS CAMPBELL

1. My name is Darius Campbell, I am 28 years old, and I have been in Division II, Block 306 of the Wayne County Jail since December of 2019.
2. I was tested for COVID-19 about two months ago but I never got the results. I have an underlying condition of bronchitis. When my bronchitis flares up, I have shortness of breath and I can't be around any smoke. We are all scared of getting the coronavirus and have been getting our information through the news. The guards do not tell us anything about COVID-19. They put a poster on the wall to tell us to keep our hands washed but they don't really talk to us about COVID-19 at all.
3. It is incredibly hard to clean our spaces. The guards bring the bucket of cleaning supplies every morning but there aren't any disinfectants, only a mop, a toilet brush, a broom, and a dustpan. We have to fill the bucket with water from the shower but the shower has been broken for a while and we have to ask a guard to turn on the water, which not all the guards know how to do. The mop is also broken so that it doesn't twist to release any water, you can only really move it side-to-side and that doesn't clean anything. There used to be cleaning solution in the bucket but it ran out and hasn't been replaced.
4. There is one phone in our unit for ten people to share. This phone doesn't ever get cleaned. Our common areas are cleaned about once a month by certain guards.
5. We only get our towel and bedroll washed about once every two and a half weeks. We are given one towel to dry ourselves with but if we want a washcloth, we have to buy it from the commissary. To wash our own clothes, we aren't given any laundry soap. We buy laundry soap from the commissary and then we wash our own clothes in the shower and air dry them in the unit.
6. The ventilation in here is bad. None of the windows open and there is just one vent that circulates through two blocks that are next to each other and separated by bars. We never get to go outside.
7. The cells are very close together and if two people reached their hands through the bars, they could touch. Inside my cell, I have a toilet, a bed, and a sink that only has cold water. The cells are very small.
8. We are given soap to clean ourselves with once a week, three little bars that are not antibacterial. I often run out of soap and have to borrow someone else's. We could shower everyday but if you get a guard that doesn't know how to turn on the water, you don't get to shower that day. The shower is supposed to be cleaned every week but it is really more like every nine days. The single shower in our unit is shared by the ten of us.

The shower has black mold in it which doesn't come off even after the officer comes to clean it. There are just toilets in our individual cells and I've seen them overflow on occasion before.

9. It is impossible to socially distance yourself in here. In our common area, there are two tables that fit about four people each. We are always right next to each other when eating meals. The food is prepared by inmates and I don't think they have any protective gear. The only way you can be socially distant is if you never leave your cell.
10. The guards serve us the food but sometimes they mess with it. Last week, there was a problem with one guard who said we were being too loud and when he came back the next morning to serve us food, all ten cakes that were supposed to be our breakfast were just piles of crumbs. It looked like he had purposely run his hands through the cakes to make them inedible.
11. Whenever we ask about COVID-19, the guards get mad at us and threaten to lock us down. We are all upset because we are scared of getting the coronavirus and the guards won't tell us anything. Only some of the guards wear their masks at all times. There are always two or three guards who don't have their masks on during the day and they don't have gloves on when they search us.
12. One time, when we asked a guard where his mask was, he said that he had adapted to the coronavirus because he had already been sick with it. I know of two other guards on this floor who also had COVID-19. We have been given masks about every two weeks. But whenever the inmates don't wear their masks, the guards threaten us with lockdown and threaten to take away our phone and television.
13. I've put in kites for medical treatment but they are not taking them. You have to wait for the right nurse to come in order to even try to get it through. To get a kite to fill out, you have to ask for one but not all the nurses have the blank kites. I put one in a while ago and it was never answered.
14. I heard that the fourth floor was locked down for everyone with COVID-19. I heard that they weren't able to move around really at all. Just recently, they moved someone down from the fourth floor into our unit, which makes me nervous since he was with all the people who are sick.

This declaration was orally sworn to Darius Campbell on June 8, 2020 because Wayne County Jail is not currently permitting documents to be exchanged for signature.

Under penalty of perjury, I declare that I, Clara Butler, have read the foregoing in its entirety to Darius Campbell on June 8, 2020.

DECLARATION OF ISAAC EPPS

1. My name is Isaac Epps. I am 55 years old and a press machine operator. My aunties and uncles live in the Detroit area. I also have a son and a granddaughter who live in Detroit.
2. I am currently in Division II of the Wayne County Jail System, on the 10th floor SW. I have been here since April 28th. I'm worried to death every day that I am going to catch the corona. It is starting to weigh on my mental health and has made this a really hostile environment. Everyone I know is scared.
3. I live in a cell with two of us in here. The cell is very small. It's a two-man room but it's not enough for two of us. I'm 6'5" and my bunkie is 6'4" and it's very hard for us to be in there at the same time. I sleep on the bottom bunk and my cellmate sleeps above me. It's the two of us in there, and we have a toilet that's connected to the sink where we get drinking water from. You can tell the toilet is really old because there are always plumbing problems. The same sink that is connected to the toilet is where we get our water. As soon as you let go of the button the water goes off, so you can't wash your hands for more than three seconds. And there are these giant roaches that somehow come through the toilets, and there are water bugs. This is the same water we drink.
4. I have Type 2 Diabetes and sometimes am not able to get my insulin on time. I also have high blood pressure and Hepatitis B. I filled out a kite once because they gave me the wrong dose of blood pressure medication. I only needed 10mg, but they gave me 40mg. My feet swelled up really big and so I filled out the kite, but it took me a week to see the nurse.
5. The medical ward is downstairs, on the second floor. We took an elevator to get there. There were a few of us in the elevator together, which wasn't very big. Even in the medical ward, not everyone was wearing a mask when I went there. It was the only place in the jail where I've seen anyone wear gloves.
6. Even though all of us inmates know that this coronavirus is serious, the guards seem really laid back. Most of the guards say that they aren't the ones who would catch the corona in here, and I don't think they care about us. When we ask for supplies they say that we weren't worried about disinfectants outside, so why bother getting so worked up over it now? But we don't even know if these people in here with us have been tested yet or not, or what their results are.
7. The guards have masks, but they don't always wear them. It's not really possible to socially distance here. We have to eat, and it's impossible for us to not be right next to

each other when we do. It's about 5 inches between the tables where we eat and the phones. Our meals are the same every day: stale corn flakes, corn bread, milk, and the same deli meat sandwich for dinner every day. It's not enough.

8. They tested me for COVID-19 in early May. They took my temperature and my blood but didn't give me any medication. After I was tested, I went back to my cell. I never got my test results, and neither did a lot of the guys I know who got tested when I did. We don't know what that means—if we have it or not. People who refused to get tested were told they'd be sent to the quarantine room, so everyone I know got tested because they didn't want to be sent to the room and catch it. We pay for everything in here—phone calls, video calls, even cleaning supplies that we need. I am scared to get it because of the lack of supplies
9. The guards don't give us the supplies we need. We don't have any hand sanitizer. The showers are flooded every morning. Me and another inmate have taken it into our own hands to try to keep things clean. We sweep the water out of the showers. The showers are filthy after we get rid of the water. We try to scrub it down with what we have, but the smell of mold never goes away. We don't have gloves, even when we clean.
10. The masks they gave us are thin and blue and are hard to keep around your ears. Some guards have the same masks that we have, but some have the good ones that they may have brought from home. Others don't bother wearing masks at all, which puts us in danger.
11. We were given one very thin bar of soap, and they cost about \$1.10 or \$1.25 to replace. We got one roll of toilet paper, and we have to help each other out because commissary runs out of toilet paper all the time.
12. I've been wearing the same clothes and sleeping on the same linen for the past three weeks. The bleach that we get to clean our cell is so watered down that I doubt it does anything but move the filth around. The mop we have is never clean, and the bucket it's in stinks. Still, I try to clean every day because no one else will. No one tells us how often to clean or what to clean, but we try the best we can to keep us safe.
13. There are no windows in my cell. The A/C is always blowing recycled air, and I don't know what's in that air. There are no windows in the common area either.
14. I try to wipe down the tables every morning because so many people touch them. The chairs are bolted into the ground and the chairs are connected to them, so we're all next to

each other when we eat. The phones and tablets are also probably where a lot of the spread might happen.

15. I know that some people who were sick were sent down to a floor on the Old Side. That's where they send people who have the virus. I only know this because some guys on my floor went downstairs on their way to court and saw a sign that said that it was a corona quarantine room. I don't know who's down there, though.

This declaration was orally sworn to Issac Epps on June 10, 2020 because Wayne County Jail is not currently permitting documents to be exchanged for signature.

Under penalty of perjury, I declare that I, Faiz Pirani, have read the foregoing in its entirety to Isaac Epps on June 10, 2020.

DECLARATION OF JAMES ANTHONY

1. My name is James Anthony. I am 32 years old. I have been detained at Wayne County Jail, in Division III, since May 10. I'm in Unit F-1.
2. I have asthma, bronchitis, and emphysema. I've been having chest pain. I told the nurse, and she gave me these inhalers. They work from time to time, but not really like I need them to work. It takes too long for my chest to stop hurting. On the outside, I use a Symbicort inhaler. These inhalers are a Vasco. I'm trying to get on the Albuterol inhaler, but the person I really need to see, the head physician, is not here. I don't know why. The deputies tell me to put in a kite. That's it.
3. I'm worried about catching the virus because I've got asthma. The first thing that gets hit is the airway passages to your lungs, and it shuts off your breathing.
4. I'm really worried about corona transmission from food because I'm not watching the people that's making the food. I don't know if they've been checked. I don't know what's going on.
5. It's nasty as hell in here. Nothing gets wiped down. It's messed up. Showers are nasty. I've seen mold in the showers, and they don't have nothing to clean that with. I'm breathing in the mold and getting that into my lungs. The showers don't get cleaned. We don't have no real cleaning supplies in here. They're not doing nothing to help us in here.
6. You know this place is dirty, and we don't have access to bleach. We have access to Simple Green. We don't have anything that can actually defeat the virus. Simple Green is a cleaning product but it's not like bleach. Simple Green is for taking stains off of stuff. If you had a ceramic tile floor and you spilled some Kool-Aid on it, that's what Simple Green would be for. It's not something to actually clean a phone with or clean a table with. Wiping it down with Simple Green is just defeating the purpose. It's not good. I don't feel good about it at all.
7. The sheriffs walk around with no masks and they be telling us to pull our masks up. It's crazy. What if they bring it in here to us? Just because your temperature gets checked, don't mean that you can't be a carrier. We have to wear our masks for two weeks before they change them.
8. Laundry is once in a blue moon.

9. There's six phones on my block. And whoever uses the phone, they're not wiping them down. They're not doing nothing. The phones are cleaned probably once a night. When people go to talk, they take their face masks down and talk on the phone. And then the next person puts their hand on it. We have Simple Green to clean it, but no real stuff to defeat a virus. Sometimes that Simple Green is even watered down.
10. To clean, we get these little bars of soap that irritate my skin. It makes my skin itchy and dry. It takes out all the moisture out of your skin and it makes me itchy and dry and I end up itching my skin down to where I constantly bleed. That's how bad I scratch my skin.
11. I was tested for COVID-19 on June 9. It's messed up that I'm just now getting the test. I'm really worried about the spread, because I could have it.

This declaration was orally sworn to by James Anthony on June 9, 2020.

Under penalties of perjury, I declare that I have read the foregoing in its entirety to James Anthony on June 9, 2020.

STATE OF MICHIGAN

IN THE CIRCUIT COURT FOR THE COUNTY OF WAYNE

WAYNE COUNTY JAIL INMATES et al.,

Case No. 71-173217-CZ

Plaintiffs

Hon. Timothy M. Kenny

v

WILLIAM LUCAS et al.,

Defendants.

SUPPLEMENTAL AFFIDAVIT OF ADAM LAURING

Adam Luring, being first duly sworn on oath, deposes and says:

A. Materials Reviewed:

1. On May 26, 2020, I reviewed results of COVID-19 infection and antibody tests conducted on Wayne County Jail (“Jail”) Detainees in early-mid May. The results indicated the following:

171 of 689 unique people are currently infected with COVID-19 or tested positive for antibodies.

Both (virus and antibodies) – 46

Only Virus – 14

Only Antibodies – 116

Total – 176/689

2. On June 7, 2020 I reviewed in full the policy documents, court orders, and affidavits submitted as Exhibits 1-10 to the Defendants’ brief.¹
3. On June 9, 2020 I reviewed the Inspection Report of Dr. Fred Rottnek.
4. On June 11, 2020 I reviewed the affidavits of Bridgette Jones and Louis Shicker and the supplemental declaration of Mark Morrissey.

B. Supplemental Information About My Background and Expertise in Infectious Diseases

¹ A complete list of the policy documents, court orders, and affidavits which I reviewed are attached hereto as Exhibit A.

5. I received my medical degree from the University of Washington in 2002. I subsequently trained as a Resident in Internal Medicine at the University of California, San Francisco (UCSF) – one of the country’s top academic medical centers. In recognition of my skills as a clinician and teacher, I was selected by the faculty and my peers to serve as Chief Medical Resident.
6. I subsequently trained as a Fellow in Infectious Diseases and have been Board Certified in Infectious Diseases (American Board of Internal Medicine) since 2008. I have practiced as an Infectious Diseases specialist, first at UCSF, and since 2012, at the University of Michigan.
7. I completed a PhD in Molecular and Cellular Biology at the University of Washington in 2000. My thesis research was on how viruses like HIV cause disease. I performed post-doctoral research in virus evolution from 2007-2012. I have directed a research laboratory at the University of Michigan since 2012. I continue to study how viruses evolve and spread with a focus on influenza and other respiratory viruses. Based on my scientific success and track record of innovation, I have received several highly competitive awards, including: the Pfizer Young Investigator Award in Vaccine Development, a Doris Duke Charitable Foundation Clinician Scientist Development Award, and a Burroughs Wellcome Fund Investigator in the Pathogenesis of Infectious Disease Award.
8. I participate in the US Hospital Vaccine Effectiveness Network and the US Influenza Vaccine Effectiveness Network, two large CDC-funded studies of influenza virus epidemiology in communities and healthcare environments. I am the Principal Investigator on a 5-year, \$3.7 million NIH grant on respiratory virus transmission, which recently scored in the top percentile and is expected to begin on July 1, 2020.
9. I am currently an Associate Professor with Tenure in the Division of Infectious Diseases and the Department of Microbiology and Immunology at the University of Michigan.
10. In 2019, I became a Fellow of the Infectious Diseases Society of America, an honor given to individuals who have demonstrated excellence in Infectious Diseases. In 2020, I was elected to the Governing Council of the American Society for Virology.
11. I cared for one of the first two patients with COVID-19 in the State of Michigan on March 10, 2020. I watched Governor Whitmer announce these first cases while at the patient’s bedside in the intensive care unit at the University of Michigan Hospital. From mid-March through the end of May, I spent 5 weeks taking care of COVID-19 patients at the University Hospital. Most of the patients were in the Intensive Care Units.
12. Since March, I have been instrumental to the University’s response to COVID-19. I developed our diagnostic and testing guidelines, contributed to institutional treatment guidelines, and worked closely with hospital infection control to manage patient flow

over the first two weeks of the Michigan epidemic. I helped to set up our Regional Infection Containment Unit (RICU), a dedicated COVID-19 intensive care unit.

13. My laboratory performed key experiments for a University of Michigan N95 disinfection project, which informed the hospital's decision to process masks for re-use at a time of critical PPE shortages
(<https://www.medrxiv.org/content/10.1101/2020.04.28.20084038v1>). We are in the process of sequencing SARS-CoV-2 specimens from 400 patients and 250 health care workers, with the goal of understanding COVID-19 transmission and spread.
14. I helped to set up the Medical Center's COVID-19 Patient Registry and the COVID-19 Biospecimen Repository. I serve on the University's COVID-19 Research Prioritization Committee and COVID-19 Clinical Trials Feasibility Review Committee. I also serve on the Institutional Biosafety Committee, which reviews all protocols for pathogen research at the University of Michigan. I am Co-Director of the University's new Michigan Center for Infectious Disease Threats.
15. Based on my training, my expertise in respiratory virus transmission, and my deep and varied experiences with SARS-CoV-2 and COVID-19, I am very well qualified to comment on many aspects of this case, including: basic biology of SARS-CoV-2 and methods for its inactivation; how this virus transmits from person to person and spreads through communities, healthcare settings, and congregate environments; infection control procedures; COVID-19 epidemiology; diagnostic tests for COVID-19; and clinical care of patients with COVID-19.

C. Summary of Supplemental Findings and Recommendations:

16. My review of the above-listed information and materials does not change my previous findings, opinions, and recommendations as set forth in my initial Declaration, and I reiterate the need to act swiftly.
17. In addition to my previous recommendations, after reviewing the information enumerated in ¶¶1-3 in conjunction with my expertise in virology – particularly the evolution and transmission of RNA viruses – and my recent and ongoing research on the evolution and transmission of COVID-19, it is my professional judgment that:
 - a. Some of the Jail's policies, directives, orders, and guidance are grossly inadequate;
 - b. If the following recommendations by Dr. Rottnek are not immediately followed, the detainees in each division of the Wayne County Jail, and particularly Division II, are at high risk of suffering from preventable infection, serious illness, and death:
 - i. Continue reducing the population in all three facilities as quickly as possible, so that medically vulnerable populations have fewer exposures to

potentially deadly coronavirus and social distancing measures can be better followed by those remaining in physical custody.

- ii. Discontinue housing inmates and staffing of workers in the secured areas of Division II as soon as possible. This environment is unsafe for more reasons than COVID-19. Dr. Rottnek notes that it appears that black mold or mildew flows from the buttons controlling water flow. This is a potential health hazard. Dr. Rottneck also reports that vents in cells are usually at least partially blocked by dirt and airborne dust. Poorly ventilated spaces will place inmates at increased risk for COVID-19 and other respiratory infectious diseases (e.g. influenza, tuberculosis).
- iii. Follow the Centers for Disease Control and Prevention (CDC) Interim Guidance on the Management of Coronavirus Disease 2019(COVID-19) in Correctional and Detention Facilities,
<https://www.cdc.gov/coronavirus/2019-ncov/community/correction-detention/guidance-correctional-detention.html>
- iv. Increase regular and as-needed testing for COVID-19 infection for inmates, staff, and any other visitors.
- v. Post and distribute to all stakeholders up-to-date education about prevention, spread, and treatment of COVID-19. This information should also include the definitions and importance of social/physical distance, and the use of personal protective equipment (PPE).
- vi. Post schedules for cell and common space cleaning with CDC-approved disinfectants that kill coronavirus.
- vii. Adjust medical services to meet the demand of this population during the pandemic. Stop disincentivizing inmates from sick call and seeking assistance.
- viii. Provide aftercare planning to inmates so that they are aware of practices to safely return to their homes and communities, since many have been exposed to COVID-19.

D. Test Results

- 18. The results of testing conducted May 7-9 revealed that 60 detainees out of 689 unique detainees tested positive for SARS-CoV-2, the virus that causes COVID-19. This indicates recent or current infection. Including the 116 detainees who tested positive for antibodies (past or current infection), the total rate of infection was 25%.

19. According to the Affidavit of Mark Morrissey, the regional director of Wellpath, of the 939 total tests conducted, 85 detainees tested positive (9%). At the outset, I note two issues with his attestations. First, it is unclear whether the tests are for the virus or antibodies (serology), when all of the tests were performed, and why the numbers are different from those reported in paragraph 1. These data cannot be accurately analyzed without that information. That being said, by any standard, the rate of infection within the Wayne County Jail is high.
20. Second, in his affidavit, Mr. Morrissey states that positive tests “appear to be lower than what is the general public.” His statement is incorrect. According to the New York Times COVID-19 tracker, as of June 8, there have been 21,455 cases of COVID-19 in Wayne County. This corresponds to 1,218 per 100,000 people in Wayne County, or 1.2%. These estimates are supported by data from the Michigan Department of Health and Human services, accessible at <https://www.mistartmap.info>. Using Mr. Morrissey’s report of the data, then, the rate of infection in the Wayne County Jail is almost 10 times higher than the general population in Wayne County. Using the actual testing data provided (paragraph 1), the rate of infection in the Wayne County Jail is 20 times higher than what has been reported for the general population in Wayne County.
21. Whether the rate of infection in 10 or 20 times that of the public population in Wayne County, the results suggest that the Jail is not practicing all of the mitigation and prevention efforts set forth in the directives, orders, and policies adopted since March 13, 2020.
22. Further, the results upon which Mr. Morrissey relies are now more than one month old. Because of the rate at which COVID-19 spreads, and the Jail’s failure to practice the most basic protective measures – e.g. adequate access to soap, protective wear, physical distancing, exposure to open toilets, adequate sanitization of high-touch surfaces and shared spaces – the rate of infection, at this point, might be undercounted. Without retesting the entire population, it is impossible to know the infection rate.
23. Mr. Morrissey’s misleading analysis and misreading of the results raises serious questions about his understanding of COVID-19 and the diagnosis of infectious diseases. In turn, it raises serious questions about the standard of medical care provided to detainees at the Wayne County Jail.

E. Affidavits of Bridgette Jones and Louis Shicker

24. Ms. Jones and Dr. Shicker make the same statistical error as Mr. Morrissey did in his affidavit and arrive at the same incorrect and misleading conclusion. In paragraph 18, she states, “Based on this statistic, it would appear that around 10% of the test population at the Wayne County Jail was positive, yielding decreased positivity rates to that of the community and other comparable correctional facilities.” I will reiterate, the “test population” at Wayne County jail was all inmates. Therefore, it was a true survey of the entire population. The relevant comparator, would be all residents of Wayne County. The 10% statewide estimate cited by Ms. Jones, Dr. Shicker, and Mr. Morrissey appears to be

the number of positive nucleic acid tests in the State of Michigan divided by the number of tests performed. While we don't know the exact infection rate in Wayne County or the State of Michigan, a more valid comparison would be to divide the number of positive tests/cases in Wayne County by the total population of Wayne County. As above, this gives a value of 1.2%, nearly ten-fold lower than estimated in the Wayne County jail.

25. Ms. Jones and Dr. Shicker highlight a number of policies and directives issued by Wayne County jail officials, dating back to March 13. This was 3 days after the first cases diagnosed in the State of the Michigan. Given that their testing on May 9 indicates an infection rate nearly 10-fold higher than that in Wayne County, I would suggest that these measures either have not been implemented or have been ineffective at limiting the spread of this infection in the jail.
26. In response to paragraph 20 of Ms. Jones's affidavit and paragraph 21 of Dr. Shicker's affidavit, I should make clear that my expert opinion derives not only from my review of the CDC guidelines for correctional facilities, but from by extensive experience in respiratory viruses and other infectious diseases, as documented in paragraphs 5-15 of this affidavit.
27. As above, Ms. Jones' statement of "decreased positivity rates" (paragraph 22) is incorrect and misleading. Accordingly, I strongly disagree with her conclusion that, "the risk of transmission was minimized." The same is true for Dr. Shicker's similar statements (paragraph 23). It is also my professional judgment that detainees should not be double bunked because double bunking increases the likelihood that the virus will spread.
28. I agree with Ms. Jones and Dr. Shicker that social distancing can be achieved in many ways. However, nearly all guidelines require that a distance of 6 feet in all directions be maintained. This is because it is believed that respiratory droplets produced when a person breathes, talks, coughs, or sneezes can up to travel up to six feet
29. As above, and for the reasons stated in my earlier declaration, Ms. Jones and Dr. Shicker are incorrect in their judgement that "inmates placed in any division of the Jail are not at a significantly higher risk of infection for COVID-19 when compared to the population in the community."
30. As Ms. Jones participated in the development of the CDC guidelines for correctional facilities, she should be aware that the guideline states, "Although social distancing is challenging to practice in correctional and detention environments, it is a cornerstone of reducing transmission of respiratory diseases such as COVID-19."
31. I agree with Ms. Jones and Dr. Shicker that it appears that "Wayne County Jail began issuing policies and directive to address the pandemic," but as stated earlier, the infection rate suggests that the Jail is not practicing all of the mitigation and prevention efforts set forth in the directives, orders, and policies adopted since March 13, 2020. Further, Dr. Rottnek, in his report, stated that he observed non-compliance with some critical policies.

And, for the reasons discussed in section “F” it is apparent that some of the policies are dangerously inadequate.

F. Jail Policies, Directive, Orders, Memoranda

32. In reviewing directives from the Wayne County Sheriff’s Office to Wayne County Jail staff, it is apparent that as early as March 13, 2020, Wayne County officials were aware of the necessity of protective measures. The March 13 Directive sets forth protective measure for staff, consistent with CDC guidelines, to be “immediately implemented”:

- a. Donning protective clothing: Tyvek suits, N-95 Respirator Masks, goggles, and gloves;
- b. Providing masks to detainees with suspected infection;
- c. The importance of distancing
- d. Frequent handwashing for at least 20 seconds;
- e. Use hand sanitizer if soap and water is unavailable;
- f. Use a tissue when you cough or sneeze;
- g. Clean and disinfect frequently touched surfaces daily; and
- h. Stay home if staff is sick.

33. The policies are dangerously inadequate for the following reasons:

- a. They fail to provide for mechanism to achieve meaningful social distancing between detainees;
- b. They fail to provide any added protection for medically vulnerable detainees for whom the risk of serious illness or death is much greater;
- c. The surgical masks provided every two weeks (per the April 10 Directive) are single use. They are not designed to be worn beyond one or two days, and after that time, they will not prevent or mitigate the spread of infection.
- d. They fail to reliably identify infected staff. Reliably identifying COVID-19 infections amongst staff is critically important to preventing the spread of COVID-19 inside the Jail because they cycle in and out of the facility daily which increases their likelihood of exposure and bringing the infection inside of the facility at the start of each shift. As set forth in the April 14 General Memo, mandated staff testing was extremely limited. Presently, the Jail appears to be using a symptom and exposure-based approach to identifying infections. As up to 40% of people transmit prior to the onset of symptoms, this approach fails to identify contagious carriers in almost 1 in every 2 cases.
- e. They fail to ensure detainees have access to: adequate soap for handwashing, clean laundry, disinfectant and cleaning products for high-touch surfaces and shared spaces, adequate protective wear, Kleenex or tissue.

- f. Directives from March 20, 21, and 27 for identifying infection and quarantining detainees, as well as the new June 2 inmate testing protocol are inadequate. The incubation period for COVID-19 is 4-7 days. Thus, depending on the date of infection, the 72-hour initial intake quarantine period may not assist in reliably identifying infection. Nor will it assist with identifying pre-symptomatic or asymptomatic infected persons. For the same reason, the intake testing may not reliably identify infection. A follow-up test 14 days later, as ordered, will reliably identify infection, but, according to the written policies, at that point the detainee will no longer be in quarantine and, if infected, will likely have infected other detainees and/or staff. This is particularly true if the detainee is asymptomatic. 40% of infections are the result of asymptomatic carriers.
- g. The frequency with which detainees receive clean clothing and towels creates a heightened risk that infection will spread.

G. The Inspection Report of Dr. Fred Rottnek

34. The following conditions, as observed by Dr. Rottnek, seriously increase the risk and spread of infection (for the reasons outlined in my initial declaration):

- a. Social distancing is impossible for detainees at Division II;
- b. Social distancing is impossible for staff doing rounds at Division II;
- c. Lack of physical barriers on front cell walls at Divisions I and II allow for aerosolized respiratory droplets to freely pass from one cell to another;
- d. Staff and detainees inconsistently wear personal protective wear, including masks. And, in many instances, neither staff nor detainees correctly donned face masks. Particularly troubling is Dr. Rottnek's observation of two staff members in the medical unit "sitting at their desk, shoulder-to-shoulder, about a foot apart, and they were not wearing [masks];
- e. Medical units in Divisions I and II are understaffed, and the medical treatment in Division II falls below a basic standard of care.
- f. Kitchen staff in Division I reported that the kitchen is cleaned only once daily;
- g. Irregular clean laundry;
- h. None of the staff knew how to don plastic suits;
- i. Reports of insufficient access to cleaning supplies and personal hygiene products, such as soap, disinfectant, and cleaning supplies, matched the attestations in the declarations I reviewed more than one month ago, which indicates that Jail has

failed to take the necessary steps to provide detainees with these products and supplies consistent with CDC standards, and

- j. Insufficient information about measures to protect against infection or instructions for adequate cleaning.

35. I agree with all of Dr. Rottnek's recommendations and I most strongly agree with his recommendation to **"stop housing inmates in Division II as soon as possible.** And then stop requiring staff to work there." Rottnek Report, p. 12. I strongly disagree with Ms. Bridgette Jones's and Dr. Louis Shicker's judgment on this issue, I would also add that the medically vulnerable detainees housed in Division II must be moved immediately. Poor ventilation and extensive disrepair creates an unreasonable risk infection of airborne illnesses, and, as Dr. Rottnek further noted, once a person is infected, the conditions create a grave risk of serious illness or death because they exacerbate respiratory conditions and chronic conditions. Further, the sub-par medical care for non-COVID-19-related health problems strongly indicates that Jail staff remains ill-equipped and unprepared to manage and prevent a further outbreak of COVID-19 and any related complications. And, notwithstanding the fact that the medical care is deficient, and the conditions increase both the likelihood of infection and the risk of severe consequences from infection, detainees are incapable of achieving social distancing and are not receiving sufficient hygiene supplies.

I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct to the best of my information and belief.

FURTHER DEPONENT SAYETH NOT.

Adam Luring, MD, PhD
