CITY OF ERIE, PENNSYLVANIA ADA CURB RAMP PROGRAM 2011 PROGRESS REPORT

SUMMARY

This report summarizes the work performed on the City of Erie ADA Curb Ramp Program for the year 2011 per the U. S. District Court, Western District of Pennsylvania, Civil Action Number 02-203E, Fourth and Final Consent Decree and per the Civil Action Number 06-78 Erie, Settlement Agreement, City of Erie and PennDOT.

The Settlement Agreement between the City of Erie and PennDOT was ordered by Judge McLaughlin on April 19, 2007. The City of Erie submitted Schedules C and D in August 2007. Schedule C identifies curb ramps crossing city streets that intersect with state highways where the city streets were altered or resurfaced by the City of Erie since January 26, 1992. Schedule D identifies locations where curb ramps should have been installed crossing city streets that intersect with state highways where the city streets were altered or resurfaced by the City of Erie since January 26, 1992, but where such ramps were not installed. Schedules C and D list 480 locations where ramps exist that are non-compliant or defective under the ADA or where ramps should exist but do not. These ramps must be reconstructed or constructed to be compliant by the end of the year 2016.

The Settlement Agreement also modified the deadline for Erie's retrofitting obligations under the Erie Case consent decrees. The obligations must be complete by the end of the year 2016. The retrofit inventory (ramp locations) of the Erie Case consent decrees as identified in the HRGA document "**ADA Curb Ramp Inventory and Program Report**", October 2004, referred to as **I&PR** throughout this report, is 3,405 curb ramps. The total number of inventory ramps completed in the years 2004 through 2011 is 2,483. The balance to be completed in the 5 construction seasons from 2012-2016 is 922, or 184 per year. The number of Schedule C/D ramps to be completed in the program is 480. The total number of Schedule C/D ramps completed in the years 2007 through 2011 is 262. The balance to be completed in the 5 construction seasons from 2012-2016 is 218, or 44 per year. The plan also provides for construction of compliant ramps along all resurfaced streets each year.

The City of Erie Bureau of Engineering did not conduct an ADA Curb Ramp Design and Construction Course (compliance training seminar) this year. All bidders have attended at least one of five prior seminars.

All ramps constructed in 2011 included the cast-in form of truncated domes. Currently, the City of Erie has approved two manufacturers of truncated domes for use in the City of Erie.

For 2011, the City of Erie has met its program requirements. Refer to the 2011 Curb Ramps Summary.

The final consent decree requires that the City of Erie prepare and file a written report with the Court and with plaintiffs' Counsel on or before January 31 during each year that the Consent Decree is in effect and the year after the Consent Decree expires.

The report must provide specific detailed information about two groups or types of ramps: curb ramps built retrofitting existing non-compliant ramps associated with past street or sidewalk resurfacing projects (listed in the HRGA non-compliant inventory) and curb ramps built

as a part of current street or sidewalk resurfacing where no ramp existed. Sworn certification is required to be included in the report certifying that the City of Erie has inspected each ramp and that each ramp is compliant as required by the Consent Decree.

In 2011, the City of Erie awarded three Retrofit Curb Ramp contracts to contractors totaling 111 curb ramps on the Inventory and Program Report (I&PR). The contracts also included a total of 212 ramps not appearing on the I&PR.

An additional 74 retrofit ramps on the I&PR were constructed as a part of the first two 2011 Milling and Resurfacing contracts. The 2011 Milling and Resurfacing-III contract did not require any ramp construction. All ramps affected by this paving were constructed in prior years and are compliant.

In 2011, the City of Erie constructed 140 ramps associated with new resurfacing as a part of the first two 2011 Milling and Resurfacing contracts. Ramps triggered by work performed by the Bureau of Streets paving crew were completed as a part of the ramp contracts and milling and resurfacing contracts awarded. The lists for streets resurfaced under Milling and Resurfacing contracts and by the Bureau of Streets paving crew are attached as Appendix A.

PennDOT completed contract SR20-ADA in the City of Erie. The contractor constructed 53 ramps on City streets intersecting State highways. The number of ramps on the I&PR was 16. The number of ramps on Schedule C/D was 21. PennDOT also completed contract SR0197-01M in the City of Erie. The contractor constructed 25 ramps on City streets intersecting State highways. The number of ramps on the I&PR was 4. The number of ramps on Schedule C/D was 9. PennDOT also completed contract Group 201 SR8 in the City of Erie. The contractor constructed 34 ramps on City streets intersecting State highways. The number of ramps on Schedule C/D was 6.

In summary, the City of Erie and others constructed 217 retrofit ramps listed on the I&PR in the City of Erie in 2011. The number of retrofit ramps required to meet the program requirements was 190. The total number of additional curb ramps constructed not listed on the I&PR or associated with new resurfacing is 469. The total number of curb ramps constructed listed on Schedule C/D is 38. The number of Schedule C/D ramps planned to meet the program requirements is 43.

The City of Erie and others constructed a total of 720 curb ramps in the City of Erie in 2011.

This report is intended to fulfill reporting requirements for the year ending 2011.

INSPECTION CERTIFICATION

This is to certify that ADA/ADAAG compliant curb ramps were constructed in the City of Erie in 2011 as defined in the 2011 Progress Report.

The curb ramps listed in these Appendices were inspected by the City of Erie, Bureau of Engineering personnel using the ADAAG Guidelines. The retrofit ramp locations on City streets are as listed in the H.R. Gray and Associates, Inc. ADA Curb Ramp Inventory and Program Report submitted on October 21, 2004. The retrofit ramp locations on City streets intersecting State highways are as listed in Schedule C and D. The curb ramps constructed by the City of Erie were measured and inspected and found to be compliant at the time of inspection. Truncated domes were installed as required.

The City of Erie certifies that all required ADAAG curb ramps were installed in City of Erie right-of-way on 2011 City of Erie resurfacing projects, that the City of Erie retrofit curb ramps inventory were installed as required, and that this report is accurate to the best of my knowledge.

Jon Tushak, P.E.
City Engineer
