INTRODUCTION1

ARGUMENT1

I. PLAINTIFFS HAVE ADDUCED NO COMPETENT EVIDENCE TO SUPPORT THEIR STANDING OR THE MERITS OF THEIR CLAIM.....1

 A. Plaintiffs Have Not Presented Competent Evidence of the Equipment Actually Installed in the SG3 Secure Room or Its Purposes2

 B. Plaintiffs Have Presented No Competent Evidence of NSA Involvement in Activities Conducted in the SG3 Secure Room.....4

 C. Plaintiffs Have Presented No Competent Evidence of Ongoing Activity at the Folsom Street Facility, or Elsewhere, to Support Their Claims.....5

II. PLAINTIFFS’ CLAIMS OF FOURTH AMENDMENT SEARCHES AND SEIZURES ALSO FAIL AS A MATTER OF LAW7

 A. In Addition to the Lack of Supporting Evidence, Plaintiffs Offer No Legal Support for Their ”Stage 1” Seizure Claim7

 B. Plaintiffs Also Offer No Legal Support for Their “Stage 3” Search Claim.....10

III. UPSTREAM COLLECTION IS REASONABLE UNDER THE SPECIAL NEEDS DOCTRINE13

IV. IN THE ALTERNATIVE, PLAINTIFFS’ FOURTH AMENDMENT CLAIM MUST BE DISMISSED BECAUSE IT CANNOT BE LITIGATED WITHOUT NATIONAL-SECURITY INFORMATION PROTECTED BY THE STATE SECRETS PRIVILEGE.....20

CONCLUSION.....21

INTRODUCTION

1
2 Plaintiffs' effort to invalidate NSA¹ "Upstream" acquisition of online communications
3 containing targeted selectors, based on an alleged violation of their Fourth Amendment rights,
4 fails in every way. They adduce no competent evidence of Upstream's operation to support
5 either their standing, or the merits of their claim. Their allegations, even if taken as true, do not
6 establish that alleged Stage 1 copying of online communications, and electronic Stage 3
7 scanning, result in a seizure and search of the only communications that Plaintiffs put at issue:
8 those that are not retained by the Government, but which, having been found *not* to contain
9 targeted selectors, are instead destroyed within milliseconds of their creation. Even if Plaintiffs
10 had alleged and proven a technical seizure or search under the Fourth Amendment, the minimal
11 intrusion on Fourth Amendment interests caused by the electronic duplication, scanning, and
12 almost immediate destruction of communications that are never seen by Government officials
13 would still be vastly outweighed by Upstream's critical contributions to national security. And
14 although the Government is entitled to judgment for all these reasons based on the public record,
15 in the alternative judgment should be entered for the Government because privileged national
16 security information, subject to the DNI's assertion of the state secrets privilege, is required for a
17 full and fair adjudication of the case, but cannot be disclosed without risking exceptionally grave
18 damage to national security. *See generally* Gov't Mem. Plaintiffs' attempts to sustain their
19 Fourth Amendment claim in the face of these conclusions, *see* Pls.' Opp., meet with no success.

ARGUMENT

I. PLAINTIFFS HAVE ADDUCED NO COMPETENT EVIDENCE TO SUPPORT THEIR STANDING OR THE MERITS OF THEIR CLAIM.

20
21
22 The issue here is whether the Government is "violating the Fourth Amendment by ...
23 *ongoing* seizures and searches of *plaintiffs'* Internet communications." Pls.' Mot. at 1 (emphasis
24 added). Thus, while Plaintiffs emphasize that "[t]he [G]overnment admits ... 'NSA collects
25 telephone and electronic communications as they transit the Internet "backbone" within the

26
27
28

¹ Terminology used but not otherwise defined herein shall have the same meaning as in the Gov't Defs.' Opp. to Pls.' Mot. for Partial Summ. Judg. & Cross-Mot. for Partial Summ. Judg. on Pls.' Fourth Am. Claim (ECF No. 286-6) ("Gov't Mem."). Pls.' Combined Reply in Support of Their Mot. for Partial Summ. Judg. & Opp. to the Gov't Defs.' Cross-Mot. for Partial Summ. Judg. (*see* ECF No. 294) is cited herein as "Pls.' Opp."

1 United States,” Pls.’ Opp. at 24, 31, the NSA’s activities, *in general*, are immaterial to the
 2 showing Plaintiffs must make. Rather, Plaintiffs must present admissible evidence that (1) their
 3 communications are seized, (2) as part of NSA Upstream collection, (3) on an ongoing basis.

4 Plaintiffs attempt to meet this burden by arguing that their telecommunications provider,
 5 AT&T, “allows the government to seize the entire communications stream of its customers” at
 6 Stage 1 of the collection process. Pls.’ Mot. at 10; *see* Pls.’ Opp. at 3. But this claim depends
 7 wholly on the description of the SG3 Secure Room in the Klein and Marcus declarations. *See id.*
 8 at 3 n.1; Pls.’ Mot. at 6 nn. 5–8. To support Plaintiffs’ claim, then, those declarations must, at a
 9 minimum, present admissible evidence establishing: (1) that the equipment in the SG3 Secure
 10 Room was used for the surveillance activity that Plaintiffs allege; (2) that the NSA received data
 11 processed by the equipment in that room; and (3) that the activity Plaintiffs allege took place in
 12 2003 and 2004 remains ongoing. As explained below and in the Government’s cross-motion, *see*
 13 Gov’t Mem. at 14–20, the declarations contain no such evidence.

14 **A. Plaintiffs Have Not Presented Competent Evidence of the Equipment**
 15 **Actually Installed in the SG3 Secure Room or Its Purposes.**

16 Plaintiffs proffer no admissible evidence regarding the equipment allegedly installed in
 17 the SG3 Secure Room or the purposes for which it was used. Although Plaintiffs contend that “it
 18 is not essential to their motion,” Pls.’ Opp. at 29, the contents and purpose of the SG3 Secure
 19 Room are central to their claim; without such evidence, Plaintiffs’ allegations amount to AT&T
 20 splitting signals from one room to another at Folsom Street for some unknown purpose.

21 Plaintiffs cite to paragraphs 24–34 of the Klein Declaration, as well as Exhibits A, B, and
 22 C thereto, as the basis for the argument that the equipment allegedly located in the SG3 Secure
 23 Room serves the function that they claim. Pls.’ Mot. at 6 nn. 5–8. But in those paragraphs of
 24 Mr. Klein’s declaration, he does not describe the contents and purpose of the SG3 Secure Room.
 25 Rather, he focuses on his work elsewhere with a splitter cabinet that he states diverted copies of
 26 certain signals into that room. *See* Klein Decl. ¶¶ 24–34. As to what, if anything, happened to
 27 those signals once inside the room—the key information that Plaintiffs’ evidence must
 28 establish—Mr. Klein is silent except to point to Exhibit C to his declaration, [REDACTED]

[REDACTED] which purportedly includes a list of equipment to be

1 installed in the SG3 Secure Room. *Id.* ¶ 35 & Exh. C at 3- [REDACTED]

2 [REDACTED]

3 Notably, while Plaintiffs defend much of the Klein declaration as “within his personal
4 knowledge,” they exclude his testimony regarding the SG3 Secure Room from that argument.
5 *See* Pls.’ Opp. at 25–27. Rather, they claim that Klein’s testimony regarding the devices in the
6 SG3 Secure Room “is based on the AT&T documents he relied on to do his job.” *Id.* at 29. The
7 declaration does not support that claim. As to Exhibit C, the document in question, Mr. Klein
8 states only (and ambiguously) that “[i]n the course of [his] employment, [he] reviewed [it];” he
9 does not attest that the equipment listed in the document was in fact installed in the SG3 Secure
10 Room. Klein Decl. ¶ 28. Based on his own statements, Mr. Klein did not work in or, except on
11 one brief occasion, ever set foot in the SG3 Secure Room, *id.* ¶ 17, and he is not competent to
12 offer evidence of the equipment actually installed there, much less the purpose of that equipment.

13 [REDACTED]

14 [REDACTED]

15 [REDACTED]

16 Likewise, Mr. Marcus does not claim personal knowledge or provide other competent
17 evidence regarding the equipment in the SG3 Secure Room or its purpose. He simply assumes
18 the equipment in Klein Exhibit C was in fact installed there. Plaintiffs nonetheless urge the
19 Court to rely on his testimony because, under Rule 703, a witness proffered as an expert “is not
20 limited to his personal knowledge and can rely on the testimony and evidence of others . . . that
21 would themselves be inadmissible.” Pls.’ Opp. at 30. But Plaintiffs ignore that “[t]he fact that
22 inadmissible evidence is the (permissible) premise of [an] expert’s opinion does not make that
23 evidence admissible for other purposes, purposes independent of the opinion.” *In re James*
24 *Wilson Assocs.*, 965 F.2d 160, 173 (7th Cir. 1992); *see also* Wigmore Evid. § 4.7.2. Thus, Rule
25 703 does not permit Mr. Marcus’s purported expertise to transform hearsay and speculation into
26 admissible evidence about what was actually installed (or occurred) in the SG3 Secure Room.
27 On the contrary, because Mr. Marcus’s proffered opinions are not “based on sufficient facts or
28 data” as required by Rule 702(b), those opinions are inadmissible too. *See* Gov’t Mem. at 17–18.

1 In sum, Plaintiffs offer no admissible evidence regarding the equipment actually installed
2 in the SG3 Secure Room, or, more importantly, the purpose of that equipment.² Plaintiffs,
3 therefore, have adduced no competent evidence that their communications were collected for
4 purposes of surveillance, even in 2003-04. Their claim should be rejected on that basis alone.

5 **B. Plaintiffs Have Presented No Competent Evidence of NSA Involvement**
6 **in Activities Conducted in the SG3 Secure Room.**

7 Similarly, neither the Klein nor the Marcus declaration provides admissible evidence of
8 Government involvement in the SG3 Secure Room. For all of the reasons explained in the
9 Government's cross-motion, Mr. Marcus's testimony that it is "plausible" the Government
10 funded the room does not pass muster under Rule 702; he lacks both expertise in corporate
11 finance and a factual foundation for the conclusions he offers, *see* Gov't Mem. at 16–18.

12 Nor can Mr. Klein's testimony establish Government involvement here. Plaintiffs now
13 claim that Mr. Klein saw an AT&T management technician who had met with an NSA agent
14 installing equipment in the SG3 Secure Room, *see* Pls.' Opp. at 27, and that AT&T management
15 sent an email establishing AT&T's intention to work with NSA, *see id.* at 28. Mr. Klein's
16 declaration does not support either statement. Mr. Klein does not state that he observed a
17 management technician installing equipment in the SG3 Secure Room as Plaintiffs claim, *see*
18 Pls.' Opp. at 27; rather, he notes that he saw "a workman apparently working on the door lock
19 for the room." Klein Decl. ¶ 12. So, too, with the email that Mr. Klein mentions. He states that
20 management sent an email regarding "the pending visit" and that the email "explicitly mentioned
21 the NSA." *Id.* ¶ 10. Based on Mr. Klein's two-year-old recollection of that scant text, Plaintiffs
22 urge the Court to find that two separate meetings occurred between AT&T and NSA, infer a
23 resulting agreement between AT&T and NSA to work together, and conclude that "AT&T
24 thereafter did cooperate with the NSA." Pls' Opp. at 28. There is no basis in Mr. Klein's
25 declaration—or, indeed, in common sense—for these sweeping conclusions.

26 Similarly, although Plaintiffs claim that Mr. Klein knew that only personnel cleared by
27 NSA could access the SG3 Secure Room "based on [his] personal knowledge, observations, and

28 ² Plaintiffs' proffered evidence is even less probative of what, if any, activity occurred at other AT&T facilities where Mr. Klein claims "[he] learned that other . . . 'splitter cabinets' were being installed." Klein Decl. ¶ 36.

1 experiences of AT&T’s business operations and its policies and practices,” Pls.’ Opp. at 27, no
2 such assertions appear in Mr. Klein’s declaration. Indeed, Plaintiffs do not even cite to the
3 declaration as support for that claim. *See id.* Where Mr. Klein’s declaration specifically
4 discusses the claimed NSA restriction on access to the SG3 Secure Room, he qualifies it with the
5 disclaimer “[t]o my knowledge,” Klein Decl. ¶ 17, and goes on to discuss the limitations on that
6 knowledge, *see id.* (noting that he had no access to the SG3 Secure Room). In reality, Mr. Klein
7 makes clear that his testimony is based on hearsay. *See, e.g., id.* ¶ 16 (“FSS# 1 told me that
8 another NSA agent would again visit . . .”). And while Plaintiffs argue that “statements made to
9 Klein by management and other AT&T employees about NSA’s activities . . . are admissible
10 nonhearsay” because AT&T is the Government’s “agent” and “co-conspirator,” Pls.’ Opp. at 28,
11 these arguments assume the very conclusions Plaintiffs are trying to prove. Plaintiffs ask the
12 Court to assume a relationship exists to facilitate the admission of the very statements that
13 Plaintiffs claim establish the relationship. The Court should reject such circular reasoning.³

14 **C. Plaintiffs Have Presented No Competent Evidence of Ongoing Activity at**
15 **the Folsom Street Facility, or Elsewhere, to Support Their Claims.**

16 Most importantly, Plaintiffs’ claim of “ongoing seizures and searches,” Pls.’ Mot. at 1,
17 rests wholly on stale “evidence” of activities occurring over ten years ago, five years before
18 Section 702 was enacted, and has no probative value regarding the scope, sources, or methods of
19 Upstream collection today. Plaintiffs maintain—without citation to any authority—that there is
20 no “freshness” rule of evidence, Pls.’ Opp. at 31, but to the contrary, before evidence may be
21 admitted as relevant, it must be probative of the matter before the Court, and on this basis courts
22 routinely exclude evidence that is too remote in time.⁴ As the Ninth Circuit held in *Ortega v.*

23 ³ In support of their agency theory, Plaintiffs cite AT&T’s 2014 Transparency Report as
24 an admission that “AT&T conducts surveillance for the NSA under the [FISA].” *See* Pls.’ Opp.
25 at 24. But the timeframe covered by the report—July 1–December 31, 2013—is irrelevant to
26 whether the Government was in any way involved in the alleged activity in the SG3 Secure
27 Room over ten years ago. At best the report reveals in general that AT&T recently responded to
28 national security demands under FISA from unidentified Government agencies, and not whether
AT&T did or did not participate in any particular form of collection (such as Upstream, PRISM,
or traditional FISA orders) at the behest of any particular agency.

⁴ *See* Fed. R. Evid. 401; *see, e.g., Wilson v. Bradlees of New England, Inc.*, 250 F.3d 10
(1st Cir. 2001) (affirming exclusion and restriction of “stale hearsay” and other unduly
prejudicial material); *Chertkova v. Connecticut Gen. Life Ins. Co.*, 210 F.3d 354 (Table), 2000
WL 349277, at *4 (2d Cir. Apr. 4, 2000) (affirming exclusion “as too distant, evidence of events

1 *O'Connor*, 146 F.3d 1149, 1162 (9th Cir. 1998), evidence of events occurring over ten years ago
 2 is too stale even to meet a requirement of reasonable suspicion, much less to prove by a
 3 preponderance of the evidence that conduct of which a litigant complains remains ongoing. *See*
 4 *also Herrera v. Perry*, 2014 WL 2557644, at *8 (C.D. Cal. Mar. 19, 2014) (denying preliminary
 5 injunction where plaintiff “[had] not presented any evidence that [alleged] tampering [and]
 6 fabricating evidence over ten years ago remain on-going”).⁵

7 The only contemporary evidence that Plaintiffs cite is the Government’s acknowledgment
 8 that Upstream collection of communications from the Internet backbone is “active and ongoing.”
 9 *See* Pls’ Opp. at 31. But that general acknowledgment does not establish that collection occurs at
 10 Folsom Street, that Plaintiffs’ communications are included, or that the means employed actually
 11 resemble the four-stage process Plaintiffs describe—either now, or at any time in the past. For
 12 lack of evidence to support Plaintiffs’ Fourth Amendment claim, or their standing to raise it, the
 13 Court should grant the Government’s cross-motion for summary judgment.⁶

14 that had allegedly occurred 11 years before the relevant period”); *Perry v. Ethan Allen, Inc.*, 115
 15 F.3d 143, 150 (2d Cir. 1997) (affirming exclusion of events more than six months prior to
 16 alleged harassment as “too remote to have probative value”); *Bhasin v. Bluefield Regional Med.*
 17 *Ctr., Inc.*, 62 F.3d 1414 (Table), 1995 WL 465796, at *4 (4th Cir. Aug. 8, 1995) (affirming
 18 exclusion of events from early 1980s as “too remote” from a discharge in 1992); *West v. Drury*
 19 *Co.*, 2009 WL 1532491, at *1 (N.D. Miss. 2009) (excluding medical record more than a decade
 20 old); *Sanchez v. Echo, Inc.*, 2008 WL 2951339, *4 (E.D. Pa. Jan. 9, 2008); *Dimas v. Michigan*
 21 *Dep’t of Civil Rights*, 2004 WL 1397558, at *12, n.2 (W.D. Mich. Mar. 19, 2004) (excluding
 22 statements ten years prior to alleged discrimination as “too remote in time . . . to be probative”).

23 ⁵ Indeed, even if the Klein and Marcus declarations eked past the threshold of
 24 relevance, Plaintiffs’ burden is still to present a quantum of evidence on which a reasonable trier
 25 of fact could find that the surveillance activities they allege are ongoing, *and* that they include
 26 Plaintiffs’ communications. *See In re Oracle Corp. Sec. Litig.*, 627 F.3d 376, 387 (9th Cir.
 27 2010). Speculation regarding events occurring over ten years ago is at best a mere “scintilla of
 28 evidence in support of the [P]laintiff’s position,” and as such is “insufficient” to avoid summary
 judgment. *United States v. \$133,420 in U.S. Currency*, 672 F.3d 629, 638 (9th Cir. 2012).

⁶ Plaintiffs contend that even if the proffered evidence does not meet their burden, the
 Court cannot grant summary judgment for the Government because they are “entitled” to pursue
 discovery. Pls.’ Opp. at 35, citing Fed. R. Civ. P. 56(d). To be entitled to Rule 56(d) discovery,
 parties must establish (1) that they have “set forth in affidavit form the specific facts [that they]
 hope[] to elicit from further discovery; (2) [that] the facts sought exist; and (3) [that these]
 sought-after facts are ‘essential’ to oppose summary judgment.” *Family Home & Fin. Ctr., Inc.*
v. FHLMC, 525 F.3d 822, 827 (9th Cir. 2008). The facts sought “must be based on more than
 mere speculation.” *SW Traders LLC v. United Specialty Ins. Co.*, 409 Fed. Appx. 96, 98–99 (9th
 Cir. 2010). Here, Plaintiffs cite to two affidavits previously submitted in this litigation, *see* Pls.’
 Opp. at 35 (citing ECF Nos. 30, 114), but they do not fulfill Rule 56(d)’s requirements. Both
 declarations list sweeping categories of discovery, *see* ECF No. 30 ¶¶ 7, 11, 12; ECF No. 114 ¶¶
 7, 11, 12, but fail to state the particular facts they hope to prove or to establish that the facts exist,
 offering only such generalities as “the discovery would lead to evidence regarding the nature and

1 **II. PLAINTIFFS' CLAIMS OF FOURTH AMENDMENT SEARCHES AND SEIZURES ALSO FAIL AS A MATTER OF LAW.**

2 **A. In Addition to the Lack of Supporting Evidence, Plaintiffs Offer No Legal Support for Their "Stage 1" Seizure Claim.**

3 Plaintiffs likewise offer no legal support for their claim that the alleged (but unproven)
4 copying of online communications at Stage 1 of the Upstream process constitutes a Fourth
5 Amendment seizure. *See* Gov't Mem. at 23-30. Exclusively at issue here are copies of
6 communications that in Plaintiffs' telling are electronically created at Stage 1, scanned for
7 targeted selectors at Stage 3, and then, because they are found to contain no such selectors, are
8 destroyed, all within milliseconds of their creation. *See* Gov't Mem. at 28-29; Pls.' Mot. at 9.
9 Plaintiffs now assert that Upstream collection interferes with a right to "sole possession" and
10 "exclusive control" of the information these communications contain. Pls.' Opp. at 3, 4. But
11 they still have not explained how the alleged creation and destruction of copied communications
12 within milliseconds "meaningful[ly] interfere[s]" with such an interest, so as to constitute a
13 Fourth Amendment seizure. *See United States v. Jacobsen*, 466 U.S. 109, 113 (1984).

14 Plaintiffs maintain that the "act of copying" itself effects a seizure "the moment" the
15 copies are made, regardless of how long they are kept, by interfering with this "right to
16 [exclusive] control." Pls.' Opp. at 4-6. This concept of a seizure ignores the requirement that
17 interference with a possessory interest in property be meaningful, and the Ninth Circuit has
18 rejected the proposition, upon which Plaintiffs' argument depends, "that *any* detention of
19 [property] constitutes a fourth amendment seizure." *United States v. England*, 971 F.2d 419, 421
20 (9th Cir. 1992); *see also United States v. Jefferson*, 566 F.3d 928, 933-34 (9th Cir. 2009)
21 (rejecting contention that possessory interest in package arose at the time it was removed from
22 the mail stream); *United States v. Hoang*, 486 F.3d 1156, 1160-62 (9th Cir. 2007) (similar). As
23 explained in *United States v. Va Lerie*, 424 F.3d 694, 706 (8th Cir. 2005) (en banc):

24 [N]ot all police interference with an individual's property constitutes a Fourth
25 Amendment seizure, i.e., the police do not seize property every time they handle
26 private property. By requiring some *meaningful interference* with an individual's
27 possessory interests in property, the Supreme Court inevitably contemplated
28 excluding *inconsequential interference* with an individual's possessory interests.

scope of the Government's surveillance program." *Id.* ¶ 20. Such conclusory statements do not provide the specific showing required under Rule 56(d).

1 Applying these principles, the courts, including the Ninth Circuit, have refused to find Fourth
2 Amendment seizures where detentions of property lasting much longer than those alleged here
3 resulted in no consequential interference with the owners' possessory interests.⁷ These cases,
4 and those previously cited by the Government involving the momentary handling of property for
5 brief non-intrusive inspections, *see* Gov't Mem. at 27, dispel the notion that the alleged "act of
6 copying" communications itself constitutes a seizure "the moment" it occurs.

7 Plaintiffs attempt to dismiss this body of precedent on the basis that the cases "do not
8 speak to [interference with] the possessory interest in the contents of [] communication[s]," Pls.'
9 Opp. at 7, but they do not explain the supposed import of this distinction. These cases illustrate
10 the principle, announced in *Jacobsen*, that interference with a possessory interest must be
11 meaningful *before* a seizure can take place. Under this principle as elaborated in the case law, no
12 such interference with a right of exclusive control over the content of communications has been
13 shown merely from the alleged act of copying them, where, in Plaintiffs' own telling, the copies
14 are destroyed within milliseconds.

15 Plaintiffs cite *United States v. Place*, 462 U.S. 696 (1983) for the proposition that even a
16 brief detention of property can result in a seizure, Pls.' Opp. at 6, but in contrast to the initial 90-
17 minute detention of the traveler's luggage in *Place*, *id.* at 709, the lifetime of the copied
18 communications here is vanishingly brief, and involves none of the circumstances or ensuing
19 consequences that *Place* considered, and that the Ninth Circuit and other courts look to, in
20 determining whether a seizure has occurred: no property is taken from anyone's immediate
21 possession; no property is destroyed; delivery of no one's communications is delayed; and no
22 one's freedom of movement is impeded.⁸ Once the allegedly copied communications are
23 scanned and destroyed, all within milliseconds of their creation, "exclusive" control over the

24 ⁷ *See, e.g., United States v. Clutter*, 674 F.3d 980, 983-85 (8th Cir. 2012) (detention of
25 defendant's home computers after he had been jailed); *Jefferson*, 566 F.3d at 931-35 (overnight
26 detention of express mail); *Hoang*, 486 F.3d at 1158, 1160-62 (ten-minute detention of FedEx
27 package); *United States v. Gant*, 112 F.3d 239, 240, 242 (6th Cir. 1997) (moving passenger's
28 tote bag from overhead bin to seat for narcotics "sweep" of bus by drug-sniffing dog).

⁸ *See Jacobsen*, 466 U.S. at 124-25; *Clutter*, 674 F.3d at 984-85; *Jefferson*, 566 F.3d at
934-35; *Hoang*, 486 F.3d at 1160; *Va Lerie*, 424 F.3d at 703-07; *Gant*, 112 F.3d at 242; *United*
States v. Brown, 884 F.2d 1309, 1311 (9th Cir. 1989); *United States v. Beale*, 736 F.2d 1289,
1289-90, 1292 (9th Cir. 1984). *See also Place*, 462 U.S. at 718 n.5 (Brennan, J., concurring).

1 communications is restored to the parties as if the copies allegedly obtained by the Government
2 had never been created at all.⁹

3 For their part, Plaintiffs cite no authority for the proposition that the “act of copying” a
4 communication results in a seizure “the moment it occurs.” To a one, the cases Plaintiffs cite in
5 support of this assertion involved situations where government agents not only copied or
6 recorded the contents of oral or electronic communications, but also retained those copied
7 communications indefinitely, in some cases for months and years at a time, and used the contents
8 for their own investigative or prosecutorial purposes.¹⁰ The Government has already explained,
9 however, that the allegations here are distinguishable from the circumstances of such precedents,
10 because they concern copies of communications that are not retained or put to any use by the
11 Government, and instead are destroyed instantaneously after their creation once it is determined
12 (by electronic means) that they do not contain targeted selectors. *See* Gov’t Mem. at 28-29.
13 Plaintiffs do not cite a single case in which the copying of digital information alone, without
14 retention, was held to be a seizure.¹¹ Plaintiffs warn that “[u]nder the [G]overnment’s argument,
15 digital information would never be considered ‘seized’ unless [it] [also] took possession of ... a

16 ⁹ In holding that no seizure occurs when government agents briefly handle or detain a
17 piece of mail or stowed luggage, courts have further observed that persons who place items in
18 the mail, or check baggage with a carrier, have no reasonable expectation that those items will
19 not be touched, handled, or moved around by strangers en route to their destination. *United*
20 *States v. Terriques*, 319 F.3d 1051, 1055 (8th Cir. 2003); *United States v. DeMoss*, 279 F.3d 632,
21 635 (8th Cir. 2002); *see also Jacobsen*, 466 U.S. at 113. Likewise, Plaintiffs can have no
22 reasonable expectation that intermediate copies of their communications will not be made (and
for some period stored) by numerous computers as they make their way across the Internet, *see*,
e.g., *United States v. Councilman*, 418 F.3d 67, 69-70 (1st Cir. 2005), or that copies of the
communications will not continue to reside on faraway, even overseas servers of the providers to
which the parties to Plaintiffs’ communications subscribe. *See In re Warrant to Search a*
Certain E-Mail Account, 2014 WL 1661004, at *4 (S.D.N.Y. Apr. 25, 2014).

23 ¹⁰ *See Katz v. United States*, 389 U.S. 347, 348 (1967); *Berger v. State of New York*, 388
24 U.S. 41, 45 (1967); *United States v. Ganius*, 755 F.3d 125, 128-30, 137 (2d Cir. 2014); *United*
25 *States v. Comprehensive Drug Testing, Inc.*, 513 F.3d 1085, 1093 (9th Cir. 2008), *aff’d en banc*,
621 F.3d 1162 (9th Cir. 2010); *In re Search of Info. Associated with [Redacted]@mac.com*, 2014
WL 1377793, at *2 (D.D.C. Apr. 7, 2014). *See also LeClair v. Hart*, 800 F.2d 692, 693 (7th Cir.
1986); *United States v. Jefferson*, 571 F. Supp. 2d 696, 699-700, 703 (E.D. Va. 2008).

26 ¹¹ Plaintiffs are also unaided by cases holding that a prohibited acquisition of electronic
27 communications occurs under the Wiretap Act, 18 U.S.C. § 2511(a), “when the contents of a
28 wire communication are captured or redirected in any way.” Pls.’ Opp. at 5. Statutory
enactments can satisfy the requirements of the Fourth Amendment, but do not affect the scope of
the protections it affords. *See United States v. Mann*, 829 F.2d 849, 851-53 (9th Cir. 1987);
United States v. Kington, 801 F.2d 733, 737 (5th Cir. 1986).

1 hard drive or a server” containing the data. Pls.’ Opp. at 5. But again they miss the point. The
 2 critical distinction is not whether the Government obtains communications by electronically
 3 copying them or seizing the hardware on which they reside, but whether the Government’s
 4 retention of the data is of such duration, or results in other consequences, as to meaningfully
 5 interfere with the owner’s possessory interests. Plaintiffs have made no such showing here.¹²

6 **B. Plaintiffs Also Offer No Legal Support for Their “Stage 3” Search Claim.**

7 The Government has shown that, under the reasoning of *Place* and *Jacobsen*, electronic
 8 scanning of copied communications that occurs at Stage 3 of the alleged Upstream process does
 9 not constitute a search of the only communications that Plaintiffs have placed at issue here:
 10 those not found to contain targeted selectors, which are immediately destroyed, not retained by
 11 the Government. Because under Plaintiffs’ scenario Government agents obtain no information
 12 about the communications, their contents, the parties to them, or even that they exist, the alleged
 13 electronic scanning of those communications for targeted selectors “does not compromise any
 14 legitimate interest in privacy.” *Jacobsen*, 466 U.S. at 122-23; *see* Gov’t Mem. at 31-33.

15 Plaintiffs contest the point that no search occurs if no information is actually provided to
 16 Government agents. Pls.’ Opp. at 9, 11. But in so doing they take issue with first principles, *see*
 17 *Florida v. Jardines*, 133 S. Ct. 1409, 1414 (2013) (“exclusive basis” for invoking Fourth
 18 Amendment’s protections against unreasonable searches requires that the “Government obtain[]
 19 information”), and the rationale of *Place*, 462 U.S. at 707 (canine sniff of luggage for narcotics is
 20 not a search because it does not otherwise expose the contents of the luggage to Government
 21 agents), as extended in *Jacobsen*, 466 U.S. at 123-24. And contrary to Plaintiffs’ contention that
 22 “[t]he [G]overnment’s human-eyes thesis is ... unsupported by authority,” Pls.’ Opp. at 9, the
 23 distinction between electronically scanning digital information for data of interest and actually
 24 revealing that information to human beings is recognized by courts, Congress, commentators,

25 ¹² Plaintiffs again conflate possessory and privacy interests when they argue that the
 26 alleged Stage 1 copying of communications is “intrusive” because, no matter how briefly the
 27 copies are retained, they are scanned in the interim (at Stage 3) for targeted selectors. Pls.’ Opp.
 28 at 7; *see* Gov’t Mem. at 30 n.7. Courts have held repeatedly that it does not matter to the seizure
 inquiry that government agents briefly handle, detain, or divert an object for the purpose of
 gleaning information through some non-invasive technique. *See, e.g., Arizona v. Hicks*, 480 U.S.
 321, 324-25 (1987); *Jefferson*, 566 F.3d at 931-32, 934-35; *DeMoss*, 279 F.3d at 634, 635-36;
Gant, 112 F.3d at 240, 242; *United States v. Hall*, 978 F.2d 616, 618-20 (10th Cir. 1992).

1 and other legal authorities.¹³ It is also supported by the Supreme Court’s decision in *United*
 2 *States v. Karo*, 468 U.S. 705, 712-13 (1984) (placement of an unmonitored tracking device
 3 among suspect’s belongings did not infringe upon his privacy because until monitored by
 4 Government agents the device “conveyed no information at all”).

5 Plaintiffs next argue that the holdings of *Place* and *Jacobsen* do not apply to investigative
 6 techniques that can reveal something other than the presence or absence of contraband, Pls.’
 7 Opp. at 10-11, but once again they fail to grapple with the issue at hand. *Jacobsen* teaches that
 8 the critical question in each case involving an alleged search is whether “[o]fficial conduct ...
 9 ‘compromise[d] any legitimate interest in privacy.’” *See Illinois v. Caballes*, 543 U.S. 405, 408
 10 (2005), quoting *Jacobsen*, 466 U.S. at 123. Here, the alleged automated scanning of
 11 communications that are not found to contain targeted selectors reveals no information about
 12 them, not even the fact of their existence, and is thus designed, like the chemical test in
 13 *Jacobsen*, so that “it could reveal nothing” about non-targeted communications. *Jacobsen*, 466
 14 U.S. at 124 n.24; *see* Gov’t Mem. at 33. So far as these communications are concerned, Stage 3
 15 scanning for selectors “does not expose” anything about them “that otherwise would remain
 16 hidden from public view.” *Place*, 462 U.S. at 707. Hence, the “official conduct” alleged in this
 17 proceeding involves no search under the Fourth Amendment.¹⁴

18 _____
 19 ¹³ *See In re Warrant to Search a Certain E-Mail Account, supra*, 2014 WL 1661004,
 20 at *6; S. Rep. No. 99-541, 99th Cong., 2d Sess. 20 (1986) (“monitor[ing] a stream of
 21 transmissions in order to properly route, terminate, and otherwise manage the individual
 22 messages” is not prohibited by the Wiretap Act because “[t]hese monitoring functions . . . do not
 23 involve humans listening in on voice conversations”); Bruce E. Boyden, Can a Computer
 24 Intercept Your Email?, 34 *Cardozo L. Rev.* 669, 673 (2012) (arguing that “automated processing
 25 [of e-mail] that is not contemporaneously reviewable by . . . humans, and does not produce a
 26 record for later human review, is not an interception [under] the Wiretap Act”); Richard A.
 27 Posner, Privacy, Surveillance, and Law, 75 *U. Chi. L. Rev.* 245, 254 (2008) (“Computer searches
 do not invade privacy because search programs are not sentient beings. Only [a] human search
 should raise constitutional or other legal issues.”); Orin S. Kerr, Searches and Seizures in a
 Digital World, 119 *Harv. L. Rev.* 531, 547-48, 551-54 (2005) (contending that “a search of data
 stored on a hard drive occurs when that data . . . is exposed to human observation”); Use of
 E-Mail Service Provider That Scans E-Mails For Advertising Purposes, *NY Eth. Op.* 820 (2008)
 (a lawyer may use an e-mail service provider that conducts computer scans of e-mails to generate
 computer advertising, without breaching client confidentiality, where the e-mails are not
 reviewed by or provided to human beings other than the sender and recipient); Legal Ethics,
Law. Deskbk. Prof. Resp. § 1.6-2(c) (2013-2014 ed.) (“general rule” same).

28 ¹⁴ Plaintiffs cite no authority to support their contrary view. *See* Pls.’ Opp. at 12-13. As
 a result of the “hash value” analysis conducted on the defendant’s computer in *United States v.*
Crist, 627 F. Supp. 2d 575, 578 (M.D. Pa. 2008), law-enforcement agents actually obtained

1 Whether scanning communications that are found to contain targeted selectors (and are
 2 therefore retained) infringes upon a legitimate expectation of privacy is not at issue here.¹⁵
 3 Plaintiffs, having identified no communications of their own that fall into that category, have
 4 excluded it from the ambit of their summary judgment motion, Pls.’ Mot. at 9, and cannot
 5 “vicariously assert[]” the Fourth Amendment rights of persons whose communications are found
 6 to contain targeted selectors to support their very different claim. *Rakas v. Illinois*, 439 U.S. 128,
 7 133-34 (1978); *United States v. Pulliam*, 405 F.3d 782, 789-90 & n.3 (9th Cir. 2005). The only
 8 question that is or can be presented by Plaintiffs’ motion is whether they have shown a violation
 9 of their own Fourth Amendment rights, and as a matter of law (as well as fact), the answer is no.

10 All else failing, Plaintiffs warn that failure to adopt their view of the Fourth Amendment
 11 will license “a digital surveillance state,” Pls.’ Opp. at 9, albeit a peculiar one in which the state
 12 avoids collecting information about the vast majority of the millions of people upon whom it
 13 supposedly spies. The Supreme Court has repeatedly refused in the past to accept such dire
 14 predictions as a substitute for application of settled constitutional principles, *see, e.g., United*
 15 *States v. Knotts*, 460 U.S. 276, 283-84 (1983), and there is no reason to indulge them in the
 16 circumstances here.¹⁶ Plaintiffs have not demonstrated that Upstream collection involves
 17 searches (or seizures) that violate their Fourth Amendment rights.

18 information from which they were able to glean the contents of over 170 files on the computer.
 19 *Bourgeois v. Peters*, 387 F.3d 1303, 1307, 1314 n.9 (11th Cir. 2004), was an action to enjoin
 20 mass magnetometer screening at an outdoor political protest, including physical searches of
 21 individuals and their belongings in instances when the magnetometers revealed the presence of
 22 metal on their persons. (It was not disputed that the magnetometer screening constituted a
 23 search.) In contrast, Plaintiffs’ claim here does not encompass those instances where Stage 3
 24 scanning of communications reveals the presence of targeted selectors.

25 ¹⁵ Hence, the Government’s position here does *not* turn on whether communications that
 26 contain targeted selectors may be considered “contraband.” *See* Pls.’ Opp. at 11.

27 ¹⁶ For foreign intelligence purposes, FISA already prohibits “electronic surveillance and
 28 the interception of domestic wire, oral, or electronic communications” except as the statute itself
 allows. 50 U.S.C. § 1812(a). (Electronic surveillance for federal law enforcement purposes is
 regulated by Title III of the Omnibus Crime Control and Safe Streets Act, 18 U.S.C. §§ 2510-
 2520, *see United States v. U.S. Dist. Court (Keith)*, 407 U.S. 297, 302 (1972).) Section 702, in
 particular, “create[s] a comprehensive scheme in which the [FISC] evaluates the Government’s
 certifications, targeting procedures, and minimization procedures” to ensure that they meet
 statutory requirements, and “comport with the Fourth Amendment.” *Clapper v. Amnesty Int’l*,
 133 S. Ct. 1138, 1154 (2013) (citing 50 U.S.C. § 1881a(a), (c)(1), (i)(2)-(3)). Congress oversees
 the Government’s exercise of its Section 702 authority, 50 U.S.C. §§ 1871, 1881a(l), 1881f, and
 has demonstrated its willingness and ability, both in enacting FISA and otherwise, to
 legislatively “balance privacy and public safety in a comprehensive way,” *United States v. Jones*,

1 **III. UPSTREAM COLLECTION IS REASONABLE UNDER THE SPECIAL NEEDS**
2 **DOCTRINE.**

3 The Government demonstrated in its opening brief that even if the alleged real-time
4 electronic copying and scanning of online communications constitute seizures and searches
5 under the Fourth Amendment, these activities are constitutional under Fourth Amendment
6 “special needs” analysis because (1) temporarily creating copies of online communications and
7 electronically scanning them for targeted selectors, followed by their immediate destruction, at
8 most minimally intrudes on Fourth Amendment interests, and (2) Upstream collection of foreign
9 intelligence makes significant contributions to national security. Gov’t Mem. at 34-43.

10 Plaintiffs’ responses are unavailing. They argue first that warrantless searches have only
11 been upheld under the special needs doctrine where the persons searched had diminished
12 expectations of privacy due to their choice to engage in certain regulated activities, and second
13 that no similar special needs case involves seizures and searches on such a scale as allegedly
14 occurs under Upstream collection. Pls.’ Opp. at 15-16. These arguments misstate the Supreme
15 Court’s special needs jurisprudence. “The special needs doctrine does not require that the
16 subject of the search possess a diminished privacy interest.” *MacWade v. Kelly*, 460 F.3d 260,
17 269 (2d Cir. 2006). *See also United States v. Aukai*, 497 F.3d 955, 960 (9th Cir. 2007) (en banc)
18 (“The constitutionality of an airport screening search . . . does not depend on consent.”). While
19 many of the Court’s special needs cases have involved diminished privacy expectations, “the
20 Supreme Court never has implied—much less actually held—that a reduced privacy expectation
21 is a *sine qua non* of special needs analysis,” *MacWade*, 460 F.3d at 269, and the Court has in fact
22 applied special needs analysis where individual expectations of privacy were undiminished. *See,*
23 *e.g., Camara v. Municipal Court*, 387 U.S. 523, 537 (1967) (routine building inspections for
24 health-code compliance); *Michigan Dep’t of State Police v. Sitz*, 496 U.S. 444 (1990)
25 (warrantless traffic checkpoints to screen for intoxicated drivers); *United States v. Martinez-*

26 132 S. Ct. 945, 964 (2012) (Alito J., concurring). *See Keith*, 407 U.S. at 302; *United States v.*
27 *Frazin*, 780 F.2d 1461, 1465 (9th Cir. 1986) (noting Congress enacted the Right to Financial
28 Privacy Act in response to the holding of *United States v. Miller*, 425 U.S. 435 (1976), that bank
customers have no legitimate expectation of privacy in bank records). The criminal justice
system also provides a forum for persons whose communications are actually acquired (and used
against them) to place the exercise of the Government’s Section 702 authority under judicial
scrutiny. *See United States v. Mohamud*, 2014 WL 2866749, at *15-18 (D. Or. June 24, 2014).

1 *Fuerte*, 428 U.S. 543 (1976) (same to screen for illegal aliens). *See also Al-Haramain Islamic*
2 *Found., Inc. v. U.S. Dep't of the Treasury*, 686 F.3d 965, 991-92 (9th Cir. 2012) (discussing
3 these as “major” special needs cases).

4 To be sure, the Supreme Court has explained that in cases involving “substantial
5 expectations of privacy” the special needs test requires the program to serve “some purpose other
6 than ‘to detect evidence of ordinary criminal wrongdoing.’” *Maryland v. King*, 133 S. Ct. 1958,
7 1978 (2013) (quoting *Indianapolis v. Edmond*, 531 U.S. 32, 38 (2000)). Significantly, Plaintiffs
8 acknowledge that “a significant purpose” of Upstream collection under Section 702 is to obtain
9 foreign intelligence. Pls.’ Opp. at 16-17. Thus, contrary to Plaintiffs’ argument, Upstream
10 collection fits comfortably within the special needs doctrine because its undisputed
11 programmatic purpose exceeds normal law enforcement needs. Nor is the scale of the seizures
12 and searches alleged here unprecedented in special needs cases. *See Aukai*, 497 F.3d at 956,
13 958-62 (applying the special needs analysis to uphold warrantless screening by TSA of all
14 commercial aircraft passengers—some 700 million people each year).

15 Plaintiffs next take issue with the Government’s demonstration that it is impracticable to
16 obtain a warrant based on probable cause every time it seeks to collect intelligence targeting non-
17 U.S. persons outside the United States, arguing that the Congressional committee reports cited by
18 the Government in support of this conclusion are inadmissible hearsay and not specific to
19 Upstream collection. Pls.’ Opp. at 18. Significantly, Plaintiffs do not challenge Congress’s
20 determination, reflected in the reports and the enactment of Section 702, that having to obtain
21 individual FISA warrants to collect this type of intelligence, merely as an unintended result of
22 changes in technology, seriously burdened the Government’s intelligence resources and impeded
23 its collection of foreign intelligence; and that authorization of surveillance under the terms and
24 conditions of Section 702 substantially improved the Government’s ability to quickly and
25 effectively monitor terrorist communications. *See, e.g.*, H.R. Rep. No. 112-645(II) at 2-3; *id.* (I)
26 at 4; S. Rep. No. 112-174 at 2; S. Rep. No. 110-209 at 5; May 1, 2007 FISA Mod. Hrg. at 18;
27 Gov’t Mem. at 4-5. Plaintiffs’ attempts to diminish the force of these conclusions on hearsay
28 and specificity grounds are entirely without merit.

1 The Congressional reports cited by the Government are admissible under Federal Rule of
2 Evidence 803(8), which provides that a public record or statement setting forth factual findings
3 from a legally authorized investigation is not excluded as hearsay if “neither the source of
4 information nor other circumstances indicate a lack of trustworthiness.” *See also Beech Aircraft*
5 *Corp. v. Rainey*, 488 U.S. 153, 162, 170 (1988) (factually based conclusions or opinions
6 admissible too, if trustworthy). Public records are presumed trustworthy, and the burden of
7 establishing a basis for excluding a public record falls on the party opposing the evidence.
8 *Gilbrook v. City of Westminster*, 177 F.3d 839, 858 (9th Cir. 1999); *Johnson v. City of*
9 *Pleasanton*, 982 F.2d 350, 352 (9th Cir. 1992). Courts look to four factors in assessing a public
10 report’s trustworthiness: (1) the timeliness of the investigation; (2) the special skill or expertise
11 of the investigating official; (3) whether a hearing was held and the level at which it was
12 conducted; and (4) possible motivation problems. *Beech Aircraft*, 488 U.S. at 167 n.11; *Barry v.*
13 *Trustees of the Int’l Ass’n Full-Time Salaried Officers & Employees of Outside Local Unions &*
14 *Dist. Counsel’s (Iron Workers) Pension Plan*, 467 F. Supp. 2d 91, 97 (D.D.C. 2006). Courts also
15 ask whether findings and conclusions in Congressional reports are the product of serious
16 investigation rather than political grandstanding, and whether members of the minority party
17 dissented from the report. *Barry*, 467 F. Supp. 2d at 98-100 (discussing cases).

18 The sum total of Plaintiffs’ argument on this front is to declare that the Congressional
19 statements relied on to demonstrate impracticability (and Upstream’s effectiveness), are
20 “inadmissible hearsay,” citing to Fed. R. Evid. 801(c), 802. Pls.’ Opp. at 18, 23. Plaintiffs have
21 “produced no evidence [or even argument] whatsoever to raise doubts about the reliability” of
22 these Congressional statements, nor challenged the motives of the reporting committees.
23 *Gilbrook*, 177 F.3d at 858. *See also Johnson*, 982 F.2d at 353. This is no surprise, as the factors
24 noted above all point in favor of the reports’ reliability, and, therefore, admissibility.

25 The statements cited by the Government are contained in timely reports on the FISA
26 Amendments Act (“FAA”), *see* S. Rep. No. 110-209, and the reauthorization of the FAA (which
27 would have expired at the end of the year in which those reports were issued). *See* H.R. Rep.
28 No. 112-645(II) at 2. The issuing committees—the House and Senate Select Committees on

1 Intelligence and Committees on the Judiciary—all had expertise in the subject of the collection
2 of foreign intelligence under the FISA and the FAA. *See, e.g.*, S. Rep. No. 112-174 at 2, 7;
3 S. Rep. No. 110-209 at 1; H.R. Rep. No. 112-645(II) at 3-4. In addition, the committees held
4 hearings and briefings on the issues discussed in the reports. *See* H.R. Rep. No. 112-645(I) at
5 3-4; H.R. Rep. No. 112-645(II) at 4-6; S. Rep. 112-229 at 9; S. Rep. No. 112-174 at 2; S. Rep.
6 No. 110-209 at 2. Finally, there is no suggestion that the reports’ conclusions are the product of
7 improper motives or grandstanding; they reflect serious bipartisan consideration of important
8 national security issues, with little minority dissent (principally related to issues of privacy,
9 transparency, and oversight for which the Government did not cite the reports). *See* H.R. Rep.
10 No. 112-645(II) at 10-11; H.R. Rep. No. 112-645(I) at 17-21; S. Rep. No. 112-174 at 10-12; *but*
11 *see* S. Rep. No. 112-229 at 15-16. Other FAA legislative history cited by the Government, such
12 as the 2007 FISA Modernization Hearing, has been cited by other courts, *see Mohamud*, 2014
13 WL 2866749, at * 7-8, indicating its reliability as well. *See Sobel v. Hertz Corp.*, 291 F.R.D.
14 525, 533 (D. Nev. 2013). Thus, the Congressional reports relied upon by the Government are
15 admissible under Fed. R. Evid. 803(8). *See, e.g., Barry*, 467 F. Supp. 2d at 99-101; *Mariani v.*
16 *United States*, 80 F. Supp. 2d 352, 358-61 (M.D. Pa. 1999); *Gathercole v. Global Assocs.*, 560 F.
17 Supp. 642, 647 (N.D. Cal. 1983); *Hobson v. Wilson*, 556 F. Supp. 1157, 1181 (D.D.C. 1982).¹⁷

18 Plaintiffs’ further argument that the public reports cited by the Government should be
19 disregarded because they are not specific to Upstream collection is also meritless. Congress’s
20 determination that it is impracticable to obtain individual warrants for purposes of foreign
21 intelligence collection targeted at non-U.S. persons does not turn on which method the
22 Government uses instead to collect such intelligence. Because of changes in technology, the
23 Government was required under FISA to obtain judicial authorization to collect the
24 communications of non-U.S. persons located outside the U.S. (a result not intended by FISA’s
25 original authors, *see* Gov’t Mem. at 4-5), “significantly divert[ing] NSA analysts from their

26
27 ¹⁷ The Privacy & Civil Liberties Oversight Bd. Report on the Surveillance Program
28 Operated Pursuant to Section 702 of the FISA, and the report of The President’s Review Group
on Intelligence and Communications Technologies, *Liberty and Security in a Changing World*
(Dec. 12, 2013)—both of which Plaintiffs themselves cite (Pls.’ Opp. at 17-18, 24 n.16; Pls.’
Mot. at 4 n.3, 7 n.10, 8 n.12-13, 9 & n.14, 22, 25 n.24)—are likewise trustworthy.

1 counterterrorism mission” and “degrad[ing] capabilities in the face of a heightened terrorist
2 threat environment.” S. Rep. No. 110-209 at 5; *see also* May 1, 2007 FISA Mod. Hrg. at 18
3 (“massive amounts of analytic resources” used “to craft FISA applications”). There is no reason
4 to think that this is any less so in situations where the Government collects communications of
5 non-U.S. persons located abroad via Upstream instead of PRISM.

6 Nevertheless, the Government further addresses Upstream’s value to national security, to
7 the extent possible in unclassified terms, in the public portions of the supplemental Classified
8 Declaration of Miriam P., submitted herewith (“Nov. 7 Class. Miriam P. Decl.”). As the public
9 portions of the declaration confirm, the justifications for authorizing Section 702 collection
10 without requiring individualized warrants apply to Upstream as well as PRISM collection, and
11 imposing a warrant requirement each time a selector must be targeted for Upstream collection
12 would result in the loss of critical foreign intelligence information. *Id.* ¶¶ 32-33.¹⁸

13 Plaintiffs also try to distinguish cases holding that the Government’s special need for
14 foreign intelligence information justifies an exception to the warrant requirement, *see* Gov’t
15 Mem. at 35-36, on the basis that they concerned PRISM not Upstream collection. But they fail
16 here too to explain why the method of collection matters to the reasoning of these cases. Pls.’
17 Opp. at 19-21. Courts have held that collection of foreign intelligence does not require a warrant
18 because of the importance of the national interest in foreign-intelligence gathering above and
19 beyond normal law enforcement, and because of the need for flexibility and timeliness in the
20 collection of foreign intelligence, given its particular nature and objectives. *See* Gov’t Mem. at
21 36. The justifications for excepting foreign-intelligence collection from the warrant requirement
22 apply equally whether the Government collects intelligence as communications transit the
23 Internet backbone (Upstream), directly from Internet service providers (PRISM), or, for that
24 matter, pursuant to traditional FISA orders. *See* Nov. 7 Class. Miriam P. Decl. ¶¶ 32-33.¹⁹

25 _____
26 ¹⁸ The classified information in Ms. P.’s supplemental declaration is not relied on here,
27 § III, but is submitted in support of the Government’s alternative argument, *infra*, § IV, at 20-21,
28 that if Plaintiffs’ Fourth Amendment claim is not rejected on the basis of the public record, then
a full and fair adjudication of the special needs issue would require disclosure of information
protected by the state secrets privilege, mandating dismissal of Plaintiffs’ claim on that basis.

¹⁹ Plaintiffs’ additional criticism of *Mohamud*’s determination that the targeting and
minimization procedures contribute to the reasonableness of Section 702 surveillance as

1 Accordingly, the special needs doctrine applies to the alleged real-time electronic
 2 copying and scanning of online communications, and these alleged activities must be upheld as
 3 reasonable, particularly insofar as they involve communications that the Government does not
 4 retain. Even if alleged Stage 1 copying and Stage 3 scanning of unretained communications
 5 were deemed seizures and searches, they involve minimal intrusions on Fourth Amendment
 6 interests and are necessary to an effective means of gathering foreign intelligence important to
 7 the protection of national security. *See supra*, at 7-11; Gov't Mem. at 25-29; 31-34; 39-42.

8 Seeking to resist this conclusion, Plaintiffs assert that the “duration” of the “electronic
 9 scanning” says nothing about its “intrusiveness,” because the communications’ contents are
 10 “examine[d]” from “top to bottom,” Pls.’ Opp. at 22. But these characterizations disregard the
 11 critical fact—under the program as Plaintiffs contend it operates, no information about the
 12 communications at issue is ever made known to Government personnel. Neither the law nor
 13 common-sense notions of privacy support treating as constitutionally indistinguishable the
 14 “intrusion” caused in a millisecond by an automated scan of communications that reveals no
 15 information about them, and the intrusion that would be wrought by Government agents poring
 16 for hours over the same set of communications in search of targeted selectors. *See supra*, at
 17 10-11; *Cassidy v. Cherthoff*, 471 F.3d 67, 79 (2d Cir. 2006) (noting brevity and unintrusiveness
 18 of search); *MacWade*, 460 F.3d at 273 (same).²⁰

19 inconsistent with “the Supreme Court’s admonition [in *Riley v. California*, 134 S. Ct. 2473, 2491
 20 (2014)] that ‘government agency protocols’ are no substitute for a warrant,” Pls.’ Opp. at 20-21,
 21 is off the mark. The targeting and minimization procedures for Section 702 surveillance are
 22 required by the statute and approved by the FISC (*see* Gov’t Mem. at 6 n.1), not merely
 protocols voluntarily developed by government agencies (which can still factor into a totality-of-
 the-circumstances reasonableness analysis). *See Riley*, 134 S. Ct. at 2491.

23 ²⁰ Plaintiffs also dispute that the putative searches here are less intrusive than those
 24 upheld by other courts, Pls.’ Opp. at 23 n.14; Gov’t Mem. at 39, because those cases (they assert)
 25 involved PRISM, not Upstream, collection. Plaintiffs again miss (or ignore) the point. Those
 26 cases involved communications that had been retained by the Government; the instant motion
 27 does not. Plaintiffs also attempt to dismiss various statutory safeguards such as restrictions on
 28 targeting and the purposes for which communications may be acquired, reporting requirements
 to facilitate Congressional oversight as “non sequitur[s]” when it comes to the reasonableness of
 “search[ing] the contents” of the communications. Pls.’ Opp. at 22-23. But, although Plaintiffs
 challenge only the alleged initial stages of Upstream collection, their reasonableness still must be
 assessed in light of the ultimate programmatic purposes for which they are undertaken, measures
 to assess whether those purposes are being achieved, and protections ensuring that these
 activities are not conducted for purposes or in a manner unauthorized by the statute. *See* 50
 U.S.C. § 1881a; *Samson v. California*, 547 U.S. 843, 848 (2006).

1 Plaintiffs also argue, without citation, that the alleged copying and scanning of unretained
2 communications is unreasonable because there are “other practicable alternatives” to Upstream
3 that are less intrusive, such as PRISM collection and traditional FISA surveillance orders. Pls.’
4 Opp. at 17. But the special needs doctrine requires only that the Government employ “a
5 reasonably effective means”—and not “the least intrusive means,”—of addressing the special
6 need. *Board of Educ. of Indep. Sch. Dist. of Pottawatomie Co. v. Earls*, 536 U.S. 832, 837
7 (2002). The choice among reasonable alternatives “remains with the governmental officials who
8 have a unique understanding of, and a responsibility for, limited public resources,” *Sitz*, 496 U.S.
9 at 453-54; *see also Martinez-Fuerte*, 428 U.S. at 566. Plaintiffs’ speculation that the
10 Government can accomplish the same goals through PRISM collection and traditional FISA
11 warrants is simply irrelevant. It is also incorrect.

12 The Government has already shown that Upstream collection is a reasonably effective
13 means of meeting its special need to obtain foreign intelligence information, a need Plaintiffs
14 concede is “weighty.” Gov’t Mem. at 40-42; Pls.’ Opp. at 16. Plaintiffs contend, however, that
15 the Government’s reliance on legislators’ assessment of the importance and effectiveness of
16 Section 702 surveillance (including Upstream) when Congress reauthorized the statute—an
17 assessment based on numerous hearings and years of briefings from Executive Branch officials,
18 Gov’t Mem. at 41—is “no substitute for ‘empirical evidence of the effectiveness’” of Upstream
19 collection specifically. Pls.’ Opp. at 23. The FISC has found, however, that “NSA’s upstream
20 collection is *uniquely* capable of acquiring certain types of targeted communications containing
21 valuable foreign intelligence information.” *[Redacted]*, 2011 WL 10945618, at *10 (FISC Oct.
22 3, 2011) (emphasis added). What can also be stated publicly is that Upstream collection is
23 capable of acquiring certain valuable foreign intelligence that cannot be collected under PRISM
24 or other methods authorized by FISA, Nov. 7 Class. Miriam P. Decl., ¶¶ 8, 12-13, 16, “fills a
25 critical gap in U.S. intelligence gathering,” *id.* ¶ 17, allows the NSA to respond quickly and
26 effectively to developing threats, *id.*, and contributes “significant and sometimes uniquely
27 valuable foreign intelligence necessary to protect the Nation’s security,” *id.* This assessment
28 corroborates judgments jointly reached by the political Branches in adopting and reauthorizing

1 Section 702, is entitled to the Court's deference, Gov't Mem. at 41-42, and is plainly sufficient to
2 award judgment to the Government on Plaintiffs' Fourth Amendment claim.

3 **IV. IN THE ALTERNATIVE, PLAINTIFFS' FOURTH AMENDMENT CLAIM**
4 **MUST BE DISMISSED BECAUSE IT CANNOT BE LITIGATED WITHOUT**
5 **NATIONAL-SECURITY INFORMATION PROTECTED BY THE STATE**
6 **SECRETS PRIVILEGE.**

7 As set forth in the Government's opening brief and the classified *ex parte* supplement
8 thereto, even if the Court were to conclude that Plaintiffs have presented competent evidence that
9 Upstream collection involves either seizures or searches of Plaintiffs' communications, and that
10 the minimal intrusion on Plaintiffs' Fourth Amendment interests is not outweighed by
11 Upstream's contributions to national security, then in the alternative judgment still must lie for
12 the Government. That is so because operational details about Upstream that are necessary to a
13 full and fair adjudication of Plaintiffs' standing, their claims of Fourth Amendment seizures and
14 searches, and the Government's defenses thereto, are subject to the DNI's assertion of the state
15 secrets privilege, and excluded from the case. Gov't Mem. at 21, 43-45.

16 The same is now also true regarding the special needs analysis. Although Plaintiffs
17 question the sufficiency of the public evidence demonstrating the importance and effectiveness
18 of Upstream, Pls.' Opp. at 23, the NSA also possesses classified information, set forth in the
19 supplemental Miriam P. declaration, regarding the operational details of the Upstream program
20 that supports the Government's position on these points as well. Because these details cannot be
21 disclosed without risking exceptionally grave damage to national security, they fall within the
22 category of operational details concerning the Section 702 program, described in prior NSA
23 declarations, on which the DNI based his assertions of the state secrets privilege. Nov. 7 Class.
24 Miriam P. Decl. ¶¶ 5, 34. Therefore, this information, too, must be "completely removed from
25 the case." *Kasza v. Browner*, 133 F.3d 1159, 1166 (9th Cir. 1998). For this additional reason,
26 the state secrets doctrine requires that Plaintiffs' Fourth Amendment claim be dismissed, even
27 barring all other grounds on which judgment should be awarded to the Government.

28 Plaintiffs err when they argue that the state secrets privilege has no application here
because their motion is based solely on public evidence. Pls.' Opp. at 32. Although judgment
should be entered *for the Government* based on the publicly available evidence, if the Court

1 determined otherwise then in the alternative Plaintiffs' claim would still have to be dismissed
2 because a full and fair adjudication of the claim and the Government's defenses thereto would
3 require harmful disclosures of national-security information that is protected by the state secrets
4 privilege and must be excluded from the case. Gov't Mem. at 43.

5 Beyond that point, Plaintiffs repeat arguments to which the Government has previously
6 responded. Pls.' Opp. at 33-34. FISA section 106, 50 U.S.C. § 1806(f), does not preclude
7 assertion of the state secrets privilege here, even under the Court's prior ruling regarding
8 § 1806(f). Gov't Mem. at 45 n.17. The valid defense prong of the state secrets doctrine is not
9 limited to Government contracting cases, Gov't Defs.' Reply in Support of 2d Mot. to Dismiss &
10 for Summ. Judg. (ECF No. 119) at 6-7, and turns not on the actual validity of a defense but the
11 unavailability of the evidence required to support it. *Id.* at 11 & n.17. Plaintiffs' assertion that
12 the Government "has not proven up any 'demonstrably valid' defense" is entitled to no weight,
13 because they are not privy to the classified operational details regarding the Upstream program
14 that support the Government's additional defenses.

15 CONCLUSION

16 For the reasons stated above, the Government's cross-motion for partial summary
17 judgment on Plaintiffs' Fourth Amendment claim should be granted.

18 Dated: November 7, 2014
